Part I — Applicant User Guide

Applicant User Guide

Applying for a John Whitgift Foundation bursary

Welcome. This guide is for parents and guardians who have been invited to apply for a bursary towards a child's place at **Trinity School** or **Whitgift School**. It walks you through everything — from opening your invitation email to submitting your application and reading your outcome — in plain language, step by step.

A bursary is financial help with school fees, awarded by the John Whitgift Foundation ("the Foundation") to families who need it. Applications are **invitation-only**: the Foundation invites you, and you cannot sign yourself up. If you are expecting to apply but haven't received an invitation, contact the bursary team using the details they gave you.

Please don't worry if any of this feels daunting. You can complete the form a little at a time, over several sessions, on a phone or a laptop — and the bursary team is there to help if you get stuck. Take it one section at a time.

The screenshot shows the 'Sign in to your account' panel of the Bursary Assessment System. At the top, the John Whitgift Foundation crest is displayed above the text 'BURSARY ASSESSMENT SYSTEM'. The sign-in panel contains two input fields: 'Email address' with the placeholder 'you@example.com' and 'Password' with the placeholder 'Your password'. A 'Forgot password?' link is located to the right of the password field. A blue 'Sign in' button is positioned at the bottom of the panel.

The portal welcome screen — the John Whitgift Foundation crest and the "Sign in to your account" panel.

How to use this guide

This guide gives you the whole journey from start to finish. Read it through once to get the lay of the land, then come back to the section you need when you need it.

Alongside this guide there is a set of short, click-by-click **walkthroughs** — one per task. Each one shows exactly which button to press and what to expect on screen. Wherever a task has a detailed walkthrough, you'll see a link like this:

- [Accept your invitation and set up your account](#)

Click those links when you want the full step-by-step detail. The complete list is in the [Index of detailed walkthroughs](#) at the end.

A few conventions used throughout:

- **Buttons and labels** you'll see on screen are shown in **bold**.
- The first time a money or tax term appears, it's explained in plain words — and they're all gathered in the [Glossary](#).
- Screenshots show the key screens of the portal. The exact wording on screen may evolve slightly as the system is refined, but the layout matches what you'll see.

Quick start: your application in eight steps

Here's the fastest path from invitation to submitted application. Each step links to the detailed walkthrough if you want more.

1. **Accept your invitation.** Open the email from the Foundation and click the link. Set a password (at least 12 characters) and you're in. → [Accept your invitation](#)
2. **Confirm your child's school and name.** A short card asks you to confirm the school (Trinity or Whitgift) and your child's full name to set up the form. → [Tour of the dashboard](#)
3. **Complete the ten sections, saving as you go.** Work through the form in any order. Each section saves on its own, so you can stop and come back. → [Completing your application](#)
4. **Upload your documents.** Each document has its own slot — birth certificate, passports, P60s, bank statements, council tax bill, and so on. → [Upload a document](#)
5. **Check the review page.** When you reach the end you'll see a review screen that lists anything still missing, with a "Go fix this" link to each. → [The pre-submission review page](#)
6. **Read and sign the declaration.** Tick the box, type your name as your signature. → [Section 10 — Declaration](#)
7. **Submit.** Click **Submit Application**. You'll see a confirmation page with your application reference — write it down. → [Submit your application](#)
8. **Watch for the confirmation email.** Within a few minutes you should get an email confirming your application was received. After that, you can sign in any time to [check your status](#).

That's the whole journey. The rest of this guide fills in the detail.

Before you begin: what you'll need

Most of the time spent on a bursary application goes on gathering documents. If you collect everything first, the form itself is quick. Here's the full list — gather whatever applies to your family.

Documents to gather

- **Your child's full birth certificate** — it must show the child's name, date of birth, place of birth, and the parents' names.
- **Passports** for everyone in the household (both parents, the child, any other dependent children, and any dependent elderly relatives). For anyone who is not a British citizen, you'll also need their **right-to-remain document** — a visa or **Indefinite Leave to Remain (ILR)** paper.
- **Your most recent P60** for each parent — the end-of-year summary your employer gives you showing your total pay and tax.
- If a parent is self-employed or files a tax return: your latest **HMRC Self Assessment** return (sometimes called an **SA302**) and, for company directors, your **latest certified/audited accounts** and **balance sheet**.
- **Three months of bank statements** for each parent's main account (and any other accounts). Three consecutive months from the last six is fine.
- Your **current council tax bill** (or other evidence for the home you live in).
- **Benefit award letters**, if anyone receives benefits or tax credits.
- Evidence for anything special: a **court order** for school fees, an **insurance/education plan** for fees, a **decree absolute** (divorce), a **lease or rent statement**, a **redundancy letter**, a **sick note**, or a **care-home invoice** — only the items that apply to you.

You don't need everything before you start — you can save your progress and add documents later. But having them ready makes the whole thing far smoother.

Accepted file types and sizes

- Files can be **PDF**, **JPEG (.jpg/.jpeg)**, or **PNG**.
- Each file can be up to **20 MB**.
- A photo taken on your phone is perfectly acceptable for a paper document.

See [What file types and sizes are accepted](#) for tips on shrinking a file that's too big or converting an unsupported format.

You can do this on a phone, over several sessions

The portal works on any modern phone (iPhone or Android) as well as on a laptop. Your work saves section by section, so you can start on your phone — handy for photographing paper documents on the spot — and finish later on a laptop. Your progress follows you between devices.

Getting in

Everything starts with the invitation email from the Foundation.

Accepting your invitation and setting a password

The subject line of the invitation will mention "bursary" or "invitation". Open it and click the link inside. You'll land on a page titled **Create your account**.

- Your **email address** is shown at the top and can't be changed — it has to match the address the Foundation invited.
- Check that your **first name** and **last name** are correct; you can fix a spelling here.
- Choose a **password** of at least **12 characters**. Make it unique — the system checks it against a list of known-leaked passwords and will reject anything too common. A short phrase of three random words works well.
- Type the password again to confirm, then click **Create account**.

You'll be signed in straight away. The first thing you'll see is a short card, **Let's set up your application**, asking you to confirm the **school** your child has been offered a place at and your **child's full name** as it appears on the birth certificate. Confirm both, and you're into the form.

 BURSARY ASSESSMENT SYSTEM

Create your account

Complete your registration to access the bursary portal.

Email

claude-review-inv@meridiantech.group

First name

Aged

Last name

Invite

Choose a password

At least 12 characters

Confirm password

Repeat your password

Create account

The "Create your account" page — the read-only email at the top, the name fields, and the password boxes.

Full detail: [Accept your invitation and set up your account.](#)

Logging in after the first time

Once your account exists, you can sign in any time at the portal login page. You'll see **Sign in to your account** with an **Email address** field, a **Password** field, and a **Sign in** button. Use the same email and password you set up.

If your invitation link has expired

Invitation links are time-limited and can only be used once. If yours has expired or been used already, you'll see a page reading **Invitation invalid** with a short explanation and a **Back to sign in** button. Nothing is lost. Email the bursary team (the address is in your original invitation), tell them the child's name and roughly when the invitation was sent, and they'll send a fresh link.

If the link was already used, you may simply have an account already — try signing in, or [reset your password](#). Full detail: [If your invitation link expired or doesn't work.](#)

Resetting a forgotten password

Forgotten your password? On the login page, click **Forgot password?** below the password box. On the **Reset your password** page, type your email and click **Send reset link**. You'll see a green **Check your email** message, and a reset link will arrive by email. Click it and choose a new password (again, at least 12 characters).

For your privacy, the system never tells you whether an email address is registered — so the "check your email" message appears whether or not an account exists. If no email arrives, wait a couple of minutes and check your spam folder. Full detail:

[Reset a forgotten password](#).

Logging in on your phone

Open the portal address (the same link from your invitation email) in your phone's browser — Safari or Chrome on iPhone, Chrome on Android. Sign in as normal. A few things look different on a small screen:

- The list of form sections, which sits in a sidebar on a laptop, hides behind a **menu icon** at the top. Tap it to see the sections.
- A **bottom bar** stays in view as you scroll, with **Back** on the left and **Save and Continue** on the right.
- Upload buttons let you **Take a photo** or **Choose from library**.

Tip: add the portal to your home screen for one-tap access (Safari: share icon → **Add to Home Screen**; Chrome: three-dot menu → **Add to Home screen**). Full detail: [Log in on your phone](#).

Finding your way around

When you sign in, you land on your **dashboard** — your home base. It tells you, at a glance, where you are with your application.

2026/27 Assessment Round — continue your bursary application below.

APPLICATION STATUS
2026/27 Assessment Round

Draft

Sections complete 4 of 10

QUICK ACTIONS

Continue Application
Pick up where you left off →

View Status
Track your application progress →

The dashboard — the "Welcome back" greeting, the application status card with its **Draft** badge and progress bar, and the **Continue Application** and **View Status** cards. (The section list on the left shows nine sections here because this is a re-assessment, which skips Family Identification.)

At the top you'll see a friendly **Welcome back** greeting and a line naming your assessment round (for example, *2026/27 Assessment Round*).

Application status card. A white card shows:

- An **Application status** label.
- The round name.
- A coloured **status badge** — a brand new application shows **Draft**.
- A progress bar reading **Sections complete — X of 10**, with a gold bar showing how far along you are.

Quick actions. Two cards beneath:

- **Continue Application** — picks up wherever you left off. This is the button you'll use most.
- **View Status** — opens the detailed status page with the full timeline (more useful after you've submitted).

The section list. On a laptop, the left sidebar lists the ten sections of the form (behind the menu icon on a phone). Each section has an indicator so you know where you stand:

- A **grey circle** — not started.

- A **gold bar with a fraction** — partly filled.
- A **green tick** — complete.
- An **amber warning** — saved but something still needs fixing.

You can click any section to jump straight to it. You don't have to fill the form in order.

If you've accepted your invitation but not yet started, you'll instead see the **Let's set up your application** card asking you to confirm the school and child's name. Once you've done that one-time step, the dashboard switches to the progress view above. Full detail: [Tour of the dashboard](#).

Completing your application

The form has **ten sections**. You can complete them in any order and save as you go — your work is kept safely on the Foundation's servers between sessions. Each section ends with a **Save and Continue** button; pressing it checks your answers and, if anything required is missing, shows an error summary at the top with the problem fields highlighted in red.

Two pieces of logic shape what you see:

- **Sole parent?** If you tick that you're applying as a sole parent in Section 3, the second parent's blocks disappear throughout the form (and you'll only see one income column in Section 7, one bank-statement slot in Section 8, and so on).
- **Re-assessment?** If this is a return visit in a later year, **Section 2 (Family Identification) is skipped entirely** and several sections come pre-filled. See [Returning families](#).

Here's what each section asks for.

Section 1 — Details of Child

Confirms who the application is for. You'll choose the **school** (Trinity or Whitgift), the **school year** the child is applying to enter (Year 6, 7, 9, 12, or Other — contact the team if Other), and the child's **full name, gender, date of birth, and place of birth**. You'll **upload the birth certificate** here, and confirm whether the child lives at the same address as Parent/Guardian 1 (if not, you add their address). Finally, the **school the child currently attends** and the **start date** there. Full detail: [Section 1 — Details of Child](#).

Section 2 — Family Identification

Identity documents for **every member of the household** — the child, both parents (or the sole parent), any other dependent children, and any dependent elderly relatives. Click **Add family member**, type the person's name, then upload their **passport** (and, for anyone who is not a British citizen, their **right-to-remain / ILR** document). Repeat for each person. **This section does not appear for re-assessments** — you only complete it in year one. Full detail: [Section 2 — Family Identification](#).

Section 3 — Parent / Guardian Details

Contact details, relationship status, and employment for each parent or guardian. At the top, answer **Are you a sole parent?** — answer **Yes** and the Parent 2 block disappears; answer **No** and both parents' blocks show. For each parent you give a title, name, date of birth, nationality, home address, contact details, and **employment status** (employed, self-employed, unemployed, retired, and so on). The status you pick here decides which income rows and document slots appear later in Section 7, so choose carefully. Full detail: [Section 3 — Parent / Guardian Details](#).

Section 4 — Dependent Children

A table listing every dependent child in your household — the child this application is for **and** any siblings. Click **Add dependent child**, then for each one give the name, the school they attend, whether they are the child named on this application (tick this on exactly one row), any unearned income (such as interest on accounts in their name, entered as a yearly figure or 0), and whether they receive a bursary or have fees paid by someone else. Full detail: [Section 4 — Dependent Children](#).

Section 5 — Dependent Elderly

Any elderly relatives you support, both at home and in a care home. If you support none, this takes about ten seconds — just answer **No** twice. If you do, you'll add each relative's name, your relationship to them, and the approximate annual cost (estimate to the nearest £100 — the team wants the scale, not exact figures). For relatives in care you'll also give the care-home name and your annual contribution. Full detail: [Section 5 — Dependent Elderly](#).

Section 6 — Other Information

Three optional topics: a **court order** for paying school fees, **insurance policies** taken out specifically to pay fees, and **outstanding school fees** from previous years at any school. If none apply, this is three **No** answers. Where you answer **Yes**, the relevant amount fields appear and you'll be asked to upload evidence (such as the court order or policy schedule). Full detail: [Section 6 — Other Information](#).

Section 7 — Parents' Income

Each parent's **gross income** (your income before tax is taken off) from every source, for the financial year ended 5 April. You'll see one column per parent — or just one if you're a sole parent. Work down each row (salary and pensions, bonuses, benefits, tax credits, interest, dividends, rent, bonds, maintenance, bursaries, and other income), entering a figure or **0** in every row. A running **Total** appears underneath. Use **annual** figures — multiply monthly amounts by 12.

You'll also upload supporting documents here. Your **most recent P60** is always required for each parent. Other documents are asked for depending on what you enter — for example a **Self Assessment (SA302)** if you reported dividends, rent, or bond income, or a **benefits award letter** if you reported benefits or tax credits. The slot label tells you exactly what goes where (for example, "P60 — Parent 1"). Full detail: [Section 7 — Parents' Income](#).

Section 8 — Assets & Liabilities

What the family owns and owes: your main home (owned, mortgaged, or rented, plus its value and any mortgage), any other properties, vehicles, savings, ISAs and shares, premium bonds, and any loans or hire-purchase agreements. Use rough valuations — online estimates for property are fine, and round savings to the nearest £100.

This section also holds two important uploads: your **council tax bill** (always required) and **three months of bank statements** for each parent's main account, added as separate files into one slot. Full detail: [Section 8 — Assets & Liabilities](#).

Section 9 — Additional Information

Your chance to flag special circumstances and add anything that didn't fit elsewhere. A short checklist covers six common situations — **divorced, separated, sick/unable to work, paying rent, made redundant, receiving benefits** — and ticking **Yes** on any row reveals an upload for the supporting document. Below that is a free-text box (up to about 3,000 characters) for anything else the Foundation

should know: a one-off event, a recent change that won't show in the historical figures yet, or an explanation of an unusual number elsewhere. Keep it factual and brief. It's fine to leave the box blank if your situation is straightforward. Full detail: [Section 9 — Additional Information](#).

Section 10 — Declaration

The final step — a legal declaration you read and agree to. You reach it only after the review page (next) has cleared every issue. You'll tick a box confirming the information is true, and type your full name as a typed **signature** (it must match a parent/guardian name from Section 3). Only one parent needs to sign, but by signing you confirm you're authorised to do so for the household. Full detail: [Section 10 — Declaration](#).

The screenshot shows the 'Details of Child' form section within the JWF Bursary System. The interface includes a sidebar on the left with a list of sections: Details of Child (selected), Parent / Guardian Details, Dependent Children, Dependent Elderly, Other Information, Parents' Income, Assets & Liabilities, Additional Information, Review, and Declaration & Submit. A progress bar at the bottom of the sidebar indicates '0 of 10 sections complete' at 0%. The main content area is titled 'SECTION 1 OF 9 RE-ASSESSMENT Details of Child'. A blue informational box states: 'Pre-filled from last year. We have carried forward your answers from the previous assessment. Please review each field and update anything that has changed.' The form fields include: 'School selection' with a dropdown menu showing 'Whitgift School'; 'School year your child is applying to enter' with a dropdown menu; 'Child information' section with 'Child's full name' (Shane Murazik), 'Gender' (Male), and 'Date of birth' (10/05/2014). At the bottom, there is a 'Signed in as Brian Murazik' status, a '< Back' button, and a 'Save and Continue >' button.

A typical form section — the sidebar section list on the left, a part-filled set of fields (here pre-filled from last year), an empty "Choose file" upload slot, and the **Save and Continue** button in the bottom bar.

Uploading documents

Documents are a big part of a bursary application, so it's worth understanding how uploads work once — the same pattern applies everywhere.

How an upload slot works

Every required document has its own **slot** with a clear label (such as "Birth Certificate", "P60 — Parent 1", or "Council Tax Bill") sitting right next to the question that needs it. An empty slot looks like a **dashed box** with a cloud icon, a short hint, and a **Choose file** button. You can also drag and drop a file straight onto the box.

To upload: click **Choose file**, pick your file, and watch the short progress bar. When it finishes, the slot turns **green** with a tick and shows the filename, the file size, a **View** link (opens the file so you can check it's the right one), and a **Remove** option. Full detail: [Upload a document](#).

View

Remove

Do you make regular capital repayments? *

Yes
No

*A completed upload slot — the green tick, the filename, the file size, and **View** / **Remove**. An empty slot appears as a dashed "Choose file" box (visible in the form-section image above).*

Slots that take several files (bank statements)

Some slots accept more than one file — bank statements are the main example, where you upload three monthly statements into a single slot per parent. The drop-zone stays visible while a list of the files you've added builds up underneath, each with its own **View** and **Remove**. Add each statement in turn (or select several at once in the file picker). To fix a mistake, remove just the one file — the others stay put. Full detail: [Upload three months of bank statements](#).

Replacing a file

Uploaded the wrong file, or got a clearer copy? Before you submit, click **Remove** on the slot, then upload the replacement the same way. For a multi-file slot, remove just the file you want to swap. Removing a file deletes it permanently, so have the replacement ready first. After you submit, uploads are locked — if the team needs a new copy they'll ask you directly. Full detail: [Replace a document](#).

File types and sizes

Files must be **PDF, JPEG, or PNG**, up to **20 MB** each. If a file is rejected, the slot turns red with a message — usually "File too large" or "Unsupported file type". The walkthrough explains how to shrink an oversized PDF, convert an iPhone **HEIC** photo to JPEG, or turn a Word document into a PDF. Full detail: [What file types and sizes are accepted](#).

Photographing a paper document with your phone

No scanner needed. On your phone, tap **Choose file** on the slot and pick **Take a photo** (iPhone) or **Camera** (Android). Lay the document on a plain, dark surface in good light, fill the frame, and hold steady — blur is the most common reason a document is unreadable. For multi-page documents, use your phone's built-in scanner (iPhone: Notes app → camera → **Scan Documents**; Android: Google Drive → + → **Scan**) to combine pages into one PDF. Full detail: [Upload from your phone's camera](#).

Reviewing and submitting

When you've worked through the sections, you arrive at the **Review Your Application** page — the last checkpoint before the declaration.

STEP 10 OF 11 — REVIEW

Review Your Application

Check each section below, then click "Proceed to Declaration" when ready. You can edit any section using the Edit button.

Sections fully complete

4 of 10

40%

Looks complete — review your details below and proceed to the Declaration when ready.

APPLICATION SECTIONS

1. Details of Child

Complete Edit

Name	Shane Murazik
Date of birth	10/05/2014
School applying for	Whitgift School
Year of entry	Y8
Current school	Whitgift School
Place of birth	United Kingdom

2. Family Identification

Not started Edit

Not started

3. Parent / Guardian Details

Complete Edit

Address	2 Test Avenue, Croydon, CR0 2BB	
Employment	PAYE	
Sole parent / guardian	Yes	

4. Dependent Children

Complete Edit

Number of dependent children	1	
Name	Date registered	Named on application
Shane Murazik	—	Yes

5. Dependent Elderly

Complete Edit

Elderly at home	No
Elderly in care	No

6. Other Information Required

Not started Edit

Not started

7. Parents' Income

Not started Edit

Not started

8. Parents' Assets & Liabilities

Not started Edit

Not started

9. Additional Information

Not started Edit

Not started

Ready to proceed?

All required information looks complete. Click below to read and sign the Declaration, then submit your application.

Proceed to Declaration

< Back

Save and Continue >

*The review page — the progress bar, the status banner, and a card for each section with its status pill (**Complete** / **Not started**) and an **Edit** button. When something required is still missing, an issues panel with "Go fix this" links appears [here](#).*

The review page

The page shows a progress bar, then one of two things:

- If anything required is missing, a **red issues panel** headed **N issues to resolve before you can submit**. Each issue has a short description and a **Go fix this** link that takes you straight to the right field in the right section. Fix it, save, and you're brought back here.
- If nothing is missing, a **green banner** reading **Looks complete — review your details below and proceed to the Declaration when ready**.

Below that, each of the nine data-entry sections appears on its own card with a status pill — **Complete** (green), **Needs attention** (red), or **Not started** (grey) — an **Edit** button, and a summary of what you entered. Use **Edit** to change anything. Full detail: [The pre-submission review page](#).

Why Submit might be disabled

The **Proceed to Declaration** button stays greyed out until everything required is in place. The usual reasons are a required field left empty, a required document missing from a slot, or a conditional field that appeared (because you answered "Yes" somewhere) and wasn't filled in. Every reason is listed in the issues panel. If the panel looks empty but the button is still disabled, refresh the page — your most recent save may not have synced yet.

Signing and submitting

Once the page is clear, click **Proceed to Declaration**, read the ten-point declaration, tick the agreement box, and type your full name in **On behalf of the applicant**. Then click **Submit Application**. Full detail: [Submit your application](#).

What happens the moment you submit

You're taken to a green confirmation page, **Your application has been submitted**, showing your **application reference** (a unique code — write it down), the submission date, the child's name, and the round. A **What happens next?** list explains the four stages (confirmation email → document review → financial assessment → outcome) and shows the Foundation's target decision date.

Within a few minutes you should receive a **confirmation email** quoting the same reference. If it hasn't arrived after fifteen minutes, check your spam folder; if the inbox is shared, ask the others on it; and if there's still nothing, contact the bursary team to confirm receipt.

From this point your application becomes **read-only** — you can view it but not change it — and your status moves from **Draft** to **Submitted**. Tip: save or screenshot the confirmation page so you always have your reference to hand.

After you submit

Once submitted, the portal becomes a way to track your application. Sign in any time and click **View Status** to see exactly where things stand.

The screenshot displays the 'Application Status' page. On the left, the John Whitgift Foundation logo and 'BURSARY ASSESSMENT' are visible. Below this, the 'ROUND' is '2026/27 Assessment Round'. A list of sections includes 'Details of Child', 'Parent / Guardian Details', 'Dependent Children', 'Dependent Elderly', 'Other Information', 'Parents' Income', 'Assets & Liabilities', 'Additional Information', 'Review', and 'Declaration & Submit'. A progress bar shows '0 of 10 sections complete' at '0%'. The user is signed in as 'Brian Murazik'. The main content area shows the 'APPLICATION STATUS' as 'Application Status'. A 'REFERENCE' card displays 'WS-202627-0004' for 'Shane Murazik' in the '2026/27 assessment round', with a 'Draft' status pill. Below this is a 'PROGRESS' timeline with four steps: 'Draft' (Application started 22 May 2026), 'Submitted' (Application submitted for review, Pending), 'Under Review' (Financial assessment in progress, Pending), and 'Outcome Available' (Assessment complete, Pending). A blue banner at the bottom states: 'Decisions for the 2026/27 round are expected by 15 January 2027. You will be notified by email when your outcome is available.' Navigation buttons include '< Back' and 'Save and Continue >'.

*The Application Status page — the reference card, the four-step timeline (**Draft** → **Submitted** → **Under Review** → **Outcome Available**), and the decision-date notice.*

Checking your status

The status page shows a card with your **reference number**, the child's name, the round, and a coloured **status pill**. Below it is a four-step **timeline** — **Draft** → **Submitted** → **Under Review** → **Outcome Available** — with the date each step was reached. Reached steps are gold; steps still to come are grey and read "Pending". A blue banner tells you when decisions for your round are expected.

Here's what each status means:

Status	What it means
Draft	You're still filling in the form. Not yet sent.
Submitted	You've submitted. Waiting for an assessor to pick it up.
Under Review	An assessor is actively working on your file.
Paused	The assessor is waiting on something from you — usually a missing document. Check your email for a request.
Completed / Qualifies / Does Not Qualify	The decision has been made.

You'll always get an email at the major milestones, so the status page is a convenience rather than something you need to watch. A status that hasn't changed for a while is normal during a busy round. Full detail: [Check the status of your application](#).

Responding to a "missing documents" request

Sometimes an assessor needs something more — a clearer bank statement, a missing payslip, or evidence for something you described in Section 9. They'll **email you**, with a subject like *"More information needed for your bursary application"*. The email explains which document is needed and why, gives a link back into the portal, and usually sets a deadline (often 7 working days). While the request is open, your status shows **Paused**.

To respond, click the link, sign in, and upload the requested file(s) using the same upload mechanics as before. Respond as quickly as you can — decisions are batched by round, so a delay can push your outcome to a later batch. If the request is unclear or you can't get the document in time, just reply to the email; the team would rather hear from you.

Please note: the in-portal page for these requests is still being built. Until it's live, the **email itself** will guide you on exactly what to send and how — so always read the email carefully and follow its instructions.

Full detail: [Respond to a "missing documents" request](#).

Reading your outcome

When the assessment is complete you'll get an email (subject *"Bursary application outcome"*)

) and the status page will show a new outcome card. There are two outcomes:

- **Qualifies — a green card** reading *"Your application qualifies for a bursary."* The Foundation will then send a separate letter or email with the **percentage of fees** your bursary covers and the **Bursary Contract** for you to sign and return before the school year starts. Bursaries are reviewed every year (see re-assessment, below).
- **Does Not Qualify — a rose-coloured card** reading *"Your application does not qualify at this time."* A letter follows with the headline reason. By policy the Foundation doesn't give a line-by-line breakdown, but if your circumstances change significantly you may be invited to re-apply in a future round.

Decisions are final. If you believe an important piece of information was missed or miscounted, write to the bursary team within **14 days** of receiving the outcome, explaining the specific issue, and they'll tell you whether the application can be looked at again. Save the outcome email and any follow-up letter together — you may need them for the school's fees office or for tax. Full detail: [Read your outcome](#).

Returning families: re-assessment (year two and beyond)

Bursaries are reviewed every year. At the start of each new academic year, the Foundation invites every active bursary holder to complete a **re-assessment** — a shorter version of the original application.

Accepting a re-assessment invitation

You'll get an email (subject like *"Bursary re-assessment for [child's name]"*) with a link to the portal. Click it and **sign in with the same email and password** you used last year (reset the password if you've forgotten it). You'll be welcomed back to the new round and asked to confirm the school and your child's name, then taken into the shorter form. Full detail: [Accept a re-assessment invitation](#).

If you weren't expecting an invitation, or you don't wish to re-apply, contact the bursary team — note that **not responding to a re-assessment usually leads to the bursary lapsing**.

What's different in a re-assessment

- **Section 2 (Family Identification) is skipped.** The Foundation already has everyone's ID from year one, so no new passports are needed unless your family has changed (if a new dependant joined, contact the team — they may check ID separately).

- **Some sections are pre-filled** from last year — Details of Child, Parent/Guardian Details, Dependent Children, and Dependent Elderly. You'll see a small **"Pre-filled from last year — please confirm"** banner. Check each, update anything that's changed, and confirm. Take care not to blank out a pre-filled field by accident.
- **All the financial sections start blank** — Income, Assets & Liabilities, and Other Information. You re-enter this year's figures fresh and upload new documents (new P60s, the latest council tax bill, and three months of recent bank statements). This is the bulk of the work, so set aside an evening to gather the documents first.

The sidebar shows nine sections instead of ten. You finish the same way as in year one — review page, then declaration and submit. Full detail: [Complete a re-assessment](#).

Please note: the re-assessment-specific screens (the skipped section and the pre-fill banners) are still being finished. The flow above is the intended experience.

How the Foundation reasons about year-on-year changes

This is background — there's nothing to do in the portal, but it helps you read your outcome letter.

The Foundation uses **last year's payable fees** (your share of the fees after last year's bursary) as a **benchmark**. If your finances are roughly unchanged, your contribution stays roughly the same and the bursary absorbs any rise in school fees. Where your award changes materially, the outcome letter explains why using short, plain-English **reason codes** — for example *Increase in income*, *Reduction in income*, *New dependant*, *Property sale/purchase*, *Inheritance received*, or *Redundancy/job loss* — and the direction (up or down) each pushed your award.

The practical lesson: if a number looks unusually high or low this year for a one-off reason, **explain it in Section 9**. That lets the assessor apply a one-off reason rather than treating it as a permanent change. Always declare the new figures honestly — a genuine drop in income may well increase your bursary. A large change in either direction usually means the assessor will want a friendly conversation; that's normal, not a problem. Full detail: [What changes year-on-year](#).

Separated or divorced parents

The Foundation assesses a bursary on **both** parents' income, whether or not the parents live together or are still a couple. When parents are separated or divorced, you usually can't — and shouldn't have to — share one login or fill in each other's finances. The system handles this with a **second-parent invitation**.

How it works

- **One parent is the *primary applicant*.** They complete the child's application as normal (everything in this guide), receive all communications, and are the one told the final outcome.
- **The second parent is invited separately.** The bursary office (or the assessor) adds the second parent to the application and sends them their own invitation. This can happen at any time — when the application is first set up, after the primary has submitted, or while the assessment is underway.

If you're the second parent

You'll receive an email inviting you to provide your financial details for your child's bursary application. When you accept and sign in, you'll see a **short, private form** — only:

- **Your** parent/guardian details,
- **Your** income, and
- **Your** assets and liabilities, with slots to upload **your** supporting documents (payslips, P60, bank statements).

You'll see your **child's name** for context, but **nothing else** — not the child's full application, not the other parent's income, contact details, or documents. When you've finished, you submit your part and you're done; you don't need to re-enter anything about the child.

Privacy between the two parents

This separation is strict and works **both ways**: the primary parent cannot see the second parent's figures or documents, and the second parent cannot see the primary's. Only the Foundation's assessors see both, together, to work out the award. The final outcome is sent to the **primary** parent.

If the second parent doesn't respond, the assessor can still complete the assessment on the information available, noting that the second parent did not take part.

Separated-parent applications are handled by the bursary office — there's no "invite the other parent" button on the applicant side. If your family needs this, contact the team and they'll set it up.

Your data and privacy

Your application contains sensitive personal and financial information, and the Foundation handles it carefully. You only ever see your own data — never another family's, and never the assessors' internal calculations.

Under **UK GDPR** you have the right to ask for your personal data to be deleted. There is no self-service "delete my account" button — because deletion is irreversible, the Foundation handles it manually so it's done correctly.

What gets deleted: your profile (name, email, phone, address), all your application data, every uploaded document, your assessment record, and your login account.

What is kept: a small amount of **audit-trail** information (with your name and email removed) recording that actions took place, and — if applicable — the bare fact that a bursary was awarded for a given year, with no identifying detail. This is kept for legal and audit reasons.

The 7-year rule: if your application is less than seven years old and tied to an active or recently-closed bursary, the Foundation is legally required to retain the records until that window ends. In that case the deletion is **scheduled** for when the period expires, rather than done immediately, and the team confirms this in writing.

To request deletion, email the bursary team, state clearly that you're making a **UK GDPR deletion request (Article 17)**, and include the child's name and your application reference. They'll reply within one calendar month confirming the deletion has been carried out or scheduled. Before you ask, save any outcome letters or bursary contracts you want to keep — once deletion runs, nothing can be recovered. If you might re-apply later, consider asking the team to **close** your account instead of deleting it. Full detail: [Request your data be deleted](#).

If something goes wrong

Most problems have a quick fix. Here are the common ones.

Problem	What's happening	What to do
"Invitation invalid" when I click the link	The link has expired or was already used.	Try signing in (you may already have an account), or email the bursary team for a fresh invitation. See walkthrough 02 .
Password rejected as too common / breached	The system blocks known-leaked passwords.	Choose a longer, unique password — a phrase of three random words works well.
"Passwords do not match"	The two password boxes differ.	Re-type both carefully.
No invitation email at all	It may be in spam, or the Foundation has an old address.	Check spam; if nothing, reply to the team using the contact details they gave you.
Forgotten my password	—	Use Forgot password? on the login page. See walkthrough 03 .
No password - reset email arrives	For privacy, the system never confirms whether an address is registered.	Wait a couple of minutes, check spam, confirm you used the right address; if still nothing, contact the team.
"Too many attempts" on password reset	The system limits repeated reset requests.	Wait a few minutes and try again.
Page looks zoomed or doesn't fit on my phone	Display quirk on a small screen.	Pinch to zoom out, or rotate to landscape.
Camera upload is greyed out	Your browser doesn't have camera permission.	Grant camera access in your phone's settings, then retry.
File rejected: "File too large — maximum 20 MB"	The file exceeds the limit.	Compress the PDF or take a smaller photo. See walkthrough 19 .
File rejected: "Unsupported file type"	Only PDF, JPG, and PNG are accepted.	Convert it first (e.g. "Save as PDF", or HEIC → JPEG). See walkthrough 19 .
Upload fails with a red "Try again"	Often a brief network glitch.	Click Try again ; check your connection.
Submit button is greyed out	Something required is still missing.	Read the issues panel and use each Go fix this link. If the panel is empty, refresh the page. See walkthrough 21 .
A section shows amber after I removed a file	Removing a required document made the section incomplete.	Upload a replacement; the indicator returns to green.
No confirmation email after submitting	It may be in spam, or sent to a shared inbox.	Wait fifteen minutes, check spam, ask others on the inbox; if still nothing, contact the team to confirm receipt.
My status hasn't changed in a while	Normal during busy parts of a round.	Wait for the milestone email; contact the team if genuinely concerned.

If your problem isn't here, the bursary team is happy to help — see [Getting help and contact](#).

Frequently asked questions

Do I have to apply — can I sign myself up? No. Applications are invitation-only. The Foundation sends you an invitation by email; you can't self-register. If you expected an invitation and haven't had one, contact the bursary team.

Can I start on my phone and finish on a laptop? Yes. Your work saves section by section and follows you between devices. Many people photograph documents on their phone, then finish typing on a laptop.

Do I have to fill the sections in order? No. You can complete the ten sections in any order and jump around using the sidebar. Each section saves on its own.

Do both parents need their own account? No. Only the invited parent or guardian has a login. You complete the whole form on behalf of the household, including both parents' details. There's no second-parent login.

I'm a sole parent — do I still fill in a second parent's details? No. Tick **Are you a sole parent?** in Section 3 and all the Parent 2 blocks disappear throughout the form.

Who sees my information? Only the Foundation's bursary staff who assess your application. You only ever see your own data, and you never see the assessors' internal calculations. Your financial information is used solely for the bursary process.

What documents do I need? The full list is in [Before you begin](#) and the [Document checklist](#). The essentials are the birth certificate, passports (plus right-to-remain papers for non-British citizens), P60s, three months of bank statements, and your council tax bill.

What file types can I upload, and how big can they be? PDF, JPEG, or PNG, up to 20 MB each. A phone photo is fine. See [Accepted file types and size limits](#).

Can I change my answers after I submit? No. Once you submit, the application becomes read-only. If the team needs a correction, they'll contact you with a request.

What if I miss the deadline? Contact the bursary team as soon as you can. They can advise on your options and, if appropriate, re-issue an invitation. Don't assume the door is closed — get in touch.

How long until I hear back? The status page and the submission confirmation both show the target decision date for your round. Busy rounds can take a little longer. You'll always get an email when the outcome is ready.

What does "Paused" mean on my status? The assessor is waiting on something from you — usually a missing or unclear document. Check your email for a request and respond as soon as you can.

My income changed a lot this year — what should I do? Declare the real figures and explain the reason in Section 9 (Additional Information). A one-off change can be treated differently from a permanent one, and a genuine drop in income may increase your bursary.

My application doesn't qualify — can I appeal? Decisions are final, but if you think an important fact was missed or miscounted, write to the team within 14 days explaining the specific issue. They'll tell you whether it can be looked at again.

How do I get my data deleted? Email the team stating you're making a UK GDPR deletion request. Note the 7-year retention rule may apply if you have an active or recent bursary. See [Your data and privacy](#).

I'm a returning family — is the form the same? It's shorter. The identity section is skipped, several sections are pre-filled from last year for you to confirm, and the financial sections start blank for the new year. See [Returning families](#).

Appendix

Glossary

Term	Plain meaning
Bursary	Financial help with school fees, awarded by the Foundation to families who need it.
Scholarship	An award based on a child's ability or achievement, separate from a bursary (which is based on financial need).
Gross income	Your income before tax and other deductions are taken off.
Net income	Your income after tax — your take-home pay. (The form asks for gross figures.)
Payable fees	The part of the school fees you pay after your bursary is applied.
Benchmark	Last year's payable fees, used as the starting point when re-assessing your award.
Re-assessment	The shorter annual review of an existing bursary, done at the start of each academic year.
Reason code	A short, plain-English label the Foundation uses in an outcome letter to explain why an award changed (e.g. <i>Increase in income</i>).
Declaration	The legal statement at the end of the form confirming your information is true; you sign it by typing your name.
P60	The end-of-year summary your employer gives you showing your total pay and tax for the year.
SA302 / Self Assessment	The HMRC tax return summary for people who are self-employed or who file a tax return.
Indefinite Leave to Remain (ILR)	A document showing a non-British citizen has permission to live in the UK permanently.
Right to remain	Any document (visa, ILR, etc.) showing a non-British family member's permission to live in the UK.
Sole parent	A single parent or guardian applying on their own; ticking this hides the second-parent sections.
Dependant	Someone who relies on you financially — a child or an elderly relative.
Audit trail	A record of when actions happened, kept for legal reasons even after personal details are removed.
UK GDPR	The UK's data-protection law, which gives you rights over your personal data, including the right to ask for it to be deleted.

Document checklist

Tick these off as you gather them. Only the items relevant to your family apply.

☐

Child's full birth certificate (showing parents' names and place of birth)

☐

Passport for each household member (child, both parents, other dependent children, dependent elderly)

☐

Right-to-remain / ILR document for any non-British citizen

☐

Most recent P60 for each parent

☐

HMRC Self Assessment / SA302 (if self-employed or you file a tax return)

☐

Certified/audited accounts and balance sheet (company directors)

☐

Three months of bank statements for each parent (and any other accounts)

☐

Current council tax bill

☐

Benefit / tax-credit award letters (if applicable)

☐

Court order for school fees (if applicable)

☐

Insurance / education-plan schedule for fees (if applicable)

☐

Decree absolute (if divorced)

☐

Lease or rent statement (if renting)

☐

Redundancy letter (if recently made redundant)

☐

Sick note / medical evidence (if unable to work)

☐

Care-home invoice (if supporting an elderly relative in care)

Status reference

Status label	Meaning
Draft	You're still filling in the form. Not yet sent.
Submitted	You've submitted; waiting for an assessor to pick it up.
Under Review	An assessor is actively working on your file.
Paused	The assessor is waiting on something from you — usually a missing document. Check your email.
Completed	The assessment is finished.
Qualifies	Your application qualifies for a bursary.
Does Not Qualify	Your application does not qualify at this time.

(On the status timeline, the fourth step is shown as **Outcome Available** once the assessor finishes.)

Accepted file types and size limits

- **Formats:** PDF (`.pdf`), JPEG (`.jpg` , `.jpeg`), PNG (`.png`).
- **Size:** up to **20 MB** per file.
- **Multiple files:** allowed in certain slots (e.g. bank statements — add three monthly files into one slot).
- **Rejected file?** See [What file types and sizes are accepted](#) for how to shrink or convert a file.

Getting help and contact

If you get stuck and can't find the answer here, the Foundation's bursary team is happy to help. Use the **contact details in your invitation email** (or in your outcome letter, if you've reached that stage). When you write, it helps to include the **child's name** and your **application reference** if you have one.

Where the portal offers in-page help text under a field, read that first — it often answers the question on the spot. For anything the portal can't resolve (re-sending an invitation, updating your email address, deletion requests), the bursary team is the right place to go.

Once you submit, the Foundation's bursary team takes over the assessment. If you'd like to understand how applications are reviewed behind the scenes, the staff-facing companion to this guide is the [Admin & Assessor Guide](#), and the Foundation can also provide a separate "How we assess bursaries" summary on request.

Index of detailed walkthroughs

The full click-by-click guides, grouped as in their [index](#):

Getting started

1. [Accept your invitation and set up your account](#)
2. [If your invitation link expired or doesn't work](#)
3. [Reset a forgotten password](#)
4. [Log in on your phone](#)

Filling in the application

1. [Tour of the dashboard](#)
2. [Section 1 — Details of Child](#)
3. [Section 2 — Family Identification](#)
4. [Section 3 — Parent / Guardian Details](#)
5. [Section 4 — Dependent Children](#)
6. [Section 5 — Dependent Elderly](#)
7. [Section 6 — Other Information](#)
8. [Section 7 — Parents' Income](#)
9. [Section 8 — Assets & Liabilities](#)
10. [Section 9 — Additional Information](#)
11. [Section 10 — Declaration](#)

Uploading documents

1. [Upload a document](#)
2. [Upload three months of bank statements \(multi-file slot\)](#)
3. [Replace a document](#)
4. [What file types and sizes are accepted](#)
5. [Upload from your phone's camera](#)

Before you submit

1. [The pre-submission review page](#)

2. Submit your application

After submission

1. Check the status of your application
2. Respond to a "missing documents" request
3. Read your outcome

Year two and beyond — re-assessment

1. Accept a re-assessment invitation
2. Complete a re-assessment
3. What changes year-on-year

Account and privacy

1. Request your data be deleted

This guide is a contractual deliverable under MSA Schedule 1 §4 (applicant User guide). Screenshots show the portal as at the current release and will be refreshed as the interface evolves. If anything here doesn't match what you see on screen, the bursary team will help — and would be glad to know, so the guide can be kept accurate.

Part II — Admin & Assessor User Guide

Admin & Assessor Guide

The operational guide for John Whitgift Foundation staff — assessing bursary applications and running the system that supports them.

This document is the **MSA Schedule 1 §4 deliverable** (administrator and assessor guide for Customer staff). It is written for Foundation staff who are competent computer users but not developers. The companion document for parents and guardians is the [Applicant User Guide](#).

What this system is

The John Whitgift Foundation Bursary Assessment System is the purpose-built replacement for the Foundation's previous grant-tracker tooling. It manages the full lifecycle of a means-tested bursary — from inviting a family to apply, through assessing their financial circumstances against the four-stage calculation model, to producing a recommendation the schools (Trinity and Whitgift) use to decide on a bursary-supported place. It also handles the **annual re-assessment** of every active bursary.

You will use it in one of two capacities — often both at once.

- **As an Assessor**, you own the *applicant journey*: you open the queue, read a submission, verify documents, run the calculation, write the recommendation, and complete the assessment with an outcome. You can also invite families for ad-hoc bursaries and link siblings.
- **As an Admin**, you own the *system itself*: rounds, reference data (school fees, family-type costs, council tax, reason codes, email templates), staff accounts, GDPR deletions and the audit log.

One person may hold both roles. Where a step in this guide requires Admin rights, it is clearly marked **(Admin only)**. As a rule of thumb: assessors **cannot** edit reference data, invite staff, delete records, or open and close rounds — those are Admin actions.

How to use this guide

This guide is the **operational reference**. It explains *what* each part of the system does, *why* it works the way it does, and the correct order to do things in. For every task it also points to a **click-by-click walkthrough** — a short, screenshot-led guide that takes a single workflow from start to finish.

Two reading paths:

- **New to the system?** Read [Quick Start](#), then [Signing in, roles & security](#) and [Orientation](#). That is enough to find your feet. Reach for the rest as you need it.
- **Looking something up?** Use the [table of contents](#) and the [Appendix](#) — the appendix holds the glossary, the role-permission matrix, the status reference, the calculation cheat-sheet, and the full index of walkthroughs.

Throughout, links like [Triage the queue](#) take you to the detailed walkthrough for that task.

*The signed-in admin console home — the left sidebar and the round dashboard status tiles, with the **Open round** button top-right.*

Table of contents

1. Quick Start

2. [Signing in, roles & security](#)
 3. [Orientation](#)
 4. [Inviting applicants](#)
 5. [Reviewing a submission](#)
 6. [Running the assessment — the four-stage calculation engine](#)
 7. [Writing the recommendation](#)
 8. [Sibling linking](#)
 9. [Re-assessment \(year 2 and beyond\)](#)
 10. [Hand-off to schools: PDF & exports](#)
 11. [Reports & dashboards](#)
 12. [Admin: round lifecycle](#)
 13. [Admin: reference data](#)
 14. [Admin: privacy, compliance & audit](#)
 15. [Troubleshooting](#)
 16. [Frequently asked questions](#)
 17. [Appendix](#)
-

Quick Start

Two fast-paths to get you productive. Each step links to the detailed walkthrough.

A. Assess your first application end-to-end (Assessor)

1. Open the queue at **Applications** ([/queue](#)) and find a *Submitted* application — [Triage the queue](#).
2. Click the row to open the four-tab detail view — [Open an application](#).
3. On the **Applicant Data** tab, read the submission and verify each uploaded document — [Read the submitted application](#), [Verify uploaded documents](#).
4. Click **Begin Review**, then **Begin Assessment** to open the split-screen workspace — [Set up the assessment workspace](#).
5. Enter **Stage 1 — Income** from the source documents — [Enter Stage 1 — Income](#).
6. Enter **Stage 2 — Assets** — [Enter Stage 2 — Assets](#).
7. Confirm **Stage 3 — Living costs** (auto-populated from family type) — [Stage 3 — Living costs](#).
8. Read **Stage 4 — Bursary impact** in the live calculation sidebar — [Stage 4 — Bursary impact](#).

9. Click **Complete** to lock the assessment — [Save the assessment](#).
10. On the **Recommendation** tab, write the synopsis, set the categories and narrative, then click **Save Recommendation** — [Build the family synopsis](#), [Write the recommendation narrative](#).
11. Click **Qualifies** or **Does Not Qualify** to set the outcome — this emails the applicant — [Complete the assessment](#).
12. Hand off to the school: download the PDF, or export the round's recommendation list — [Generate a PDF](#), [Export recommendation list](#).

B. Set up a new application round (Admin only)

1. Create the round with its academic year and dates — it starts in **DRAFT** — [Create a new round](#).
2. Open the round when you are ready for applicants (only one round may be open at a time) — [Open a round](#).
3. Invite the families:
 - First-time applicants — single invite (Admin) or the assessor's **Internal Request** flow — [Invite one applicant](#), [Invite for an internal / ad-hoc bursary](#).
 - Existing bursary holders — selective re-assessment invitations from the queue: filter to **Re-assessment eligible**, select the holders, and use the **Send re-assessment invite** bulk action — [Selective re-assessment invitations](#).

Once a family accepts and submits, the application appears in the queue and the assessor takes over with fast-path A.

Signing in, roles & security

Signing in

Open the application URL and sign in with your work email and password. Staff accounts are created by invitation only (see [Invite a staff member](#)); there is no self sign-up for staff.

The staff login page.

Multi-factor authentication (MFA) — live and enforced

Staff sign-in is protected by **multi-factor authentication using a TOTP authenticator app** (for example Google Authenticator, Microsoft Authenticator, or 1Password). MFA is **live and enforced in production** for all staff roles (ADMIN, ASSESSOR, VIEWER). Applicants are never asked for MFA.

- **First sign-in (enrolment).** After entering your password you are taken to the MFA setup screen. Scan the on-screen QR code with your authenticator app (or type the secret manually), then enter the six-digit code to confirm. Your session is now elevated and you reach the admin area.
- **Every later sign-in (challenge).** After your password you are asked for the current six-digit code from your app.

You only need to enrol once per device. Keep your authenticator app safe — if you lose your device, an admin must reset your factor before you can sign in again (see below).

The enforcement is environment-aware: production has MFA on by default; the test/staging environment normally has it off so the team can test other features without an authenticator. You will always be challenged in production.

Screenshot: the MFA enrolment screen with QR code and six-digit code field.

The three roles

Role	Who it's for	What they can do
ADMIN	System owners / senior bursary staff	Everything an assessor can do, plus rounds, reference data, staff invitations, GDPR deletion, audit review, MFA resets.
ASSESSOR	Day-to-day case workers / contracted assessors	Full case-work: queue, applications, document verification, assessments, recommendations, sibling linking, internal/ad-hoc invitations, exports, reports.
VIEWER	Read-only stakeholders	View applications, exports and reports. Cannot start or change an assessment, invite, or delete.

A full capability breakdown is in the [role-permission matrix](#) in the appendix.

Resetting a staff member's MFA (Admin only)

When a colleague loses their authenticator device they are locked out until their MFA factor is cleared. An admin can reset it; the staff member then re-enrols a fresh factor on their next sign-in.

The reset control lives on the **Users** page (`/users`) as an admin-only action that clears the staff member's factor and writes a `RESET_STAFF_MFA` entry to the audit log. If an admin is *also* locked out, the factor can be cleared at database level by an engineer — this is the escalation path, not a routine action. See [Reset another staff member's MFA](#) and, for the operational detail, the runbook under `docs/operations/`.

There are no self-service backup codes today. Recovery is always admin-assisted. If you are the only admin, make sure a second admin exists so you are never the single point of failure.

Orientation

The admin console layout

After signing in you land in the admin console. A **left sidebar** groups the main areas. The **Assessment Rounds** group holds three entries:

- **Applications** (`/queue`) — the queue of everything you can assess.

- **All Rounds** (/rounds) — the season ledger of every round (see [Admin: round lifecycle](#)).
- **Current Round** (/rounds/current) — a shortcut that jumps straight to the active (OPEN) round's **round dashboard**.

Other groups hold **Invitations, Exports, Reports, Audit, Settings** and **Users**. Some entries (All Rounds / Current Round, Settings, Users, Audit) are Admin-facing; assessors and viewers see the case-work entries. A live **dashboard** at /admin shows status tiles across all rounds, and carries a primary **Open round** button that takes you straight to the active round's dashboard.

The sidebar with the **Assessment Rounds** group — Applications · All Rounds · Current Round. (The dashboard's **Open round** button is shown in the console-home image above.)

The application queue

Applications opens the queue at `/queue` — "Review and assess submitted bursary applications." It is a sortable, filterable table of every application you can see.

(Assessors see applications assigned to them; admins and viewers see everything.)

Filter with the bar at the top:

- **Round** — *All rounds*, or one academic year.
- **School** — *All schools*, *Whitgift*, or *Trinity*.
- **Status** — a multi-select popover (*Pre-Submission*, *Submitted*, *Not Started*, *Paused*, *Completed*, *Qualifies*, *Does Not Qualify*); the badge shows how many are applied, **Clear filters** wipes them.
- **Re-assessment eligible** (*Admin*) — surfaces active bursary holders who have **not yet been invited** to the open round. Use it to pick exactly who to re-invite (see [Re-assessment \(year 2 and beyond\)](#)).
- **Search reference...** — free-text on the reference (and on names when revealed).

Sort by clicking any column header (**Reference**, **School**, **Submitted**, **Status**, **Entry Year**). The bottom line reads `Showing N of M applications`. See [Triage the queue](#).

Drilling in from the round dashboard

When you click a pipeline tile or a **Needs Attention** row on the [round dashboard](#), the queue opens **pre-filtered** — by round, status, missing-docs, and so on. A "**Showing: ... · Clear filters**" banner names the active filter so you always know which slice you are looking at; **Clear filters** returns you to the full queue.

Multi-select and bulk actions (Admin only)

Each row carries a checkbox, and a **select-all** checkbox sits in the header. Selecting one or more applications reveals a **bulk-action toolbar** with two Admin actions:

- **Assign assessor** — assign the selected applications to an assessor in one step (the toolbar also offers **Unassign**).
- **Send re-assessment invite** — invite the selected active bursary holders to the open round (see [Re-assessment \(year 2 and beyond\)](#)).

Assessors and viewers do not see the bulk-action toolbar.

Applications
Review and assess submitted bursary applications.

The queue with row checkboxes ticked and the bulk-action toolbar — **Assign assessor** and **Send re-assessment invite**.

The four-tab application detail view

Click a row (or **Open**) to land on `/applications/[id]`. The header card shows the reference (e.g. JW-2026-0042), the school badge, the round and entry year, the current status badge, and — for re-assessments — an orange **Re-assessment** pill. Beneath it, two cards separate the everyday from the occasional:

- A prominent **Actions** card surfaces the next step for the current status (e.g. **Begin Review**, **Resume Review**, **Set Qualifies / Set Does Not Qualify**).
- A quieter, consolidated **Manage** card holds the rare actions — **Add second parent** and **Delete Applicant Data (GDPR)**.

The tab strip moves you between:

Tab	What it holds
Applicant Data	The read-only submission, the document checklist, and sibling links.
Assessment	The split-screen calculation workspace.
Recommendation	The school-facing recommendation (meaningful once the assessment is completed).
History	The audit timeline for this application.

See [Open an application](#).

The application header card (reference, school badge, round and status) and the four-tab strip, with the consolidated **Manage** card beneath.

Name masking and "Show names" — a recurring principle

This system practises **data minimisation**. Personal identifiers are hidden by default: the queue shows reference numbers, not names; the assessment workspace labels parents "**Parent 1**" and "**Parent 2**" and shows the bursary reference rather than the family name; reports use aggregates.

When you genuinely need to see names — for example to cross-check a document or to communicate with a family — toggle **Show names** (top-right of the queue filter bar). An amber pill "*Names visible — audit logged*" appears, and the reveal is written to the audit log against your name with the action **REVEAL**.

This is by design: revealing a name is a deliberate, accountable act, not the default state. Only reveal names when you need them, and expect every reveal to be reviewable by an admin in the **audit log**.

Applications
Review and assess submitted bursary applications.

The queue with names hidden — only reference numbers are shown. Toggling **Show names** (top-right of the filter bar) reveals the names and surfaces an amber "Names visible — audit logged" pill, writing a **REVEAL** entry to the audit log.

Inviting applicants

A family cannot self-register. An invitation creates an account stub and emails the recipient a one-time, tokenised registration link. When they accept it they complete the application themselves — see the [Applicant User Guide](#) for what they experience.

Single new-bursary invitation

The dedicated **Invitations** page (/invitations) holds the **Send New Invitation** form (email, optional names, child name, school, round) and the **Invitation History** table. This page currently requires **Admin** rights.

If you are an **assessor** and need to invite a single first-time applicant as part of intake, either ask an admin to send it from this page, or use the **Internal Request** flow below (open to assessors, and it sends the same applicant invitation email). See [Invite one applicant for a new bursary](#).

Internal / ad-hoc bursary invitation (Assessor or Admin)

For pastoral referrals, emergency cases, or off-round intake, use **Internal Request** on the queue page:

1. On `/queue`, click **Internal Request** (top-right, plus icon).
2. In **Create Internal Bursary Request**, fill in parent email, parent name, child name, school, the academic round, the **entry year**, and an optional reason (max 500 characters).
3. Click **Create Request**. The dialog confirms with the generated application reference; the parent receives the standard invitation email and registers themselves.

Use this flow when the standard Y6 → Y7 / Y9 / Y12 mapping is not the right fit — here the entry year is freely editable. You never enter the family's financial data on their behalf. See [Invite for an internal / ad-hoc bursary](#).

Re-assessment invitations — selective, from the queue (Admin only)

At the start of a new round you re-invite existing bursary holders, but you choose **who** rather than inviting everyone at once. Go to **Applications** (`/queue`), turn on the **Re-assessment eligible** filter (active holders not yet invited to the open round), **select** the specific holders with the row checkboxes or **select-all**, and click **Send re-assessment invite** in the bulk-action toolbar. A confirmation shows the **number selected** and the target **(open) round**; any ineligible selections are skipped, and you get an **invited / skipped / failed** summary. See the full walkthrough in [Re-assessment \(year 2 and beyond\)](#) and [Selective re-assessment invitations](#).

Re-sending or revoking an invitation (Admin only)

From the **Invitation History** table on `/invitations`, the row actions on any **PENDING** invitation let you:

- **Resend** — regenerate the token, reset the 30-day expiry, and send a fresh email (the old link stops working).
- **Revoke** — mark the invitation **EXPIRED** so the link can no longer be used.

Accepted invitations cannot be resent or revoked — the recipient already has an account. See [Re-send or revoke an invitation](#).

Separated / divorced parents: inviting a second parent (Admin or Assessor)

The Foundation assesses on **both** parents' income regardless of marital status. When parents are separated, they generally can't share a login or supply each other's documents — so one parent completes the application as the **primary**, and you invite the **second parent** to provide *their own* financials through a private, restricted portal.

To add a second parent: open the **application detail** and use **Add second parent** — enter their email and name. Both **admins and assessors** can do this, **at any time**: at first intake, after the primary submits, or mid-assessment. There is **exactly one** second parent per application. If the email already belongs to someone in the system (for example, they're a lead applicant for another child), the invitation **links that existing account** rather than creating a duplicate.

What the second parent sees: a trimmed `/contribute` portal with only *their own* parent details, income, and assets/liabilities, plus document uploads. They see the **child's name** for context and **nothing else** — not the child's full application, nor the primary's income, contacts, or documents. The card on the application detail shows their status (**Invited / In progress / Submitted**).

Privacy is enforced both ways — the primary cannot see the second parent's data or documents either. Only staff (assessor/admin/viewer) see both. The final **outcome email goes to the primary parent only**.

Re-assessment: when you create a re-assessment for a child who had a second parent last year, the **Add second parent** card prompts you to **re-invite** them (pre-filled) or **skip** — the second parent is invited fresh for the new round; nothing is carried over silently.

Reviewing a submission

Every assessment begins on the **Applicant Data** tab. Read the submission, then verify the documents — but remember the golden rule of the **two-layer model**: **nothing the applicant typed is used in the calculation**. You will rebuild the financial picture yourself from the source documents in the next stage.

The Applicant Data tab

This tab is **strictly read-only**. It renders all ten sections the applicant completed — Child Details, Family Identity, Parent Details, Dependent Children, Dependent Elderly, Other Information, Parents' Income, Assets & Liabilities, Additional Information, and Declaration — each with a green **Complete** or amber **Incomplete** chip. Currency renders as £-formatted figures; unset fields show *"Not provided"*.

There is no "edit" button: to correct a value, either the applicant resubmits, or you record the correct, evidence-based figure in the assessment workspace where it takes precedence. Use the document cards to flip into the PDFs while you read. See [Read the submitted application](#).

Separated families: two parents, one assessment

When a **second parent** has been added, the Applicant Data tab shows **both parents' submitted financial sections and documents side by side**, labelled **Parent 1 (primary applicant)** and **Parent 2 (second parent)**. The child-level sections (Child Details, Dependents, etc.) belong to the primary and appear once. Documents are grouped by who uploaded them, so it's always clear whose payslip you're verifying.

The completeness gate. A case with a second parent can't be assessed until the **primary has submitted and the second parent has submitted**. Until then, **Begin assessment** is blocked with a note showing the second parent's status, and the queue shows a **2nd-parent indicator** (Submitted / Awaiting / Override). This is the only change to *when* you can start; single-parent cases are unchanged (primary submission is enough).

If the second parent doesn't respond. Use **Proceed without second parent** on the application. You must give a **reason** (recorded and audit-logged); the case then unblocks and is assessed on the primary's information alone (a single earner). Use this when the second parent is uncontactable or declines to take part — it's the deliberate, evidenced escape hatch, not the default.

When both parents are in, you key the **primary's verified figures as Parent 1 and the second parent's as Parent 2** in Stage 1 — the two incomes combine, but the living costs are the child's single (primary) household, exactly as the **four-stage engine** already works for a two-earner household.

Verifying documents

In the **Documents (n)** card, each row shows the **slot name** (e.g. `PARENT_1_P60`, `BANK_STATEMENT_3M`) and the uploaded filename. For each:

1. Click **View** to open the file inline (PDF / JPEG / PNG) via a short-lived secure link — no download needed.
2. Confirm two things: the content genuinely belongs to that slot (Parent 1's P60 really is Parent 1's P60, not Parent 2's payslip — the *document round-trip integrity check*), and the file is legible and complete.
3. Tick the row checkbox to mark it **verified** (the icon turns green; the toggle is audit-logged). Clicking again revokes verification.

If a slot holds the wrong file, do **not** verify it — request a re-upload or upload the correct file yourself. See [Verify uploaded documents](#).

Documents (5)		
☒	BIRTH_CERTIFICATE test-doc.pdf	View
☐	P60_PARENT_1 test-doc.pdf	View
☐	COUNCIL_TAX test-doc.pdf	View
☐	BANK_STATEMENT_PARENT_1 test-doc.pdf	View
☐	SELF_ASSESSMENT_PARENT_1 assessor-upload.pdf	View

The Documents card — a verified row (green tick) and unverified (grey) rows, each with a **View** button that opens the file inline.

Uploading a document on behalf of an applicant

For files that arrive by email or post, use the **Upload Document (Assessor)** card below the checklist: pick the slot, choose the file (PDF / JPEG / PNG, max 20 MB), and click **Upload Document**. The upload is attributed to you in the audit metadata, and the new row appears unverified for you to check. See [Upload a document on behalf of the applicant](#).

Requesting missing documents (pauses the assessment)

When documents are missing or wrong, ask the applicant for them. This is only available once you have clicked **Begin Review** (status `NOT_STARTED`):

1. In the Actions bar, click **Request Missing Documents**.
2. The dialog pre-checks every slot without a verified document and shows a status pill per row (green **Verified** / amber **Uploaded**). Fine-tune the selection.

3. Add an optional message (e.g. "*Please ensure the P60 is for the 2024/25 tax year.*") and click **Send Request**.

The application status moves to **Paused — awaiting documents**, the applicant is emailed the bulleted list, and the assessment is held until they respond. When new documents arrive, the assessment does **not** resume automatically — verify the new files, then click **Resume Review** to return to `NOT_STARTED`. See [Request missing documents](#).

Running the assessment — the four-stage calculation engine

This is the heart of your work as an assessor.

The two-layer model, and why it matters

The applicant's form is, above all, a **document-collection exercise**. Parents frequently confuse net and gross income, enter monthly figures where yearly is asked, or describe their employment inaccurately. So the system keeps two separate layers of data:

Layer	Who enters it	Used in the calculation?
Applicant layer	The parent, via the portal	No — it gathers evidence and gives you a cross-reference only.
Assessor layer	You, in the assessment workspace	Yes — the engine runs <i>exclusively</i> on these figures.

Your job is to read the correct **net** figures straight from the source documents (P60s, tax returns, bank statements, benefit letters, council tax bills) and enter them into the workspace. The calculator never touches what the applicant declared. This separation is the reason the assessor role exists, and it is what makes the Foundation's assessments defensible.

The engine produces one bottom-line figure — the **Required Bursary Level to Break Even** — through four stages, and from that derives the family's **payable fees**. The full formulae are in the [calculation reference](#) cheat-sheet; the authoritative narrative is in the project README.

Setting up the workspace

On the **Assessment** tab, click **Begin Assessment**. The system creates the assessment record (seeded with the school's annual fees, Croydon Band D council tax, and the category-1 family-type costs) and opens the **split-screen workspace**:

- **Left panel** — the document viewer. Pick any uploaded document from the list to read it while you type. This is what lets you read a figure off a P60 and enter it on the right without switching screens.
- **Right panel** — the assessment form, in five collapsible sections (A–E), with a sticky **calculation sidebar** that updates live.

Below the split-screen sits the **Assessment Checklist** with six qualitative note tabs (*Bursary, Living Conditions, Debt, Other Fees, Staff, Financial Profile*) for narrative observations. See [Set up the assessment workspace](#).

The screenshot displays the JWF Bursary System Assessment workspace. On the left is a dark blue sidebar with the 'john whitgift foundation' logo and an 'ADMIN' section. Below this are navigation links for Overview, Assessment Rounds, Applications, All Rounds, Current Round, Invitations, Reports, Exports, Audit Log, Configuration, Users, and Settings. The main area is titled 'Assessment' and shows a document viewer on the left with a file named 'test-doc.pdf'. The central part is the assessment form, currently showing Section A: Reference Data. This section includes input fields for Family Type Category (1. Sole), Annual School Fees (£ 24,000), Entry Year Group (e.g. 2), and Council Tax (annual) (£ 2,480). The right sidebar features a 'Live Calculation' table with a 'Credit risk flag raised' warning. The table shows Stage 1: Household Income (Total Household Net Income: £34,000.00), Stage 2: Net Assets Valuation (After housing, council tax & savings: £31,520.00), Stage 3: HNDI After Necessary Spend (After utilities and food costs: £31,520.00), and Stage 4: Required Bursary (Bursary required: £0.00). Below this is a 'Payable Fees' section showing Gross fees (£24,000.00), Net yearly fees (£24,000.00), and VAT (+£4,800.00). The final totals are Yearly Payable (£29,100.00) and Monthly Payable (£2,425.00). At the bottom, there is a 'No bursary award' button. The bottom of the screen shows the 'F. Qualitative Checklist' with tabs for Bursary, Living Conditions, Debt, Other Fees, Staff, and Financial Profile.

The split-screen assessment workspace — the document viewer on the left, the assessment form in the centre (Section A shown), and the live calculation sidebar on the right.

Stage 1 — Income

Section B. Income Entry has a **Parent 1** and a **Parent 2** tab. For each parent, set the **Employment Status**; the input fields change to match. There are seven statuses:

Employment status	Income inputs shown
PAYE (Employed)	Net Pay (annual)
Benefits only	Benefits only
Self-employed (Director)	Net Self-Employed Profit + Net Dividends
Self-employed (Sole Trader)	Net Self-Employed Profit
Old Age Pension	Pension Amount (annual)
Past Employment Pension	Pension Amount (annual)
Unemployed	(none)

Enter all figures from the source documents, not the declared totals. Then record benefits in two separate columns — this distinction matters:

- **Benefits Included (annual)** — benefits that *are* income to the household (e.g. DLA, ESA, PIP, Carer's Allowance paid to an unemployed parent). A detail box appears once non-zero (e.g. "DLA £4,500, PIP £2,100").
- **Benefits Excluded (annual)** — benefits paid for a **child's** specific needs. These are recorded for completeness but **not** added to income, because that money is spent on the child's care.

The per-parent total updates live, and the calculation sidebar's Stage 1 block shows each parent's net income, any additional property income, and the **Total Household Net Income**. Changing a status zeroes the fields that no longer apply — intentional, so a stale figure can't leak in. See [Enter Stage 1 — Income](#).

Stage 2 — Assets

Section C. Property & Savings captures the family's asset position:

- **Mortgage-free property** toggle — switch on only if the family fully owns their home. When on, the notional rent is *added back* to income (there is no housing cost to offset).
- **Additional Property Count** and **Additional Property Income (annual)** — rental income from any extra properties is added back.
- **Cash Savings** and **ISAs / PEPs / Shares** — the family's liquid pot.
- **School-Age Children Count** (minimum 1) — the **savings divisor**.

The calculator turns savings into an annualised, per-child contribution: $(\text{cash} + \text{investments}) \div \text{school-age children} \div \text{schooling years remaining}$. The sidebar's Stage 2 block shows cash savings, investments, derived savings, any notional-rent uplift, and the **Net Assets Yearly Valuation**. See [Enter Stage 2 — Assets](#).

Stage 3 — Living costs

Living costs are derived from **Section A. Reference Data**, which you complete once at the top of the form:

- **Family Type Category** (1–6) — picking a category auto-populates the read-only **Notional Rent**, **Utility Costs** and **Food Costs** chips from the family-type reference table.
- **Annual School Fees** — pre-VAT, defaulted from the school's reference figure; override only if the school has confirmed a different figure.
- **Entry Year** — on blur this recomputes **Schooling Years Remaining** ($13 - (\text{academic year} - \text{entry year} + 1)$, clamped 0–13).
- **Schooling Years Remaining** — editable if the auto-calc is wrong (e.g. a repeated year).
- **Council Tax (annual)** — defaults to Band D Croydon; override only if the family lives outside Croydon.

The sidebar's Stage 3 block sums notional rent, utilities, food, council tax and pre-VAT school fees into **Necessary Spending**, then shows **HNDI after Necessary Spending** (Household Net Disposable Income after Necessary Spending) — Stage 1 + Stage 2 minus necessary spending. These reference figures are **inherited at the moment the assessment starts**; if an admin changes the reference table mid-round, an in-progress assessment keeps its figures unless you re-select the family type. See [Stage 3 — Living costs](#).

Stage 4 — Bursary impact

Stage 4 is computed from Stages 1–3 plus the **Payable Fees** inputs in **Section D**:

- **Scholarship Percentage (%)** — any school scholarship, applied before the bursary (0 if none).
- **VAT Rate (%)** — defaults to 20.
- **Manual Adjustment** — see below.

The sidebar's Stage 4 block then shows, live:

Line	What it means
Required Bursary	$\max(0, \text{gross fees} - \text{HNDI after NS} - \text{absorbed sibling fees})$
Gross Fees	$\text{annual fees} \times (1 - \text{scholarship\%} / 100)$
Bursary Award	the bursary, capped at gross fees
Net Yearly Fees	$\text{gross fees} - \text{bursary award}$
VAT	applied to net yearly fees at the configured rate
Yearly Payable Fees	net + VAT, including any manual adjustment
Monthly Payable Fees	$\text{yearly} \div 12$

Cross-check these against the family's circumstances before saving. For sibling-linked applications a **Sibling payable fees absorbed** line appears — the older siblings' fees deducted before the bursary is worked out. See [Stage 4 — Bursary impact](#).

The calculation sidebar — all four stages and the bold **Yearly / Monthly Payable** fees lines, updating live as figures are entered.

Manual adjustment

A pound-value override on the calculated yearly payable fees, for edge cases (honouring a year-1 benchmark, a pastoral decision). In **Section D**, enter a value in **Manual Adjustment** — positive *increases* the family's fees, negative *reduces* them. As soon as the value is non-zero, a **Manual Adjustment Reason** box appears: always fill it in. The reason shows on the audit trail and on the recommendation PDF, and the adjusted figures are what get stored. See [Apply a manual adjustment](#).

Property category and red flags

- **Red flags** live in **Section E. Flags** on the assessment form: tick **Dishonesty flag** where there is evidence of misleading information, and **Credit risk flag** where there are concerns about financial stability or debt. Both surface as banners on the recommendation and as columns in the export.
- **Property category** (1–12) is set later, on the **Recommendation** tab. It reflects the family's primary-residence bracket and is used for *reporting*, not in the calculation. Choosing category 9 or above raises an amber **High Property Category** advisory (the Foundation's £750K qualifying line typically sits in this range).

See [Property category and red flags](#).

Saving

The form **auto-saves on every blur** (after a short debounce), and the status bar at the top exposes three buttons:

- **Save** — flush the form to the server now; the *Saved hh:mm:ss* indicator updates.
- **Pause** — save, then set the assessment to `PAUSED` (without emailing anyone).
- **Complete** — save, then set it to `COMPLETED`. This is disabled while **Annual School Fees** is still 0.

Completing locks the form to read-only, makes it the source for the **Recommendation** tab, and writes the latest payable fees onto the bursary account. Re-opening the page re-hydrates every figure exactly. See [Save the assessment](#).

Once an assessment is `COMPLETED`, the workspace is read-only with no in-app "unlock". If figures must change, an admin re-opens the assessment, or you handle it in the next round's re-assessment.

Writing the recommendation

The **Recommendation** tab is what the schools ultimately see. It only becomes editable once the assessment is `COMPLETED`. Crucially, the school sees **categories**, **not precise figures** — this protects family privacy while still informing the admissions decision.

The Assessment Fee Summary (read-only)

At the top, the **Assessment Fee Summary** card carries the **Bursary Award, Yearly Payable Fees** and **Monthly Payable Fees** straight from the completed assessment. These are **read-only here** — to change them, the assessment itself must change. Sibling absorption is already baked in by this point. See [Record bursary award and payable fees](#).

Family synopsis

A short, neutral, school-facing narrative: family structure, employment/income context, and any salient circumstances (e.g. a sibling already at school, a recent bereavement). Compose 1–3 factual sentences in the **Family Synopsis** box. See [Build the family synopsis](#).

Accommodation status, income category, property category

These are the three school-facing classifications:

- **Accommodation Status** — free text (e.g. *Rented, Mortgaged, Owned outright*).
- **Income Category** — a **band**, not a precise figure (e.g. *Low / Medium / High*, or a banded range your team agrees).
- **Property Category** (1–12) — the residence bracket; categories 9–12 raise the high-property advisory.

Accommodation and income are free text today, so agree a fixed vocabulary with your team and use it consistently — the export grouping relies on consistent spelling. See [Set accommodation, income, property](#).

Reason codes

Reason codes are the standardised explanations for *year-on-year* change. They are **required on re-assessments** and optional on new bursaries. In the **Reason Codes** card, tick all that apply; they are grouped (1–9 Income, 10–19 Property & Assets, 20–29 Family Circumstances, 30–39 Risk Flags, plus *Other*). The codes are admin-managed and configurable — see [Select reason codes](#) and the [reason codes appendix](#).

The recommendation narrative

The **Recommendation Summary** is the fuller, panel-facing write-up. A useful structure: summary of circumstances; justification for the bursary level; anything unusual (manual adjustments, red flags, sibling considerations); and a one-line recommendation. Keep it professional — assume a family could read it under a

subject-access request. The summary is not in the spreadsheet export, so if a school needs the full narrative, send the PDF. See [Write the recommendation narrative](#).

Click **Save Recommendation** to persist the synopsis, categories, reason codes and narrative together.

Completing the assessment (setting the outcome)

Finally, set the outcome. In the **Set Application Outcome** card (or via the Actions bar) click **Qualifies** or **Does Not Qualify**, then confirm in the dialog. This:

- transitions the application to its **terminal** status (`QUALIFIES` / `DOES_NOT_QUALIFY`);
- sends the corresponding outcome email to the lead applicant;
- locks the recommendation to read-only.

This action cannot be undone in the app — a wrong outcome requires admin intervention via the audit trail. See [Complete the assessment](#).

The **Set Application Outcome** card with the **Qualifies** / **Does Not Qualify** buttons, and the confirmation dialog that fires the outcome email once confirmed.

Sibling linking

Applications are **per child**, but a family's finances are assessed as one unit. When a family has more than one child applying or holding a bursary, link the siblings so the calculator absorbs fees sequentially: the **older** sibling's yearly payable fees are deducted from the family's HNDI **before** the younger sibling's bursary is worked out. The younger child therefore typically qualifies for a near-full or full bursary. The same logic applies even across the two schools.

- **Link siblings** — on the **Applicant Data** tab, in the **Link a Sibling** card, search by child name, reference, or lead applicant email, then click **Link as Sibling**. A family group is created or joined. See [Link siblings](#).
- **Re-order priority (succession)** — the **Linked Siblings** card shows each child with a priority badge (1, 2, ...). Use the up/down arrows to change the order; priority 1 is the primary holder whose fees are absorbed first. When the eldest leaves school, promote the next sibling so their assessment recalculates correctly. See [Re-order sibling priority](#).
- **Break a link** — click **Unlink** on a row and confirm. Both children's *future* calculations stop absorbing each other's fees. Historical, already- saved assessments are **not** retroactively recalculated — re-open and re-save one if it now looks wrong. See [Break a sibling link](#).

The underlying business rules are in PRD [06 — Sibling linking](#).

Sibling Links

Linked Siblings (2 accounts)

Child 1's payable fees are deducted from Child 2's HNDI when calculating their bursary. Drag the order using the arrows to reflect the correct assessment sequence.

1

2

Child Applicant **THIS CHILD**

Whitgift > BA-202627-0001 > £29,100 / yr

↑ ↓ ↺

Link a Sibling

Search for another bursary account to link as a sibling. Siblings are assessed sequentially — the older child's payable fees are deducted from the family HNDI before calculating the younger child's bursary.

Q

Search by child name, reference, or email...

The **Linked Siblings** card — each child with a priority badge (1, 2, ...), up/down reorder arrows, and an **Unlink** action.

60

Re-assessment (year 2 and beyond)

Bursaries are not permanent — every active bursary is re-assessed annually. A re-assessment is a fresh application for the same bursary account, with ID documents skipped (checked only in year 1) and address / child details carried forward.

- **Inviting holders (Admin, selective)** — re-assessment is no longer an all-or-nothing batch. Instead, **pick** who to re-invite from the queue: open **Applications** (`/queue`), turn on the **Re-assessment eligible** filter (active holders not yet invited to the open round), tick the holders you want (per-row checkboxes or **select-all**), and use the **Send re-assessment invite** bulk action. The confirmation shows the **number selected** and the **target (open) round**; ineligible selections are skipped, and you get an **invited / skipped / failed** summary so you know exactly what went out. There is **no round-detail "batch invite" button** — selection always happens in the queue. See [Selective re-assessment invitations](#).
- **Opening a re-assessment** — re-assessment applications carry the orange **Re-assessment** pill in the queue and header. Once a holder accepts and submits, the case reaches you in the queue like any other. On the **Assessment** tab, before the workspace, two extra panels appear: the **First year benchmark** banner and the **Year-on-Year Comparison** table (previous year's figures against this year, with trend arrows). See [Open a re-assessment](#).
- **The year-1 benchmark** — the first year's payable fees are stored on the bursary account as a reference **floor**. If this year's calculated payable fees fall below it, the benchmark banner turns amber and shows the shortfall. The benchmark is **advisory** — the system never silently floors the result. You decide: honour it by entering a positive manual adjustment equal to the shortfall (recording the reason), or allow the lower figure and justify it in the narrative and reason codes. See [Compare against the year-1 benchmark](#).
- **Reason codes are mandatory** on a re-assessment — you must explain what changed year-on-year (or confirm nothing changed). Read the Year-on-Year Comparison first, then tick the codes that match the movement. See [Pick reason codes \(re-assessment\)](#).

The re-assessment rules are described in the README and PRD [05 — Assessment engine](#).

Screenshot: the re-assessment Assessment tab with the First year benchmark banner (amber, below-benchmark state) and the Year-on-Year Comparison table.

Hand-off to schools: PDF & exports

Schools have **no access** to this system; everything goes to them externally. There are two hand-off formats.

Per-application PDF

On the **Recommendation** tab, click **Download PDF** (top-right). The file (`recommendation-<reference>.pdf`) contains the reference, school, round and entry year, the family synopsis, the accommodation/income/property categories, the bursary award and payable fees, any red flags, the reason codes, and the full recommendation summary narrative. Save the recommendation before downloading so the figures are current. Use this for a single case. See [Generate a PDF](#).

Recommendation list export (CSV / XLSX)

For a whole round, use **Exports** (`/exports`). Choose the **Assessment Round** (required), an optional **School Filter**, and the **File Format** (XLSX default or CSV), then **Download**. **Admins, assessors and viewers** can all run this export. Each export is **recorded**, so the [round dashboard](#)'s per-school **Export readiness** reflects what has already been pulled (decided counts and the last-exported date). Only applications with a *completed recommendation* are included — one row each. Columns are:

Group	Columns
Identity	reference, school, round, entry year
Recommendation	family synopsis, accommodation status, income category, property category
Money	bursary award (£), yearly payable fees (£), monthly payable fees (£)
Flags	dishonesty (Y/N), credit risk (Y/N)
Year-on-year	reason codes (comma-separated <code>code. label</code>)
Result	outcome (Qualifies / Does Not Qualify / Pending)

GDPR note: the export does **not** include the applicant's full name or email. The family synopsis, however, may contain identifying detail — redact before sending externally if your team's policy requires it. The recommendation *summary* is not in the spreadsheet; send the PDF if the school needs it. See [Export recommendation list](#).

Reports & dashboards

The **Reports** page (`/reports`) shows aggregate statistics per round. Pick a round in the top-right round selector; the URL updates with the round id. A live status-tile dashboard also exists at `/admin`, and its primary **Open round** button jumps straight to the active round's **round dashboard** — the day-to-day operational home for a live round, where the per-round pipeline, watchlist and export readiness live (reports remain the cross-round, trustee-facing analytics).

The report sections available today (seven, picked from the tab strip):

Report	What it shows	Walkthrough
Award Distribution	Recommended bursary award percentages in bands; higher - award bands highlighted	Bursary awards
School Comparison	Per - school totals, average award %, average monthly payable fees (the practical <i>round summary</i> view today)	Round summary
Income Bands	Histogram of calculated household net income	Income distribution
Property Categories	Count per property category (1–12); the £750K line sits around 8–9	Property category distribution
Reason Codes	Reason codes ranked by use across the round	Reason code frequency
Final - Year Bursaries	ACTIVE accounts whose holders are in Y12/Y13 (0–1 years remaining), with latest yearly payable fees and sibling count — for succession planning. Not round - scoped.	Active bursaries approaching final year
Sibling Summary	Families with two or more linked accounts, with combined children count, combined yearly payable fees, and combined award. Not round - scoped.	Sibling bursary summary

The reporting requirements are in PRD [09 — Reporting and export](#).

The one report named in the spec that has **no dedicated** `/reports` **section** is a standalone *Round Summary* (total applications by status/outcome/school for a single round). For now the **School Comparison** card plus the queue status filters and the `/admin` status tiles give you the same totals. Tracked in [docs/backlog/round-summary-report-section.md](#).

Reports

Aggregate statistics for each assessment round.

Assessment round: **2026/27**

Award Distribution / School Comparison / Income Bands / Property Categories / Reason Codes / Final-Year Bursaries / Sibling Summary

Award Distribution

Distribution of recommended bursary award percentages across all applications with a recommendation.

School Comparison

Side-by-side comparison of Trinity and Whitgift applications for this round.

WHITGIFT

Total applications
4

Avg bursary award
0%

Avg monthly payable fees
£1,213

Income Bands

Distribution of household net income across assessed applications.

Property Categories

Distribution of applicants by property ownership category.

Reason Code Frequency

Most-used reason codes across all recommendations in this round, ranked by frequency.

No reason codes recorded for this round.

Active bursaries approaching final year

Active bursary holders entering their final school years (Y12 / Y13), to plan succession in the sibling priority order. Spans all rounds — not filtered by the selected round.

No active bursaries are in their final school years (Y12 / Y13).

The Reports page — the round selector and section tabs, with the **Award Distribution** and **Property Categories** charts among the sections.

Admin: round lifecycle

(Admin only.) A **round** is one academic year's assessment cycle. It moves through three states.

State	Meaning	Applicants can register?
DRAFT	Created but not yet live	No
OPEN	Live; the active round	Yes
CLOSED	Past its window	No (but in-flight applications can still be assessed)

1. **Create** — **All Rounds** (/rounds) → **Create Round**. Set the **Academic Year** (e.g. 2026/27), **Open Date**, **Close Date** (after open), and optional **Decision Date** (after close). The round starts in **DRAFT**. See [Create a new round](#).
2. **Open** — in the DRAFT round's Actions, click **Open Round** and confirm. **Only one round can be OPEN at a time** — the system blocks opening a second. Applicants can now register against it. See [Open a round](#).
3. **Close** — in the OPEN round's Actions, click **Close Round** and confirm. No new applications can be submitted, but existing ones remain fully assessable. See [Close a round](#).
4. **Historical rounds** — every prior round stays visible for reporting and re-assessment comparison; closed rounds open their round dashboard read-only (see below). See [View historical rounds](#).

The round-management requirements are in PRD [04 — Admin round management](#).

The Season Ledger (/rounds)

All Rounds is a **season ledger**, not a flat table. It leads with a prominent **hero card for the OPEN round** — a lifecycle strip plus the headline pipeline and outcome numbers, and an **Open round** button into the round dashboard. Beneath it, any **DRAFT** rounds appear as prompts to open them, and **CLOSED** rounds form a compact, reverse-chronological list you can click into for their (read-only) dashboard and reports.

The Season Ledger — the **OPEN** round hero card (lifecycle strip, pipeline and outcome numbers) above the compact, reverse-chronological list of **CLOSED** rounds. A **DRAFT** round, when one exists, appears here as a prompt to open it.

The round dashboard

Clicking a round (or **Current Round** / **Open round**) opens the **round dashboard** at `/rounds/[id]` — a rich, single-screen view of where the round stands. It replaces the old summary-card-and-school-table page with:

- **Lifecycle stage strip** — Setup → Invitations Sent → Submissions Open → Assessment → Decision → Export → Closed. Each node reads **not-started**, **in-progress**, **complete** or **needs-attention**, so you can see at a glance which phase the round is in.
- **Needs Attention watchlist** — see [the next subsection](#).
- **Pipeline tiles** — **Invited** / **Submitted** / **In Assessment** / **Decided**. Click any tile to open the queue **pre-filtered** to that slice (shown via the "Showing: ... · Clear filters" banner).
- **Time & Progress** — day **N** of **M**, **days to close**, and the **decisions/day** rate required to clear the remaining backlog by the close date.
- **Outcomes** — the **qualify / does-not-qualify** split, with a year-on-year delta against the prior round (e.g. "▲ +12pp vs 2025/26").

- **Export readiness (per school)** — decided counts, the **last-exported** date, and a per-school **Export** button (recorded, so this stays current — see [Recommendation list export](#)).
- **Activity feed** — recent events on the round.

For a **CLOSED** round the dashboard renders **read-only**: a *"Round closed"* banner appears, and the actions become **View report / Export archive**.

The round dashboard — the lifecycle stage strip across the top, the **Needs Attention** watchlist, the pipeline tiles, and the per-school **Export readiness** panel.

The Needs Attention watchlist

The watchlist is a **ranked** list of the things in this round that need a human. Each row links straight to the relevant **pre-filtered** queue or record. It surfaces:

- **Aged invitations** still unaccepted after **14 days**.

- **Re-assessment invites expiring** in under **48 hours**.
- **Submitted applications missing required documents**.
- **Assessments paused** for more than **7 days**.
- **Assessments stalled** — no activity for more than **5 days**.
- **Recommendations awaiting an outcome** for more than **3 days**.
- **A school with decided recommendations not yet exported**.
- **Close date approaching** with more than **10 undecided** applications.

Work the watchlist top-down and the round stays healthy; an empty watchlist means nothing is overdue.

Admin: reference data

(Admin only.) The calculation depends on lookup tables you maintain under **Settings** (/settings), across five tabs. One rule governs all of them:

The effective-date rule. Changes apply to **new** assessments only. Any assessment already finalised keeps the values that were in force when it was calculated. Nothing is ever deleted — the previous record is retained for historical fidelity and the new one supersedes it going forward.

Tab	What you maintain	Notes	Walkthrough
Family Types	The six categories' notional rent , utility and food costs	Drives Stages 2 & 3	Edit family type categories
School Fees	Annual fee per school (Trinity, Whitgift), pre-VAT	The system applies 20% VAT automatically — never add it by hand	Edit school fees
Council Tax	The Band D Croydon default figure	Label is fixed; only the figure changes (updated annually)	Edit the council tax default
Reason Codes	The ~35 year-on-year codes (label, sort order, deprecation)	Deprecated codes hide from new assessments but stay on historical records; don't change a code key once used	Manage reason codes
Email Templates	Subject & body for the seven transactional emails	Merge fields are documented inline; keep <code>{{registration_link}}</code> in invitation templates	Edit email templates

For the seeded values (notional rents, utility/food costs, council tax bands, school fees, property categories) see the README reference tables and the source `assessment-model.xlsx`. The seven email templates are listed in the [email template reference](#).

Settings
Manage reference data used in bursary assessments.

Family Types School Fees Council Tax Reason Codes Email Templates

Family Type Configurations
Notional rent, utility costs, and food costs per family category. Saving creates a new versioned record effective today.

Family Type	Notional Rent	Utility Costs	Food Costs	Actions
1. Sole parent, 1 child	£13,000.00	£1,200.00	£5,000.00	Edit
2. Parents, 1 child	£15,000.00	£1,500.00	£7,500.00	Edit
3. Parents, 2 children	£18,000.00	£2,000.00	£8,500.00	Edit
4. Parents, 3 children	£20,000.00	£2,500.00	£9,500.00	Edit
5. Parents, 4 children	£23,000.00	£3,000.00	£10,500.00	Edit
6. Parents, 5+ children	£26,000.00	£3,300.00	£12,000.00	Edit

Changes are versioned. The most recent entry per category is used in new assessments.

The Settings page with the five reference-data tabs — Family Types, School Fees, Council Tax, Reason Codes, Email Templates.

Admin: privacy, compliance & audit

(Admin only.) The Foundation's GDPR obligations are baked into the system.

GDPR deletion

When a data subject exercises their right to erasure, delete from the application's detail page: **Actions** → **Delete Applicant Data (GDPR)** → confirm in the two-step **Permanently Delete Applicant Data?** dialog by clicking the red **I understand, delete** button. This:

- deletes the application sections and uploaded documents (Storage objects removed), the assessment, and the recommendation;
- anonymises the applicant's profile (name and email cleared, role set to `DELETED`) and removes the auth user;

- writes a `GDPR_DELETION` audit entry **with no personal data in the entry itself** — so the fact of deletion is logged without retaining what was deleted.

Separated families. If the application has a **second parent**, the same deletion also erases their contribution — their sections, their uploaded documents, and their link to this application. The second parent's **profile and login are erased too, unless that person is still lawfully linked elsewhere** (for example, they are the lead applicant for another child, or a second parent on another application). In that case their account is **retained** and only their data on *this* application is removed — so erasing one child's record never destroys an unrelated, still-active account. The audit entry records which path was taken (erased vs retained).

A **7-year retention guard** blocks deletion of applications inside the retention window that are tied to an active or recently-closed bursary; if the button is disabled with a retention message, record the refusal in your GDPR response to the applicant. Keep your own written evidence of the request — the system records the deletion, not the request. See [Delete an applicant under GDPR](#) and [PRD 10 — GDPR and data](#).

The first step of the two-step GDPR deletion dialog — what is permanently deleted, anonymised and retained, with **Proceed to Confirmation** leading to the final red **I understand, delete** step.

Audit log review

The **Audit** page (/audit) is the system-wide, **append-only, immutable** activity log. Filter by **Entity type** (Application / Document / Assessment / Invitation), **Action** (substring match, e.g. REVEAL , GDPR , STATUS), and a **From / To** date range. Each row shows the action, a coloured status dot, the acting user, the entity, a relative and full timestamp, and an expandable metadata payload.

Typical reviews:

- **Name reveals** — filter Action = REVEAL to confirm only authorised staff revealed names.
- **GDPR** — filter Action = GDPR for deletion entries.
- **Document handling** — Entity type = Document.
- **Status changes** — Action = STATUS to trace an application's lifecycle.

Logged events include status changes, document uploads/verifications, name reveals, invitations, assessment completions, outcomes, GDPR deletions and staff MFA resets. See [Audit log review](#).

Audit Log
System-wide activity log. All entries are immutable and append-only.

Entity type: All entity types | Action: e.g. SUBMITTED | From: dd/mm/yyyy | To: dd/mm/yyyy | Filter

Troubleshooting / "If something goes wrong"

Symptom	Likely cause	What to do
Can't open a second round ("Another round is already open")	Only one round may be OPEN at a time	Close the currently - open round first, then open the new one — Close a round .
The queue is empty (assessor)	You only see applications assigned to you	Check your filters, or ask an admin to assign applications to you.
Invitation email didn't arrive	Delivery issue, or wrong address	Check the Invitation History row status, Resend the invitation, and confirm the email address; persistent delivery failures are an operational issue — see docs/operations/ .
"A valid email address is required" / "An application round is required"	Form validation	Correct the email field / select a round before sending.
Locked out of MFA (lost authenticator)	No factor to challenge against	An admin resets your factor on <code>/users</code> ; you re-enrol on next sign-in — Reset MFA . If <i>all</i> admins are locked out, escalate to engineering per docs/operations/ .
"Complete" button is disabled	Annual School Fees is still 0	Enter the school's annual fee in Section A.
Calculation looks wrong	A figure entered against the wrong parent/slot, or stale reference data	Re-check your Stage 1–3 inputs against the source documents; re-select the family type to re-pull current reference figures; compare against the calculation reference .
A sibling's figures look stale after unlinking	Historical assessments aren't retroactively recalculated	Re-open and re-save the affected assessment to refresh its snapshot — Save the assessment .
PDF download returns 404 / 403	Recommendation not saved yet / session lost rights / record deleted	Click Save Recommendation first; if 403, re-sign-in; if the record was GDPR-deleted it's gone.
Export has fewer rows than expected	Only completed - recommendation applications are exported	Confirm those applications have a saved recommendation; check the round/school filter.
Can't reach an application (redirect to <code>/admin</code> or 404)	Not assigned to you / GDPR-deleted	Ask an admin to assign it; a 404 means it was deleted or never existed.
A wrong outcome was sent	Terminal status has no in-app undo	Identify the change in the audit log and ask an admin to handle the correction via the escalation path in docs/operations/ .

For anything operational or engineering — deployments, environment variables, backups, incidents, the hypercare window — use the **operations runbook** under [docs/operations/](#), not this guide.

Frequently asked questions

Why don't we just use the figures the applicant typed in? Because the calculation runs on *evidence*, not declarations. Applicants frequently confuse net/gross or monthly/yearly, and a few misrepresent their situation. You derive verified net figures from the source documents. See [the two-layer model](#).

Why are names hidden by default? Data minimisation. You don't need a name to assess finances, so the system shows references and "Parent 1 / Parent 2". When you do need a name, **Show names** reveals it and logs the reveal against you.

An assessor needs to invite a single first-time family — can they? The dedicated Invitations page is Admin-only, but an assessor can use the **Internal Request** flow on the queue, which sends the same invitation email. Otherwise ask an admin.

What's the difference between a scholarship and a bursary? A scholarship is a **percentage** fee reduction awarded by the school (merit-based), applied first. A bursary is a means-tested **£ amount** from the Foundation, applied after. Both can apply at once.

What is the year-1 benchmark and does it cap the result automatically? It is the first year's payable fees, kept as a reference floor. It is **advisory only** — the engine never silently floors a re-assessment. If you want to honour it, enter a manual adjustment for the shortfall and record the reason.

Can I edit the bursary award on the Recommendation tab? No. The award and payable fees there are read-only and come from the completed assessment. Change them on the assessment (which an admin may need to re-open).

Are reason codes mandatory? On re-assessments, yes — you must explain the year-on-year change (or confirm "no change"). On new bursaries they are optional.

How does sibling linking change the numbers? The older sibling's payable fees are deducted from the family's HNDI before the younger sibling's bursary is calculated, so younger siblings usually qualify for a near-full or full bursary. It works across both schools.

I changed a school fee in Settings — why didn't an existing assessment update?

By design. Reference-data changes apply to **new** assessments only; finalised assessments keep the values in force at the time. Re-selecting the family type in an in-progress assessment re-pulls current values.

Do I add VAT myself? No. School fees are stored pre-VAT and the calculator adds 20% (or the configured rate) automatically after scholarship and bursary deductions.

A family lives outside Croydon — what about council tax? The model uses Band D Croydon by default regardless of where they live; override the council-tax figure in Section A only when genuinely needed.

Can I undo a Qualifies / Does Not Qualify outcome? Not in the app — it is terminal and triggers the applicant email. Trace it in the audit log and ask an admin to handle the correction.

Where do new reason codes come from? An admin adds or edits them under Settings → Reason Codes. If a code you need doesn't exist, ask an admin rather than improvising in free text — the export grouping relies on codes.

What happens to data when someone leaves / requests deletion? Data is retained for 7 years (legal requirement), then deleted. A right-to-erasure request is actioned by an admin via the GDPR deletion flow, subject to the 7-year retention guard.

Who actually decides whether a child gets a bursary place? The Foundation assesses and *recommends*; the school's Headmaster decides, weighing the recommendation, the entrance exam, and the funds available. There is no committee step inside this system.

Where do I get help if something is broken? See [Getting help / support](#) in the appendix.

Appendix

Glossary

Term	Meaning
Two-layer model	The separation between applicant-declared data (evidence only, not calculated) and assessor-entered data (the verified figures the engine uses).
Name masking	Hiding personal identifiers by default; names are revealed only when needed, and reveals are audit-logged.
Round	One academic year's assessment cycle, with open/close/decision dates. Moves DRAFT → OPEN → CLOSED.
Notional rent	An imputed annual housing cost (by family-type category) deducted from income; added back if the home is mortgage-free.
Savings divisor	Total savings ÷ school-age children ÷ schooling years remaining, giving the annualised per-child derived savings .
HNDI after NS	Household Net Disposable Income after Necessary Spending — income + assets minus necessary spending; the figure compared to school fees.
Necessary Spending	The sum of notional rent, utilities, food, council tax and pre-VAT school fees used in Stage 3.
Required Bursary	Stage 4 output: $\max(0, \text{gross fees} - \text{HNDI after NS} - \text{absorbed sibling fees})$.
Scholarship	A percentage fee reduction awarded by the school, applied before the bursary.
Bursary award	The means-tested £ reduction from the Foundation, capped at gross fees.
Payable fees	What the family actually pays: net fees + VAT, after scholarship and bursary, including any manual adjustment. Yearly and monthly.
Benchmark	The first year's payable fees, kept as an advisory floor for re-assessments.
Manual adjustment	A £ override on yearly payable fees (positive increases, negative reduces); requires a reason.
Property category	A 1–12 classification of the family's property position, used for reporting (not in the calculation).
Reason code	A configurable code (~35) explaining year-on-year change; required on re-assessments.
Red flag	Dishonesty or credit-risk tag set on the assessment, surfaced to the school.
Sibling linking	Manually linking a family's children so older siblings' fees are absorbed before younger siblings' bursaries are calculated.
Reference	The application's identifier (e.g. JW-2026-0042); active bursaries use a school prefix WS- (Whitgift) / TS- (Trinity).
Entry year	The year group the child enters (Y6/Y7/Y9/Y12), which sets schooling years remaining.
Internal / ad-hoc bursary	A bursary requested off-cycle for pastoral/emergency reasons, with a freely editable entry year.

Application & assessment status reference

Application status (shown as the status badge and in queue filters):

Status	Meaning
Pre-Submission	Invited and registered; the applicant is still filling in the form.
Submitted	The applicant has submitted; awaiting an assessor to begin review.
Not Started	Review begun (you clicked Begin Review); assessment not yet completed.
Paused	Held awaiting documents from the applicant (after Request Missing Documents).
Completed	The assessment is finished; the recommendation can be written and an outcome set.
Qualifies	Terminal: the family qualifies for a bursary; outcome email sent.
Does Not Qualify	Terminal: the family does not qualify; outcome email sent.

Assessment status (the workspace status chip):

Status	Meaning
In Progress	The assessment is open and being worked on (auto-saving).
Paused	Saved and paused.
Completed	Locked read-only; feeds the recommendation and the bursary account's latest payable fees.

Invitation status (Invitation History):

Status	Meaning
PENDING	Sent, not yet accepted (can be resent or revoked).
ACCEPTED	The recipient has registered (cannot be resent/revoked).
EXPIRED	Lapsed or revoked; the link no longer works.

Calculation reference

A compact cheat-sheet of the four-stage engine. The authoritative narrative and the seeded reference tables are in the project README; the source model is `assessment-model.xlsx`. All figures are **annual** and use **assessor-entered, evidence-based** values.

Stage 1 — Total Household Net Income

```

Parent 1 net income (by employment status)
+ Parent 2 net income (by employment status)
+ Included benefits (income to the household; excluded benefits are recorded but NOT
  added)
+ Additional property income (from Stage 2)
= TOTAL HOUSEHOLD NET INCOME

```

Stage 2 — Net Assets Yearly Valuation

```

Start from Total Household Net Income
- Notional rent (by family-type category)
+ Notional rent added back (only if the home is mortgage-free)
+ Additional property income (if more than one property owned)
+ Derived savings = (cash savings + ISAs/PEPs/shares) ÷ school-age children ÷
schooling years remaining
= NET ASSETS YEARLY VALUATION

```

Stage 3 — HNDI after Necessary Spending

```

Necessary Spending = notional rent + utilities + food + council tax (Band D Croydon)
+ pre-VAT school fees
HNDI after NS = Net Assets Yearly Valuation - Necessary Spending

```

Stage 4 — Bursary impact & payable fees

```

Gross Fees      = annual fees × (1 - scholarship% / 100)
Required Bursary = max(0, Gross Fees - HNDI after NS - absorbed sibling payable fees)
Bursary Award    = Required Bursary, capped at Gross Fees
Net Yearly Fees  = Gross Fees - Bursary Award
+ VAT (20% default) on Net Yearly Fees
± Manual Adjustment
= Yearly Payable Fees      (÷ 12 = Monthly Payable Fees)

```

Schooling years remaining (by entry year): Year 6 = 8, Year 7 = 7, Year 9 = 5, Year 12 = 2 (internal/ad-hoc requests can enter at any year).

Soft income guidelines (not enforced): full bursary around ~£27K household income; no bursary assumed around ~£90K. The model decides regardless.

Qualifying criterion: the family should own one property valued under £750K; property portfolios above this may be disqualified. The £750K line sits around property categories 8–9.

Email template reference

Seven transactional templates are configurable under Settings → Email Templates ([Edit email templates](#)). Each has an editable subject and body with documented merge fields (e.g. `{{applicant_name}}`, `{{child_name}}`, `{{school}}`, `{{round_year}}`, `{{deadline}}`, `{{registration_link}}`).

Template	Fires when
Invitation	An admin (or internal request) invites a first-time applicant.
Submission confirmation	The applicant submits their application.
Missing documents	An assessor sends a Request Missing Documents email (status → Paused).
Outcome — Qualifies	The outcome is set to Qualifies.
Outcome — Does Not Qualify	The outcome is set to Does Not Qualify.
Re-assessment invitation	A re-assessment invitation is sent for a new round (selected holders, from the queue).
Reminder	A reminder is sent for an outstanding action.

Always keep `{{registration_link}}` in the invitation and re-assessment templates — removing it breaks the registration flow.

Reason codes

The system ships with roughly **35 configurable year-on-year reason codes**, grouped by theme (1–9 Income, 10–19 Property & Assets, 20–29 Family Circumstances, 30–39 Risk Flags, plus *Other*). They explain why a bursary award or payable fees changed (or did not) at re-assessment, and are reported to schools.

Codes are **admin-managed** under Settings → Reason Codes — you can add new codes, edit labels and sort order, and deprecate codes (deprecated codes hide from new assessments but remain on historical records). Because the list is configurable, treat the README's table as the seeded starting point rather than a fixed list; the live set is whatever appears in the picker. See [Manage reason codes](#) and, for selection, [Select reason codes](#).

Getting help / support

For problems this guide and the walkthroughs don't solve:

1. **Operational / engineering issues** (the app is down, emails won't send, deployment, environment, backups, an incident, the post-go-live hypercare window) — follow the **operations runbook** under `docs/operations/`: [deployment](#), [environment variables](#), [backup & restore](#), [incident response](#), and [hypercare](#).
2. **Support tickets & SLAs** — raise issues through the contracted support channel (Zoho Desk) per **MSA Schedule 3 (support model)** and **Schedule 6 (SLAs)**. Your admin holds the support contact details and the agreed response/resolution targets.

Index of detailed walkthroughs

The click-by-click walkthroughs are the screenshot-led companion to this guide.

Assessor walkthroughs — [walkthroughs/assessors/](#)

Daily queue work

- 01 — Triage the queue
- 02 — Open an application

Inviting applicants (single)

- 03 — Invite one applicant for a new bursary
- 04 — Invite for an internal / ad-hoc bursary

Tab 1 — Reviewing the submission

- 05 — Read the submitted application
- 06 — Verify uploaded documents
- 07 — Upload a document on behalf of the applicant
- 08 — Request missing documents

Tab 2 — Running the assessment

- 09 — Set up the assessment workspace
- 10 — Enter Stage 1 — Income
- 11 — Enter Stage 2 — Assets
- 12 — Stage 3 — Living costs
- 13 — Stage 4 — Bursary impact
- 14 — Apply a manual adjustment
- 15 — Property category and red flags
- 16 — Save the assessment

Tab 3 — Writing the recommendation

- 17 — Build the family synopsis
- 18 — Set accommodation, income, property
- 19 — Record bursary award and payable fees
- 20 — Select reason codes
- 21 — Write the recommendation narrative
- 22 — Complete the assessment

Sibling linking

- 23 — Link siblings
- 24 — Re-order sibling priority

- 25 — Break a sibling link

Re-assessment (year 2+)

- 26 — Open a re-assessment
- 27 — Compare against the year-1 benchmark
- 28 — Pick reason codes (re-assessment)

Hand-off to the school

- 29 — Generate a PDF for one application
- 30 — Export recommendation list

Reports

- 31 — Round summary
- 32 — Bursary awards
- 33 — Income distribution
- 34 — Property category distribution
- 35 — Reason code frequency
- 36 — Active bursaries approaching final year
- 37 — Sibling bursary summary

Admin walkthroughs — [walkthroughs/admins/](#)

Round lifecycle

- 01 — Create a new assessment round
- 02 — Open a round
- 03 — Close a round
- 04 — View historical rounds

Reference data management

- 05 — Edit family type categories
- 06 — Edit school fees
- 07 — Edit the council tax default
- 08 — Manage reason codes
- 09 — Edit email templates

Staff and applicant invitations

- 10 — Invite a staff member
- 11 — Selective re-assessment invitations

Privacy and compliance

- 12 — Delete an applicant under GDPR
- 13 — Audit log review (system-wide)

Operations

- 14 — Reset another staff member's MFA
- 15 — Re-send or revoke an invitation

For the parent/guardian side of every hand-off in this guide — accepting an invitation, completing the form, uploading documents, checking an outcome — see the companion [Applicant User Guide](#).

Part III — Task Walkthroughs

Walkthrough Guides

Step-by-step task guides organised by the person doing the work. Each persona has its own folder; each guide inside a folder walks one discrete workflow from start to finish, written in plain language with screenshots and "what to do if it goes wrong" notes.

These guides are deliverables for MSA Schedule 1 §4 (user guide, admin/assessor guide). They are **not** the technical/operational runbook — that lives separately under `docs/` and is intended for engineers, not end users.

The three personas

Admin

Foundation staff with full system rights. Sets up rounds, invites applicants and other staff, configures reference data (school fees, family-type weightings, council-tax defaults, email templates, reason codes), reviews recommendations, deletes records under GDPR, and is the on-call account for resetting an assessor's MFA or fixing a stuck invitation.

In short: anyone who owns the **system itself**, not just an individual application.

→ Guides live in `admins/`.

Assessor

Foundation staff (or contracted assessors) who handle bursary applications day-to-day. They open the assessment queue, read an applicant's submitted form, check the supporting documents, run the calculation engine across Stages 1–4, write a recommendation with reason codes, and either approve, decline, or send the application back to the applicant for missing information.

Assessors **cannot** invite new applicants, change reference data, or delete records — those are admin actions.

→ Guides live in `assessors/`.

Applicant

A parent or guardian applying for a bursary on behalf of a child. They arrive via an emailed invitation link, set a password, complete the 10-section application form across multiple sessions, upload the required documents (birth certificate, passports, payslips, bank statements, etc.), sign the declaration, and submit. After submission they can check status and, in subsequent years, complete a lighter re-assessment.

Applicants only see their own data. They never see the assessment calculation or recommendation.

→ Guides live in `applicants/`.

House style

Each guide should:

- Open with a one-line **goal** ("By the end of this guide you will have...") and a **prerequisites** list.
- Number every step. Each step has a single action verb at the start.
- Include a screenshot for every screen the user lands on. Crop to the relevant area; annotate with arrows or numbered callouts when the step requires picking one button out of several.
- End with a **What if it goes wrong?** section listing the common failure modes for that workflow and what to do about each.
- Cross-link to other guides where a workflow hands off to another persona (e.g. admin's "Send an invitation" → applicant's "Accept your invitation").

Keep paragraphs short. Bullet lists where possible. Avoid jargon — the applicant guides especially should read like a friendly letter, not a technical manual.

Applicant Walkthroughs

Applicant Walkthroughs

You are a parent or guardian applying for a bursary on behalf of your child at Trinity School or Whitgift School. The Foundation invites you to apply — you cannot sign yourself up. Once you've accepted your invitation, you complete the application form over several sessions (saving as you go), upload the supporting documents the Foundation needs to verify your family's circumstances, and submit. After submission you can check the status of your application and, in subsequent years, complete a shorter re-assessment.

These guides are written for **you**, not the Foundation's staff. The language stays plain, every step has a screenshot, and every guide ends with what to do if something doesn't behave as expected.

If you get stuck at any point and can't find the answer here, the Foundation's bursary team is happy to help — see the contact details in your invitation email.

Workflows

Each item below will become its own guide (`<slug>.md`) in this folder.

Getting started

- **Accept your invitation and set up your account** — open the link in the invitation email, confirm your email address is correct, set a password, and log in for the first time.
- **What to do if your invitation link expired or doesn't work** — expired links can be re-sent by the Foundation. This guide covers what error message to expect and who to email.
- **Reset a forgotten password** — request a reset link by email and set a new password.
- **Log in on your phone** — the portal works on iOS and Android. A short tour of what each tab looks like on a small screen.

Filling in the application

The form has **ten sections**. You can complete them in any order and save progress as you go.

- **Tour of the dashboard** — what each part of the home screen means: progress indicator, deadline, "Continue Application" button, application status, deadline countdown.
- **Section 1 — Details of Child** — school, year-group, child name, date of birth, place of birth, current school, upload the birth certificate.
- **Section 2 — Family Identification** — passports and right-to-remain documents for each family member. (This section is **not** shown for re-assessments — you only complete it in year one.)
- **Section 3 — Parent / Guardian Details** — contact details and employment status for each parent. Sole-parent? Tick the box and the second parent's section disappears.
- **Section 4 — Dependent Children** — a table; add a row per dependent child, including age and whether they are also being named on this application.
- **Section 5 — Dependent Elderly** — separate tables for elderly relatives at home and in care, if any.
- **Section 6 — Other Information** — court orders / maintenance payments, insurance policies, outstanding school fees from prior years. Only the items that apply to your family.
- **Section 7 — Parents' Income** — the gross income table. Different rows appear depending on each parent's employment status.
- **Section 8 — Assets & Liabilities** — property ownership, savings, shares, mortgages, other debts. Also where you upload three months of bank statements.
- **Section 9 — Additional Information** — special circumstances (recent divorce, redundancy, illness, etc.) and a free-text narrative if there's anything else the Foundation should know.
- **Section 10 — Declaration** — read the legal declaration, tick the box, type your name, and submit.

Uploading documents

- **Upload a document** — choose a file from your computer or phone, see the upload progress, confirm it appears in the named slot.

- **Upload three months of bank statements (or any multi-file slot)** — add each statement as a separate file in the same slot. You can remove an individual file if you uploaded the wrong one.
- **Replace a document** — upload a corrected version into the same slot; the previous version is replaced. (Works only before submission. After submission the application is read-only.)
- **What file types and sizes are accepted** — PDF, JPEG, PNG; up to 20 MB per file. What to do if your file is rejected.
- **Upload from your phone's camera** — take a photo of a paper document and upload it directly.

Before you submit

- **The pre-submission review page** — what every item on the review page means, how to fix incomplete sections, why the Submit button may still be disabled.
- **Submit your application** — tick the legal declaration, click Submit, confirm the submission, and check for the confirmation email.

After submission

- **Check the status of your application** — what each status label means (Submitted, Under Review, Outcome Available), where to look on your dashboard.
- **Respond to a "missing documents" request** — what the email looks like, where to upload the requested documents, what happens next.
- **Read your outcome** — qualifying outcomes, non-qualifying outcomes, what each means, what happens next, who to contact with questions.

Year two and beyond — re-assessment

- **Accept a re-assessment invitation** — at the start of each new academic year, the Foundation invites you to re-assess. The invitation looks similar but the form has fewer sections.
- **Complete a re-assessment** — your address, child details, and family member names are pre-filled from last year. The Family Identification section is skipped entirely. All financial sections (income, assets, liabilities) start blank — you re-enter them fresh for the new year and upload new supporting documents.
- **What changes year-on-year** — the Foundation uses last year's payable fees as a benchmark and explains the reasons for any change with reason codes in the recommendation.

Account and privacy

- **Request your data be deleted** — under UK GDPR you have the right to have your data deleted. The Foundation can do this on your behalf; this guide explains what data is removed, what is retained for audit, and how to make the request.

Cross-link

Once you've submitted, the Foundation's bursary team takes over. You will receive emails at the key milestones. If you'd like to know more about how your application is reviewed and assessed, the Foundation publishes a separate "How we assess bursaries" document — ask the bursary team if you'd like a copy.

01 — Accept your invitation and set up your account

You can't sign yourself up for a bursary — the Foundation sends you an invitation by email. This guide walks you through opening that link and setting up your account for the first time.

What you need

- The invitation email from the John Whitgift Foundation (subject line will mention "bursary" or "invitation").
- A password you can remember — it must be at least **12 characters**.

Steps

1. Open the invitation email and click the link inside it. It will take you to a page titled **Create your account**.
2. Your **Email** is shown at the top of the form and cannot be changed — it has to match the one the Foundation invited.
3. Check that your **First name** and **Last name** are correct. If the Foundation pre-filled them and a spelling is off, you can edit them here.
4. In **Choose a password**, type a password of at least 12 characters. Choose something unique — the system checks your password against a list of known-breached passwords and will reject anything common.
5. Type the same password again in **Confirm password**.
6. Click **Create account**.
7. You'll be signed in automatically and taken to your bursary dashboard, where you'll see a welcome message and a card inviting you to set up your application.

After you sign in

You'll see a card titled **Let's set up your application** asking you to confirm:

- The **school** your child has been offered a place at (Trinity School or Whitgift School), and
- Your **child's full name** as it appears on their birth certificate.

Confirm both and click the button to enter the form. From now on you can sign in any time at the portal login page using your email address and the password you just set.

If something goes wrong

- **"Invitation invalid"** — the link is expired or has already been used. See Invitation link expired.
- **"Passwords do not match"** — re-type both password boxes carefully.
- **Password rejected as too common or breached** — pick a longer, more unique password. A short phrase of three random words works well.
- **You don't see an invitation email at all** — check your spam folder. If still nothing, reply to the Foundation's bursary team using the contact details they previously gave you.

Next step

Tour of the dashboard — get oriented with the portal home screen before you start filling in the form.

02 — If your invitation link expired or doesn't work

Invitation links are time-limited. If yours stopped working before you got round to using it, the Foundation can send you a fresh one.

What you'll see

When you click an expired or already-used link, the page will read:

Invitation invalid

(followed by a short explanation, such as "this invitation has expired" or "this invitation has already been accepted")

There's a **Back to sign in** button at the bottom.

What to do

1. Don't panic — no data is lost. The invitation simply needs to be re-sent.
2. Email the John Whitgift Foundation's bursary team. The contact address is in the original invitation email. Quote:
 - The name of the child the invitation was for, and
 - The date the invitation was originally sent (if you remember).
3. The team will issue a new invitation. You'll receive a fresh email with a new link — use that one instead.

Common reasons a link fails

- **Expired.** Invitations have a limited lifetime. Once that window passes the link stops working.
- **Already used.** If you (or someone else with access to your inbox) already accepted the invitation, the link can only be used once. Go to the login page and sign in with the password you set the first time — or use Reset forgotten password if you don't remember it.
- **Email forwarded with broken formatting.** Long links can wrap awkwardly when forwarded. Open the original email instead of a forwarded copy.
- **Wrong email address.** The invitation is tied to one specific email address. If the Foundation has an old address for you, reply to them and ask for it to be updated.

Next step

Once you've got a fresh link: Accept invitation and set up account.

03 — Reset a forgotten password

If you've forgotten your password, you can request a reset link by email at any time.

Steps

1. Go to the portal login page.
2. Below the password box, click the **Forgot password?** link.
3. You'll land on a page titled **Reset your password**.
4. Type your email address (the same one the Foundation used to invite you) into the **Email address** field.
5. Click **Send reset link**.
6. You'll see a green tick and the message **Check your email**, confirming that — if an account exists for that address — a reset link has been sent.
7. Open the email from the Foundation, click the reset link, and choose a new password (at least 12 characters).
8. After the password is set you'll be returned to the login page to sign in.

If something goes wrong

- **No email arrives.** Wait a couple of minutes, then check your spam folder. The Foundation never tells you whether the email address you typed is actually registered — that's a privacy feature, not a bug. If you genuinely typed the right address and still get nothing, contact the bursary team directly.
- **"Too many requests" / a verification check** — for security the system limits how many reset requests can come from one place in a short time. If you've tried several times in a row you may be temporarily blocked or asked to confirm you're human. Wait a few minutes and try again.
- **The reset link itself is expired.** Reset links don't stay valid forever. Request another one by repeating the steps above.

Tip

Use a password manager (your phone or browser likely has one built in) — it removes the need to remember the password at all.

Related guides

- Accept invitation and set up account — first-time setup.
- Log in on your phone — signing in from a mobile device.

04 — Log in on your phone

The portal works on any modern phone (iOS Safari and Chrome, Android Chrome). You can complete the whole application from a phone if you prefer — handy for photographing paper documents on the spot.

Steps

1. Open the portal URL in your phone's browser (the same address you'd use on a laptop — the invitation email links to it).
2. The login page shows **Sign in to your account** with two fields: **Email address** and **Password**, and a **Sign in** button below.
3. Type your email and password, then tap **Sign in**.

What changes on a small screen

- The left-hand sidebar that holds the section list on desktop becomes a **menu icon** at the top of the screen. Tap it to reveal the list of application sections.
- A **bottom bar** appears at the foot of each section with **Back** on the left and **Save and Continue** on the right.
- Long forms scroll naturally; the bottom bar stays visible.
- File-upload buttons let you choose **Take a photo** or **Choose from library** — see Upload from phone camera.

Tips

- Tap **Forgot password?** below the password field if you can't remember it — see Reset forgotten password.
- Add the portal to your home screen for one-tap access: in Safari, tap the share icon then **Add to Home Screen**; in Chrome, use the three-dot menu → **Add to Home screen**.
- Your work is saved per section, so you can fill in a section on your phone, then carry on later from a laptop — your progress syncs automatically.

If something goes wrong

- **Page looks oddly zoomed or doesn't fit.** Pinch-to-zoom out, or rotate the phone to landscape.
- **Login won't accept your password.** Use Reset forgotten password.

- **Camera upload greyed out.** Make sure you've granted your browser permission to use the camera in your phone's settings.

05 — Tour of the dashboard

The dashboard is the first page you see when you sign in. It tells you at a glance where you are with your application.

What you'll see

At the top of the page:

- **Welcome back, (your first name)** — a friendly greeting.
- A subtitle reading e.g. **2026/27 Assessment Round — continue your bursary application below.**

Application status card

A white card with rounded corners showing:

- **Application status** label at the top.
- The round name (e.g. *2026/27 Assessment Round*).
- A coloured **status badge** — for a brand new application this will show **Draft**.
- A progress bar reading **Sections complete — X of 10**, with a gold-coloured bar showing how far through you are.

Quick actions

Two clickable cards underneath:

- **Continue Application** — picks up wherever you left off in the form. Tap this to enter section 1 (or whichever section you saved last).
- **View Status** — opens the more detailed status page that shows the full progress timeline. See Check application status.

Sidebar (desktop) / menu (mobile)

On the left of the page (or behind the menu icon on a phone) is a list of the ten sections of the form, each with an indicator:

- A **grey circle** — not started yet.
- A **gold bar** with a fraction — partially filled.
- A **green tick** — complete.
- An **amber warning** — saved but has one or more issues to fix.

You can click any section in the sidebar to jump straight to it — you don't have to fill them in in order.

What the dashboard looks like before you have an application

If you've accepted your invitation but haven't yet started the form, you'll see a card titled **Let's set up your application** asking you to confirm school and child's name. After that one-time confirmation, the dashboard switches to the status-and-progress view described above.

Related guides

- Section 1 details of child — start of the form.
- Pre submission review page — the final review screen.
- Check application status — the detailed status page.

06 — Section 1: Details of Child

This is the first section of the form. It captures the child the bursary application is for, and it includes one document upload — the **birth certificate**.

Before you start

Have to hand:

- The child's birth certificate (PDF or photo).
- The child's place of birth (country).
- The child's current school name and the date they started there.

Steps

The form is split into five sub-sections, separated by horizontal lines on the page.

School selection

1. **School you are applying for** (*required*) — choose **Trinity School** or **Whitgift School**.
2. **School year your child is applying to enter** (*required*) — Year 6, Year 7, Year 9, Year 12, or "Other" (contact the bursary team if Other).

Child information

1. **Child's full name** (*required*) — enter the child's full legal name exactly as it appears on the birth certificate.
2. **Gender** (*required*) — Male, Female, Prefer not to say, or Other.
3. **Date of birth** (*required*) — DD/MM/YYYY.
4. **Place of birth** (*required*) — search and pick the country.

Birth certificate

1. Upload the birth certificate into the **Birth Certificate** slot. It must show the child's name, date of birth, place of birth, and parents' names. See Upload a document for the mechanics. Accepted formats: PDF, JPG, PNG, up to 20 MB.

Child's current address

1. **Does the child live at the same address as Parent/Guardian 1?** (*required*) — Yes or No.

2. If **No**, fill in the child's address: Address line 1 (*required*), Address line 2, City / Town (*required*), Postcode (*required*), Country (*required*).

Current school

1. **School currently attended** (*required*) — the school the child is enrolled at right now.
2. **Start date at current school** (*required*).

Saving

When you reach the bottom of the page, click **Save and Continue**. The system validates the form first — if any required fields are missing, an error summary appears at the top and the offending fields are highlighted in red. Fix them, then click again. On success you'll be taken to section 2.

Tips

- Names on the birth certificate, in this section, and in section 3 (parents) should match — assessors compare them.
- You can leave this section partway through; come back later with **Continue Application** from the dashboard.

Next step

Section 2 family identification — passports / right-to-remain documents for each family member.

07 — Section 2: Family Identification

This section asks for ID documents (passport / right-to-remain) for **every family member** — that includes the child, both parents (or the sole parent), any other dependent children, and any dependent elderly relatives you'll list in later sections.

Re-assessments skip this section — you only complete it in year one.

Before you start

Gather an ID document for each person in the household:

- British citizens — a passport (or the page of your child's passport showing nationality).
- Non-British citizens — passport plus right-to-remain / visa / ILR (Indefinite Leave to Remain) document.

PDF or photo, each up to 20 MB.

Steps

1. At the top of the page you'll see a blue **Note** banner reminding you to include all dependent children and dependent elderly family members.
2. Click **Add family member**. A small dialog appears asking for the person's full name. Type it and confirm.
3. The person appears as a card on the page. Click the card to expand it and:
 - Confirm whether they are a **British citizen** (Yes / No).
 - Upload their passport (and, if not British, the right-to- remain document) using the upload slots inside the card.
4. Click **Add family member** again for each additional person. Repeat until everyone is covered.
5. To remove someone added by mistake, use the trash-can icon on their card.
6. Click **Save and Continue** at the bottom.

Tips

- The order doesn't matter — add people in whatever order is easiest. Assessors cross-check names against sections 1, 3, 4, and 5.
- You can return later to add a document if you don't have it on hand right now. The section will show **Needs attention** in the sidebar until every family member has a complete record.

See also

- Upload a document — upload mechanics.
- File types and sizes — accepted formats.
- Section 3 parent guardian details — next section.

o8 — Section 3: Parent / Guardian Details

This section captures the contact details, relationship status, and employment of each parent or guardian. If you are a sole parent, you can tick a box and the Parent 2 fields disappear.

Before you start

For each parent / guardian:

- Title, full name, date of birth, nationality.
- Home address and postcode.
- Phone number(s) and email.
- Employment status (employed, self-employed, benefits-only, pensioner, unemployed) and — if employed — employer name.

Steps

Sole parent

1. At the top of the section, answer **Are you a sole parent?**
 - **Yes** — the Parent 2 block is hidden. You only fill in Parent 1.
 - **No** — both Parent 1 and Parent 2 blocks are shown.

For each parent shown

1. **Title** — Mr / Mrs / Ms / Miss / Dr / Prof / Other.
2. **First name** and **Last name** (*required*).
3. **Relationship status** (*required*) — Single, Married, Widowed, Separated, Divorced, In a Civil Partnership, or Cohabiting.
4. **Date of birth** (*required*).
5. **Nationality** (*required*) — pick from the country list.
6. **Home address** — Address line 1, line 2, City/Town, Postcode, Country.
7. **Contact details** — phone (mobile and / or home) and email.
8. **Employment status** (*required*) — choose the option that best fits:
 - **Employed (PAYE)** — a tax-coded job.
 - **Receiving benefits only (not working).**
 - **Self-employed — company director.**
 - **Self-employed — sole trader.**

- **Receiving state / old-age pension.**
- **Receiving private or occupational pension.**
- **Unemployed.**

9. Depending on the status, further fields appear (e.g. employer name and occupation for PAYE; trading name for self-employed). Fill in only what's shown.

Save

1. Click **Save and Continue.**

Tips

- The employment status you pick here changes which income rows appear in Section 7 parents income — pick carefully.
- If both parents live at the same address, you can copy line by line. There's no "same as Parent 1" tickbox here yet.

Next step

Section 4 dependent children.

09 — Section 4: Dependent Children

List every dependent child in your household, including the child this application is for and any siblings. The Foundation uses this to understand the family's overall financial commitments and any bursaries / school fees already in play.

Steps

1. The section starts with a button: **Add dependent child**. Click it.
2. A dialog appears titled "Add dependent child" (or "Edit dependent child" when editing). Fill in:
 - **Child's name** — full legal name.
 - **School** — the school they attend (or "Not yet in school").
 - **Is this the child this application is for?** — tick this on the row for the child named in section 1. Leave it unticked for siblings.
 - **Any unearned income for this child?** — e.g. interest from accounts in their name. Enter a yearly figure, or 0.
 - **Receiving a bursary / fees paid by someone else?** — enter the yearly amount, or 0.
3. Click **Save** in the dialog. The row appears in the table on the page.
4. Repeat **Add dependent child** for each additional child.
5. To change a row, click the pencil icon. To delete a row, use the trash-can icon.
6. Click **Save and Continue** at the bottom of the section.

Tips

- Make sure the **named child** tickbox is set on exactly one row — the one whose name matches section 1.
- If a sibling already has a bursary at Trinity or Whitgift, declare the bursary amount here — it's used in the family-wide calculation.

Next step

Section 5 dependent elderly.

10 — Section 5: Dependent Elderly

Tell the Foundation about any elderly relatives you support — both those living with you at home and those whose care you pay for in a care home.

If you don't support any elderly relatives, this section takes about ten seconds: just answer "No" twice.

Steps

Elderly dependants at home

1. **Do you have any elderly dependant that you are providing for at home?**

(required) — Yes or No.

2. If **Yes**:

- **How many?** — type the count.
- For each one, a small block appears asking for their name, relationship to you, and approximate annual cost of support.

Elderly dependants in care

1. **Do you have any elderly dependant in care that you are contributing financially towards?** — Yes or No.

2. If **Yes**:

- **How many?** — type the count.
- For each, fill in the name, the care home name (if known), and the amount you contribute per year.

Save

1. Click **Save and Continue**.

Tips

- Estimate annual costs to the nearest £100. Assessors aren't looking for exact figures here — they want to see the scale of the commitment.
- If anyone in this section is also a member of the household whose ID you uploaded in section 2, that's normal — section 2 is about identity, this section is about financial support.

Next step

Section 6 other information.

11 — Section 6: Other Information

A short section that covers three optional topics — court orders for school fees, education-related insurance policies, and outstanding school fees from previous years.

If none apply to your family, this section is just three "No" answers.

Steps

Court orders

1. **Do you have a court order for the payment of school fees?** *(required)* — Yes or No.
2. If **Yes**:
 - **Amount per term** *(required)*.
 - **Amount per year** *(required)*.
 - You'll be asked to upload **Evidence of Court Order**.

Insurance policies

1. **Do you have any insurance policies for the payment of school fees?** — Yes or No.
2. If **Yes**, enter the policy details (provider, annual amount, maturity date) and upload the policy schedule when prompted.

Outstanding school fees

1. **Do you have any outstanding school fees from previous years?** — Yes or No.
2. If **Yes**, enter the amount owed and to which school.

Save

1. Click **Save and Continue**.

Tips

- Court-order amounts: enter the gross amount you receive (or pay). The assessor handles the in/out direction.
- Insurance "education plans" or savings plans earmarked for fees count — declare them.

Next step

Section 7 parents income.

12 — Section 7: Parents' Income

This section records each parent's **gross annual income** from every source. You'll see two columns (Parent 1 and Parent 2) — or just one if you ticked "sole parent" in section 3.

Have your most recent P60, self-assessment SA302, benefits letters and any other income statements to hand.

Income lines

For each parent, the form lists 14 rows. Enter a number in each (zero if not applicable):

- Salary / wages, state or private pension(s)
- Any supplement(s) and/or bonus
- Any other benefits and commission(s)
- Amount supplied by partner
- Working tax credits
- Gross interest received (on deposits)
- All dividend income (UK or overseas)
- Gross rent(s) received
- All income (bonds)
- Other gross income(s)
- Maintenance or equivalent(s)
- Bursaries / sponsorships
- Other income not included above
- Other income

A running **Total** for each parent appears underneath.

Required uploads

The system asks for documents depending on what you've entered:

- **P60** — always required for each parent (the most recent one).
- **Self-assessment (SA302)** — required if you entered any dividend income, gross rents, or bond income above zero.
- **Benefits evidence** — required if working tax credits or other benefits are above zero. Upload your award letter.

- **Capital repayments evidence** — required if you ticked the "capital repayments" question further down.

Each upload slot accepts PDF, JPG, or PNG, up to 20 MB. See Upload a document.

Steps

1. Working down each parent's column, type a number into every row. Use the gross (pre-tax) figure.
2. Upload each required document into its slot. The slot label tells you exactly which document goes there (e.g. "P60 — Parent 1").
3. Click **Save and Continue**.

Tips

- All figures are **annual gross** — multiply monthly amounts by 12 first.
- If a parent has no income, put zero in every row and explain in section 9 (additional information) if that's unusual.
- If you're not sure which row a payment fits — check the guidance text under the row, or contact the bursary team rather than guessing.

Next step

Section 8 assets liabilities.

13 — Section 8: Assets & Liabilities

Property, vehicles, savings, investments, debts — and crucially **three months of bank statements** for each parent.

Before you start

Gather:

- Your council tax bill (current year).
- Three months of bank statements for each parent's main current account.
- Any property valuations, mortgage statements, share / ISA statements, and details of any loans or hire-purchase agreements.

Sections within the form

Main residence

- Property type (owned, mortgaged, rented, other), estimated value, outstanding mortgage, monthly mortgage payment.

Other properties

- **Do you own any other properties?** — Yes or No. If Yes, a block appears for each property: address, value, mortgage outstanding, annual rent received.

Vehicles, savings, shares

- Approximate total values for vehicles, savings accounts, ISAs and shares, premium bonds, and other investments.

Loans and hire purchase

- **Do you have hire purchase or other loans?** — Yes or No. If Yes, list each: provider, outstanding balance, monthly payment.

Required uploads

- **Council tax bill** — always required. One slot.
- **Bank statements — Parent 1** — three months minimum, uploaded as separate files into the same slot. See Upload bank statements multi file.
- **Bank statements — Parent 2** — shown unless you ticked "sole parent" in section 3. Same three-months rule.

Steps

1. Work top-to-bottom through the form, answering each Yes / No question and filling in the conditional fields that appear.
2. Upload the council tax bill.
3. Upload three or more bank statement files into the Parent 1 slot, and (if applicable) the Parent 2 slot.
4. Click **Save and Continue**.

Tips

- Use rough valuations — Zoopla/Rightmove estimates are fine for property; round savings to the nearest £100.
- Bank statements: any three consecutive months from the last six. PDF straight from your bank's app is the cleanest format.
- If you have offset mortgages or unusual products, mention them in Section 9 additional information.

Next step

Section 9 additional information.

14 — Section 9: Additional Information

This is your chance to flag any special circumstances and to add anything the Foundation should know that didn't fit elsewhere.

Circumstances checklist

A list of six common situations. For each, answer Yes or No:

- **Divorced (if applicable)**
- **Separated (if applicable)**
- **Sick / unable to work**
- **Paying rent (current statement or lease)**
- **Been made redundant or lost employment**
- **Receiving benefits**

When you tick **Yes** on any row, an upload prompt appears for the relevant supporting document (decree absolute, sick note, lease, redundancy letter, benefits award letter, etc.).

Free-text narrative

Below the checklist is a large text box labelled **Additional information**. Use this for anything else:

- One-off events (an inheritance, a death in the family, a major business loss).
- Recent changes that won't show up in the historical figures yet.
- Anything that explains an unusual number in sections 7 or 8.

The limit is **3,000 characters** (about 500 words). A character counter appears under the box.

Steps

1. Tick **Yes** or **No** on each circumstance row.
2. For each **Yes**, upload the supporting document into the slot that appears.
3. Type any additional context in the narrative box.
4. Click **Save and Continue**.

Tips

- It's fine to leave the narrative blank. If your situation is straightforward, less is more.

- Keep the tone factual: dates, amounts, who, what. Assessors appreciate brevity.

Next step

Pre submission review page — the review screen. You'll land there next.

15 — Section 10: Declaration

The last step. Read the declaration, tick the box, type your name, and submit.

You can only reach the Declaration after the review page has cleared all issues — see Pre submission review page.

What's on the page

Declaration text

A numbered list of ten statements, including (paraphrased):

1. The information provided is accurate and complete to the best of your knowledge.
2. Income and assets are truthfully declared from all sources.
3. The Foundation and the school may verify the information.
4. False information will result in disqualification and full fees becoming payable.
5. Bursary awards are subject to annual re-assessment.
6. The Foundation's decision is final.
7. By accepting, you agree to the Bursary Contract terms.
8. Financial information is used solely for the bursary process.
9. You acknowledge data protection rights described in the Privacy Notice.
10. A separate Bursary Contract governs award terms.

Acceptance checkbox

A single tick-box reading **By clicking this box, I/we agree to the terms and conditions of the declaration set out above. I/we confirm that all information provided in this application is true and accurate to the best of my/our knowledge.**

Signature field

On behalf of the applicant (*required*) — type the full name of the person accepting the declaration. This is your typed signature. It must match a parent/guardian name listed in section 3.

Warning note

An amber box at the bottom reminding you that submitting is a legal commitment and that false information leads to disqualification.

Steps

1. Read every numbered point in the declaration.
2. Tick the **By clicking this box...** checkbox.
3. Type your full name into the **On behalf of the applicant** field.
4. Click **Submit Application** in the bottom bar.
5. A confirmation page appears — see Submit application.

Tips

- Only one parent needs to type their name — but by signing you confirm you're authorised to do so on behalf of the household.
- If you change your mind before clicking Submit, just navigate away — nothing is final until you submit.

Next step

Submit application — what happens after Submit.

16 — Upload a document

Every required document has its own upload **slot** with a clear label (e.g. "Birth Certificate", "P60 — Parent 1", "Council Tax Bill"). The slot lives next to the question that needs it.

What an empty slot looks like

A dashed box with a cloud icon, the slot label, a short hint (e.g. "PDF, JPG or PNG"), and a button reading **Choose file**. You can also **drag and drop** a file from your file manager straight onto the dashed box.

Steps

1. Click **Choose file** (or drag-and-drop your file onto the box).
2. Pick the file from your device.
3. A progress bar shows the upload running. For most files this takes a second or two.
4. The slot turns **green** with a tick, showing:
 - The filename you uploaded.
 - The file size (KB or MB).
 - **View** — opens the file in a new tab so you can confirm it's the right one.
 - **Remove** — deletes the upload from the slot.

Accepted formats

- PDF, JPG / JPEG, or PNG
- Up to **20 MB** per file

See File types and sizes for what to do if a file is rejected.

Replacing the file

To upload a corrected version, click **Remove** then upload the new file the same way. See Replace a document.

If the upload fails

The slot turns **red** with the message and a **Try again** button. Common causes:

- **File too large** — over 20 MB. Re-export or compress it.
- **Unsupported file type** — only PDF, JPG, PNG are accepted.

- **Network glitch** — click **Try again**.

Related guides

- Upload bank statements multi file — uploading multiple files into one slot.
- Upload from phone camera — photographing a paper document.

17 — Upload three months of bank statements (multi-file slot)

Some slots accept more than one file. The bank-statement slots in Section 8 assets liabilities are the main example — you'll upload three separate monthly statements into one slot per parent.

How a multi-file slot looks

A dashed drop-zone at the top (same as a normal slot) — but below it, a **list** of every file you've added so far. Each row in the list shows the filename, size, **View** link, and a **Remove** icon.

The drop-zone stays visible the whole time so you can keep adding more files.

Steps

1. Click **Choose file** (or drag-and-drop) on the dashed box.
2. Pick the **first** monthly statement.
3. Watch the progress bar. Once it finishes, the file appears as a new row in the list below the drop-zone.
4. Click **Choose file** again, pick the **second** statement.
5. Repeat for the **third** statement (and any more if you need to provide them).
6. Tip: you can select multiple files at once in the file picker and they'll all upload in parallel (up to five at a time).

How to remove a single file

Click the trash-can icon on its row. The other files stay put.

How many statements?

Three consecutive months minimum. They should be the three most recent statements for the parent's main current account. The account name on the statement should match the parent's name in section 3.

Tips

- If you bank with multiple banks, upload statements from each — add them all to the same slot.
- Joint-account statements: upload them to **both** parents' slots (or upload once and mention in Section 9 additional information).

Related guides

- [Upload a document — single-file uploads.](#)
- [Replace a document — replacing one of the files.](#)

18 — Replace a document

Uploaded the wrong file? Or got a clearer copy? You can replace any document before you submit your application. Once submitted, the application is read-only.

Steps

1. Open the section that holds the slot you want to fix.
2. Find the slot — it'll be green with the current filename shown.
3. Click **Remove**. The slot reverts to the empty (dashed) state.
4. Click **Choose file** and upload the replacement file.
5. The slot turns green again with the new filename.

For a multi-file slot (e.g. bank statements), you can remove a specific file with its trash-can icon and add a fresh one without disturbing the other files in the slot. See Upload bank statements multi file.

After submission

Once you've clicked **Submit Application**, your uploads are locked. If the bursary team needs a corrected version, they will contact you with a "missing documents" request — see Respond to missing documents request.

Tips

- The system keeps your application's progress markers up to date: if a section becomes incomplete because you removed a required document, its sidebar indicator turns from green to amber.
- Removing a file deletes it permanently from your application. Make sure you have the replacement ready before clicking Remove.

19 — What file types and sizes are accepted

Accepted formats

- **PDF** (`.pdf`) — preferred for multi-page documents.
- **JPEG** (`.jpg` , `.jpeg`) — fine for single-page photos.
- **PNG** (`.png`) — fine for screenshots.

Size limit

20 MB per file. That's plenty for a normal PDF or a phone photo, but very large multi-page scans can exceed it.

If your file is rejected

The slot will turn red and show one of these messages:

- **"File too large — maximum 20 MB"** — see the tips below.
- **"Unsupported file type — please upload PDF, JPG, or PNG"** — convert the file first (see below).

Reducing file size

- **PDF too big?** Open it in your PDF reader and "Save as reduced size" or "Compress PDF". On a Mac, **Preview → File → Export → Quartz Filter → Reduce File Size**. On Windows, free tools like *PDF24* compress PDFs.
- **Photo too big?** Take a fresh photo from further away, or use your phone's "small file" / "medium quality" option.
- **Long scan?** Split the file into two or three smaller PDFs and upload them all into the same slot if it's multi-file (e.g. bank statements), or contact the bursary team if it's a single- file slot.

Converting to PDF or JPG

- **Word document (.docx)** — open it and "Save as PDF" / "Export to PDF".
- **HEIC photo** (iPhone default) — open in Photos, share, and pick **JPEG** as the format. Or change your camera setting to "Most Compatible" before retaking.
- **Image inside an email** — save the attachment first, then upload the saved file.

Related guides

- Upload a document — the upload mechanic.

- Upload from phone camera — taking a photo of a paper document.

20 — Upload from your phone's camera

Got the paper original of a document on your kitchen table? You can photograph it and upload it straight from your phone — no scanner needed.

Steps

1. Open the portal on your phone (see Log in on your phone).
2. Navigate to the section holding the slot you need to fill.
3. Tap **Choose file** on the slot.
4. Your phone shows the standard file-picker. Pick **Take a photo** (iOS) or **Camera** (Android).
5. Photograph the document. Tip: place it on a plain dark surface under good light, with the whole page in frame.
6. Confirm the photo (tap **Use photo** or the tick icon).
7. The photo uploads automatically. The slot turns green when it's done.

For multi-page documents

If a document runs to several pages (e.g. a court order):

- Snap each page as a separate JPG and upload them into a multi-file slot if available.
- Or use your phone's built-in document scanner to combine pages into one PDF:
 - **iPhone:** open the Notes app, tap the camera icon, choose **Scan Documents**, then share the resulting PDF to the portal.
 - **Android:** Google Drive → + → **Scan**. Saves as a PDF you can then upload.

Quality tips

- **Crop tight.** No tablecloth, no fingers in the photo.
- **Avoid shadows.** Move the lamp, or use natural daylight.
- **Hold steady.** Blur is the most common reason a document becomes unreadable for the assessor.
- **Check it's legible.** Tap the photo before uploading — if you can't read the smallest text, neither can the assessor.

Related guides

- Upload a document — general upload mechanic.

- File types and sizes — accepted formats and size limit.

21 — The pre-submission review page

After section 9 (Additional Information), you land on the **Review Your Application** page. This is the last checkpoint before the legal declaration — it shows everything you've entered, flags anything missing, and unlocks the Submit button when (and only when) all required items are in place.

What's on the page

Progress bar

A horizontal bar at the top showing the percentage of required items completed.

Issues panel (if any items are missing)

A red box headed **N issues to resolve before you can submit**. Each issue is listed as a row with a short description and a **Go fix this** link that takes you straight to the offending field in the offending section.

"Looks complete" banner (if no issues)

A green box reading **Looks complete — review your details below and proceed to the Declaration when ready**.

Application sections

A numbered list of all nine data-entry sections (1 through 9), each on its own card showing:

- The section title.
- A status pill: **Complete** (green), **Needs attention** (red), or **Not started** (grey).
- An **Edit** button that opens the section so you can change anything.
- A summary of what you entered.

Ready to proceed? CTA

At the bottom is a card titled **Ready to proceed?**:

- **If there are blocking issues** — a red message saying "You have N unresolved issues" and a **Proceed to Declaration** button that's greyed out and disabled.
- **If everything is in order** — a calm message saying "All required information looks complete." and a clickable **Proceed to Declaration** button.

Steps

1. Read the issues panel (if any). Click each **Go fix this** link in turn and the system jumps to the right field in the right section. Fix it, save, and you'll come back to the review page.
2. Once the panel disappears (replaced by the green "Looks complete" banner), scan the section cards to be sure your answers look right.
3. To change anything, click **Edit** on a section card.
4. When you're ready, click **Proceed to Declaration**.

Why is the Submit button still disabled?

Common reasons:

- A required field is empty in one of the sections.
- A required document is missing from a slot.
- A conditional field appeared (because you answered Yes somewhere) and you didn't fill it in.

Every reason will show up in the **Issues panel** at the top. If the panel is empty but the button is still disabled, refresh the page — saved data may not have synced yet.

Next step

Submit application — the Declaration and the actual submit.

22 — Submit your application

You've reached the end of the form. This guide covers the final click and what happens next.

Steps

1. From the review page (see Pre submission review page), click **Proceed to Declaration**.
2. Read the ten-point declaration carefully. See Section 10 declaration for what each point means.
3. Tick the box reading **By clicking this box, I/we agree to the terms and conditions of the declaration set out above....**
4. Type your full name in **On behalf of the applicant**.
5. Click **Submit Application** in the bottom bar.

What happens immediately

You're taken to a confirmation page titled **Your application has been submitted** (green banner) showing:

- Your **application reference** (a unique code — write it down).
- The **submission date**.
- The child's name.
- The assessment round.

Underneath, a **What happens next?** list explains the four-step process (confirmation email → document review → financial assessment → outcome notification) and shows the Foundation's target decision date for your round.

Confirmation email

Within a few minutes you should receive an email titled something like

"Your John Whitgift Foundation bursary application has been received"

. It will quote the same reference number.

If you don't see it after fifteen minutes:

- Check your spam folder.
- The email is sent to the address you used to register. If that inbox is shared, ask the other people on it.
- If still nothing, contact the bursary team — they can confirm receipt directly.

After submission

- The form becomes **read-only**. You can still view it but not change anything.
- Your status moves from **Draft** to **Submitted** — see Check application status.
- If the team later needs more from you, you'll be contacted — see Respond to missing documents request.

Tips

- Save or screenshot the confirmation page so you have your reference to hand.
- The Foundation aims to communicate the outcome by the decision date shown on the page, but it can take longer in busy rounds. Be patient — they will get to you.

23 — Check the status of your application

After you submit, the portal becomes a status-tracking tool. You can sign in any time to see exactly where your application is in the review process.

Where to find it

From the dashboard, click **View Status** in the Quick actions area — or go directly to the **Application Status** page from the sidebar.

What the page shows

Reference and status card

A coloured card at the top with:

- Your **Reference** number (the same one shown on the submission confirmation page).
- The child's name.
- The assessment round (e.g. "2026/27").
- A coloured **status pill**: Draft, Submitted, Under Review, Paused, Completed, Qualifies, or Does Not Qualify.

Progress timeline

A vertical timeline with four steps, each with the date it was reached:

1. **Draft** — *Application started*. Filled in when you began.
2. **Submitted** — *Application submitted for review*. Filled in when you clicked Submit.
3. **Under Review** — *Financial assessment in progress*. Filled in when a Foundation assessor opens your file.
4. **Outcome Available** — *Assessment complete*. Filled in when the assessor finishes.

Reached steps are gold; unreached steps are grey and read "Pending".

Decision date notice (before outcome)

A blue banner telling you when decisions for your round are expected (e.g.

"Decisions for the 2026/27 round are expected by 15 April 2026."

).

Outcome card (once available)

When the outcome is ready, a card appears in green or rose:

- **Green** — *"Your application qualifies for a bursary."*
- **Rose** — *"Your application does not qualify at this time."*

See Read your outcome for what comes next.

What each status label means

Label	Meaning
Draft	You're still filling in the form. Not yet sent.
Submitted	You've submitted. Waiting for an assessor to pick it up.
Under Review	An assessor is actively working on your file.
Paused	The assessor is waiting on something — usually a missing document from you. Check your email for a request.
Completed / Qualifies / Does Not Qualify	The decision has been made.

Tips

- You'll always receive an email at the major milestones. The status page is a convenience, not a substitute for those emails.
- A status that hasn't changed for a while is normal during busy parts of the round. Contact the bursary team if you're concerned.

24 — Respond to a "missing documents" request

Sometimes an assessor needs something more from you — a clearer copy of a bank statement, a missing payslip, an SA302, or evidence for a circumstance you described in section 9. They'll email you asking for it.

Note: the in-portal flow for missing-document requests is in active development. The behaviour below is the intended experience; until the in-portal request page lands, the email will guide you through what to send and how.

What the email looks like

Subject line: typically

"More information needed for your bursary application — (reference)"

.

The body explains:

- Which document(s) the assessor needs.
- Why (e.g. "the bank statement uploaded covered Jan only — please add February and March").
- A link back into the portal where you can upload it.
- A deadline (usually 7 working days) by which to respond.

While the request is open, your application status on the portal changes from **Under Review** to **Paused** — see Check application status.

Steps to respond

1. Click the link in the email. You'll be asked to sign in (or you may already be signed in).
2. You'll land on a page listing the items the assessor needs. Each item is shown with the original slot it relates to (e.g. "Bank Statement — Parent 1").
3. Click the upload area for each item and add the requested file. Mechanics are the same as during application — see Upload a document.
4. When all the requested items are filled in, click **Send to assessor** (or similar). A confirmation page appears.

What happens next

- The assessor receives an email saying you've responded.
- Your status changes back from **Paused** to **Under Review**.
- The assessor picks the file back up. There is no extra wait on your side until the outcome is ready.

Tips

- Respond as quickly as you can — decisions are batched by round, and a delayed response can push your outcome to a later batch.
- If the request is unclear or you can't get hold of the document in time, reply to the email directly. The bursary team would rather hear from you than chase silently.

25 — Read your outcome

When the assessment is complete, you'll receive an email and the status page will show the result.

Where to find it

- An **email** is sent to your registered address. Subject line: *"Bursary application outcome — (reference)"*.
- The **status page** (see Check application status) shows a new outcome card and the timeline's fourth step turns gold.

The two outcomes

Qualifies — bursary awarded

A **green** card on the status page reads:

Your application qualifies for a bursary.

Congratulations. The John Whitgift Foundation will be in touch with further details about your bursary award.

What happens next:

- The Foundation sends a separate letter or email with the **percentage of fees** your bursary covers and the **Bursary Contract** for you to sign.
- You'll need to sign and return the contract before the start of the school year.
- The bursary is reviewed each year — see Accept reassessment invitation.

Does Not Qualify

A **rose-coloured** card reads:

Your application does not qualify at this time.

We regret to inform you that your application has not met the criteria for a bursary at this time. You will receive a letter with further information.

What happens next:

- The Foundation sends a letter or email with the reasoning. By policy, they don't provide a line-by-line breakdown, but they will explain the headline reason.

- If your circumstances change significantly, you may be invited to re-apply in a future round.

What if I disagree?

Decisions are final, but if you believe an important piece of information was missed or miscounted, write to the bursary team within 14 days of receiving the outcome explaining the specific issue. They will tell you whether the application can be looked at again.

Tips

- Save the outcome email and the follow-up letter together — you may need them later for the school's fees office or for tax purposes.
- If your award is conditional (e.g. on a sibling continuing at the school), make sure you understand the condition before signing the Bursary Contract.

Related guide

- Accept reassessment invitation — what happens next year.

26 — Accept a re-assessment invitation

Bursaries are reviewed every year. At the start of each new academic round, the Foundation invites every active bursary holder to complete a re-assessment. This guide walks through accepting that invitation.

What the email looks like

Subject line: usually

"Bursary re-assessment for (child's name) — (academic year)"

.

The body explains that your bursary is up for annual review, quotes the new round (e.g. "2027/28"), and includes a link to the portal.

Steps

1. Click the link in the email. You'll be asked to **sign in** using the same email and password you used last year.
2. After signing in you'll land on the portal dashboard. A card appears welcoming you back to the new round and asking you to confirm:
 - The **school** the child currently attends.
 - The child's **full name** (pre-filled from last year).
3. Confirm both and click the button to begin.
4. You're taken into the re-assessment form, which is shorter than the original application — see Complete reassessment.

How re-assessment differs from a first-year application

- **Section 2 (Family Identification) is skipped.** No new passports / ID needed unless your family composition has changed.
- **Your address, child details, and family member names are pre-filled** from last year. Check them, edit anything that's changed.
- **All financial sections (income, assets, liabilities) start blank.** You re-enter the new year's figures fresh and upload new documents (P60, bank statements, council tax bill).

If something goes wrong

- **The sign-in fails.** Use Reset forgotten password.

- **You weren't expecting an invitation.** Re-assessment is triggered when you have an active bursary at the end of the previous round. If you weren't expecting one, contact the bursary team to check there hasn't been a mix-up.
- **You don't want to re-apply.** Reply to the email and let the bursary team know — they'll close out the file. Note that not responding to a re-assessment usually leads to the bursary lapsing.

Next step

Complete reassessment — what's actually in the shorter form.

27 — Complete a re-assessment

A re-assessment is essentially the same form as the first-year application, with two big differences: Section 2 (Family Identification) is hidden, and the financial sections start blank.

Note: the re-assessment-specific UI (skipped section, pre-fill banners) is in active development. The general flow below is the intended experience.

What's pre-filled

Sections that don't change much year-on-year come pre-populated:

- **Section 1 — Details of Child** — school, child name, date of birth, place of birth, current school (the Foundation knows these from last year). Just check them and update anything that's wrong.
- **Section 3 — Parent / Guardian Details** — names, addresses, contact numbers. Update anything that's changed.
- **Section 4 — Dependent Children** — siblings carry over. Add any new ones, remove any who've left home.
- **Section 5 — Dependent Elderly** — same — confirm or amend.

You'll see a small "**Pre-filled from last year — please confirm**" banner at the top of each pre-filled section.

What starts blank

The financial picture changes every year, so:

- **Section 6 — Other Information** — re-answer Yes/No, re-enter amounts.
- **Section 7 — Parents' Income** — enter the new year's gross income for each parent and upload new P60s and other evidence.
- **Section 8 — Assets & Liabilities** — re-enter property values, savings, debts, and upload the latest council tax bill and three months of bank statements.
- **Section 9 — Additional Information** — flag any new circumstances; mention anything notable that happened this year.

What's not asked

- **Section 2 — Family Identification.** The Foundation already has everyone's ID from last year. If a new dependant joined the family this year, contact the bursary team — they may ask for ID for the new person off-portal.

Steps

1. Accept the invitation (see Accept reassessment invitation).
2. Walk through each section. The sidebar shows nine entries instead of ten (Family ID is hidden).
3. For pre-filled sections, click into each, confirm the values, and click **Save and Continue**.
4. For the financial sections, fill them in fresh — see Section 7 parents income and Section 8 assets liabilities.
5. Reach the review page, fix any issues, and submit just as you did in year one — see Pre submission review page and Submit application.

Tips

- Set aside an evening to gather the new financial documents before you start the form — that's the bulk of the work.
- Don't blank-out pre-filled fields by accident. If you do, the section flips back to "Needs attention" until you re-confirm.

Next step

What changes year on year — how the Foundation reasons about year-on-year changes.

28 — What changes year-on-year

When the Foundation re-assesses your bursary, they look at **this year's** financial picture and compare it to **last year's** to decide whether your award goes up, stays the same, or goes down.

This guide is plain background — there's nothing you need to do in the portal here. It's worth a read so you know how to read the outcome letter when it arrives.

The benchmark

The Foundation uses **last year's payable fees** (your share of the school fees after last year's bursary) as the benchmark. If your financial position has stayed roughly the same, your contribution stays roughly the same — and the bursary covers any increase in school fees.

How decisions are explained

Re-assessment outcome letters reference **reason codes** for any material change in your award. These are short, plain-English codes such as:

- **Increase in income** — household income has risen significantly.
- **Reduction in income** — household income has fallen significantly.
- **New dependant** — a new child or elderly relative is now being supported.
- **Property sale / purchase** — your asset base has changed.
- **Inheritance received** — a one-off windfall has been reported.
- **Redundancy / job loss** — you've reported a loss of employment.

The letter lists every reason code that applied to your case and the direction (up or down) it pushed your award.

What this means for you

- **Provide explanations in Section 9 additional information.** If there's a number in your income or assets that looks bigger or smaller than last year for a one-off reason (e.g. inherited a car you sold, took a sabbatical), say so. Assessors can apply a one-off reason code instead of a structural one.
- **Don't try to game the timing.** Foundation assessors look at income over the full tax year, not month-by-month.
- **Material changes go both ways.** If your income drops, your bursary may increase. Always declare the new figures honestly.

If your award changes by a lot

A large change (up or down) usually means the assessor wants to talk to you. Don't be alarmed — it's a conversation, not a disciplinary process. They'll explain what they saw and what it means for the new year.

Related guides

- Read your outcome — reading the outcome letter.
- Complete reassessment — the re-assessment form itself.

29 — Request your data be deleted

Under UK GDPR you have the right to ask for your personal data to be deleted. The Foundation can process this request on your behalf.

What can be deleted

When the Foundation acts on a deletion request:

- Your **profile** — name, email, phone, address.
- Your **application data** — every section's content.
- **All uploaded documents** — birth certificate, passports, bank statements, P60s, council tax bill, and any others.
- Your **assessment record and recommendation** (if any).
- Your **login account**.

What is retained

For legal and audit reasons, a small amount of data is kept:

- **Audit-trail entries** — when each action happened (but with your name and email removed). These prove the deletion took place and demonstrate that the Foundation followed its own process.
- **The fact a bursary was awarded** for the relevant academic year (if applicable), with no personally identifying detail.

The 7-year retention rule

If your application is **less than 7 years old** and is tied to an **active or recently-closed bursary**, the Foundation is legally required to retain the records until the 7-year window expires. In that case the deletion will be **scheduled** for the date the retention period ends rather than executed immediately. The bursary team will confirm in writing.

How to request deletion

There's no self-service "delete my account" button in the portal. Deletion is irreversible, so the Foundation handles it manually:

1. Email the bursary team. Use the contact details from your invitation email or outcome letter.
2. State clearly that you are making a **UK GDPR deletion request** under Article 17.

3. Include the **child's name** and your **application reference** (if you have it).
4. Optionally, ask whether the 7-year retention window applies to your record.
5. The team will reply within one calendar month confirming either that deletion has been carried out or that it has been scheduled (with the scheduled date) along with the reason.

Before you ask

Once deletion has run, you cannot recover anything — the documents are deleted from storage, and the answers in the form are gone. If you might want to **re-apply in future**, consider asking the Foundation to **close** your account instead — you'll still be able to re-invite yourself later without starting fully from scratch.

Tips

- Save any outcome letters or bursary contracts you want to keep **before** asking for deletion — those are your records, and you may need them for the school's fees office or for tax.
- If you only want to update an email address or change your password, you don't need a deletion request — just sign in and use Reset forgotten password or contact the bursary team to update your address.

Assessor Walkthroughs

Assessor Walkthroughs

The Assessor owns the **applicant journey** — from "this family has been offered a place" through to "the school has a recommendation". They invite the family, review the submitted application, verify the documents, run the four-stage calculation, write the recommendation, and complete the assessment with an outcome.

Assessors **cannot** edit reference tables (school fees, family-type weightings, etc.), invite other staff, or delete records. Those are Admin workflows — see [../admins/](#).

A core principle of the role: the assessor builds an **independent financial picture from source documents** (P60s, tax returns, bank statements). They do not use the applicant's declared figures for the calculation — only the uploaded evidence. This is the "two-layer" model that justifies the role's existence.

Workflows

Each item below has its own guide in this folder.

Daily queue work

- **Triage the queue** — open [/queue](#), scan submitted applications, filter by school / status / round, sort by submission date. Confirm the red-flag column when present. Names are hidden by default; the "Show Names" toggle is logged.
- **Open an application** — click a row to land on the four-tab detail view (Applicant Data, Assessment, Recommendation, History).

Inviting applicants (single)

- **Invite one applicant for a new bursary** — the most common intake action. Enter the applicant's email, child name, and school; the system sends a unique registration link. (Batch re-assessment invitations are an Admin workflow.)
- **Invite an applicant for an internal / ad-hoc bursary** — outside the standard round, for pastoral or emergency cases. Schooling years remaining is editable rather than fixed to the standard Y6/Y7/Y9/Y12 mapping.

Tab 1 — Reviewing the submission

- **Read the submitted application** — the Applicant Data tab is a read-only view of all 10 sections the applicant filled in.
- **Verify uploaded documents** — open each document inline (no download needed for the verification check), confirm the file in the slot matches what the slot is named for, mark each verified. Includes the document round-trip integrity check (Parent 1's P60 is actually Parent 1's P60, not Parent 2's payslip).
- **Upload a document on behalf of the applicant** — for files received by email rather than via the portal. The upload is visually distinguished from applicant-uploaded files.
- **Request missing documents** — open the "Request Documents" email composer, customise the list of specific missing items, send. Pauses the assessment until the applicant responds.

Tab 2 — Running the assessment (the calculation engine)

- **Set up the assessment workspace** — split-screen with document viewer on the left, data entry on the right. Pick which document to view from the dropdown.
- **Enter Stage 1 — Income** — per parent: employment status from the 7-option enum (PAYE / Benefits / SE Director / SE Sole / OAP / Past Pension / Unemployed), then the right inputs for that status, plus separate inputs for included and excluded benefits. Total household net income updates live.
- **Enter Stage 2 — Assets** — mortgage-free toggle, additional property count and income, cash savings, ISAs/PEPs/shares, school-age children count for the savings divisor. Net assets yearly valuation updates live.
- **Stage 3 — Living costs** — utility and food costs auto-populated from family type; editable. HNDI after Necessary Spending updates live.
- **Stage 4 — Bursary impact** — Required Bursary, gross fees, scholarship %, bursary award, net yearly fees, VAT, yearly + monthly payable fees all displayed.
- **Apply a manual adjustment** — positive or negative £; requires a reason if non-zero.
- **Select a property category** (1–12) and record red flags (dishonesty, credit risk).
- **Save the assessment** — at any point, in any status. Re-opening a saved assessment loads every entered figure back exactly.

Tab 3 — Writing the recommendation

- **Build the family synopsis** — a free-text field you write **manually**, using the assessment data on screen (single/married, number of children, employment) as your reference. The field opens blank on a new assessment; it does **not** auto-populate or auto-suggest. (Auto-suggestion from assessment data is spec'd as future work — see `docs/backlog/family-synopsis-auto-population.md`.)
- **Set accommodation status, income category, property category** — these are the fields the school sees. Income and property are **categories** ("£15K–£25K"), not precise figures.
- **Record bursary award and payable fees** — pre-filled from the calculation, editable.
- **Select year-on-year reason codes** (re-assessments only) — multi-select from the ~35 codes; explains any payable-fee change.
- **Write the recommendation narrative** — free-text summary intended for the school.
- **Complete the assessment** — mark status as Completed, select outcome (Qualifies / Does Not Qualify). Triggers the outcome notification email to the applicant.

Sibling linking

- **Link siblings** — when a family has more than one child applying or holding a bursary. Search by child name, reference, or lead applicant email; create the link from one record's "Link Sibling" action.
- **Re-order sibling priority** — when the eldest child leaves school, promote the next sibling to primary holder. The calculation re-evaluates payable fees for the remaining bursary holders.
- **Break a sibling link** — when one was set up incorrectly. Both records' calculations update.

Re-assessment (year 2+)

- **Open a re-assessment** — different from a new application: the Applicant Data tab shows the prior year's data alongside the new submission, and the assessment workspace shows previous-year figures side-by-side with current entry fields.
- **Compare against the year-1 benchmark** — payable fees that fall below the year-1 benchmark surface a visual warning; the calculation is not silently overridden. The assessor decides whether to honour the benchmark via the manual adjustment field.

- **Pick reason codes** — explain the change (or lack of change) in family circumstances year-on-year.

Hand-off to the school

- **Generate a PDF for one application** — recommendation tab → Download PDF.
- **Export recommendation list** — bulk export as CSV or XLSX, one row per application, including family synopsis, income category, property category, bursary award, payable fees, red flags, reason codes, outcome. Send externally to the school's admissions team.

Reports

- **Round summary** — totals and breakdowns by status / outcome / school for the current round.
- **Bursary awards** — total £ awarded, average payable fees, trend across rounds.
- **Income distribution** — histogram across bands.
- **Property category distribution** — categories 1–12 with the £750K threshold highlighted.
- **Reason code frequency** — ranked codes for a selected round.
- **Active bursaries approaching final year** — Y12/Y13 holders.
- **Sibling bursary summary** — linked families with combined totals.

Cross-link

For system-level work (rounds, reference data, staff invitations, GDPR, audit), see

[../admins/](#).

01 — Triage the queue

Scan the application queue, apply filters, and identify which applications need attention next. Names are hidden by default; revealing them is an auditable event.

Prerequisites

- Signed in as `ASSESSOR`, `ADMIN`, or `VIEWER`.
- One or more rounds exist (`/rounds`) — assessors see only their own assignments; admins/viewers see everything.

Steps

1. From the admin sidebar, click **Applications**. You land at `/queue` under the heading **Applications** with the strapline *"Review and assess submitted bursary applications."*
2. Use the filter bar at the top of the table:
 - **Round** dropdown — defaults to *All rounds*; pick a specific academic year to narrow down.
 - **School** dropdown — *All schools / Whitgift / Trinity*.
 - **Status** popover — multi-select among *Pre-Submission, Submitted, Not Started, Paused, Completed, Qualifies, Does Not Qualify*. The popover badge shows the number of statuses applied; **Clear filters** wipes them.
 - **Search reference...** — free-text matches the reference (and, when names are revealed, child and lead applicant names).
3. Sort by clicking any column header — **Reference, School, Submitted, Status, Entry Year**. The chevron indicates direction.
4. To reveal applicant names for cross-checking, toggle **Show names** (top-right of the filter bar). The amber pill *"Names visible — audit logged"* appears. The reveal calls `/api/applications/names` and writes an audit-log entry attributed to you.
5. Click any row (or the **Open** button) to navigate to the application detail view — see Open an application.

Verification

- The row count line at the bottom reads `Showing N of M applications`.
- Filters applied are visually reflected (status popover badge, round / school dropdowns).

- When **Show names** is on, the Child Name and Lead Applicant columns appear; toggling off hides them and removes the pill.

Notes

- Assessors see only applications where `assignedToId = self`. If the queue is empty, ask an Admin to assign applications or check filters.
- The status column maps the internal Prisma status to a display badge (e.g. `COMPLETED` → *In Review* visual, `NOT_STARTED` → *Submitted*). Treat the popover labels as the source of truth.
- Every **Show names** activation is logged with the action `REVEAL` ; reviewable in Audit log review.

02 — Open an application

Navigate from the queue into the four-tab application detail view.

Prerequisites

- Signed in as `ASSESSOR`, `ADMIN`, or `VIEWER`.
- The application is assigned to you (assessor) or you are an admin / viewer.

Steps

1. From `/queue`, click any row in the table, or use the row's **Open** button (small external-link icon). You land at `/applications/[id]`.
2. The header card shows:
 - The application **reference** (monospace, e.g. `JW-2026-0042`).
 - The school badge (*Whitgift navy / Trinity blue*).
 - Round line: *Round: 2026/27 · Entry: 2027*; the orange pill **Re-assessment** appears for year 2+ applications.
 - The current **StatusBadge** (top-right).
 - For admins, the **Assign Assessor** select.
3. Below the header sits the **Actions** bar (hidden for terminal statuses `PRE_SUBMISSION`, `QUALIFIES`, `DOES_NOT_QUALIFY`). The bar's context label reads e.g. "*Actions > Awaiting review*" and surfaces the next-step buttons:
 - `SUBMITTED` → **Begin Review**.
 - `NOT_STARTED` → **Request Missing Documents** | **Mark Complete**.
 - `PAUSED` → **Resume Review**.
 - `COMPLETED` → **Set Does Not Qualify** | **Set Qualifies**.
4. Use the tab strip to move between:
 - **Applicant Data** — read-only submission (see Read submitted application).
 - **Assessment** — the calculation workspace.
 - **Recommendation** — only meaningful after the assessment is `COMPLETED`.
 - **History** — audit timeline for this application.

Verification

- The breadcrumb reads *Applications / <reference>*.
- The browser tab title shows the active section (*Applicant Data, Assessment, etc.*).

- For `ASSESSOR` users not assigned to the application, the layout redirects to `/admin` — that's the access guard, not a bug.

Notes

- A 404 indicates the application has been GDPR-deleted (see Delete applicant gdpr) or never existed.
- The actions bar surfaces a red inline banner if a status transition fails server-side; the message is the server-action's `error` string.

03 — Invite one applicant for a new bursary

Send a single registration link to a family who has been offered a place. The system records the invitation and emails the recipient a tokenised URL.

Note: the `/invitations` page currently requires `ADMIN`. Where Assessors need to send a single invitation as part of intake, ask an Admin to action it, or use the **Internal Request** flow on the queue page (see Invite internal ad hoc bursary) which is open to Assessors and produces the same applicant invitation email.

Prerequisites

- Signed in as `ADMIN`.
- At least one round exists; ideally the round is `OPEN`.
- You have the applicant's email address.

Steps

1. Sidebar → **Invitations**. You land at `/invitations` under the heading **Invitations** with strapline *"Send bursary application invitations and track their status."*
2. The **Send New Invitation** card sits at the top. Fill in:
 - **Email** (*required*) — applicant's email.
 - **First Name / Last Name** (*optional*) — used in the merge fields of the email body.
 - **Display Name** (*optional*) — overrides the first + last fallback.
 - **Child Name** (*optional*).
 - **School** — *Any / Not specified, Trinity School, or Whitgift School*.
 - **Round** (*required*) — defaults to the most recent `OPEN` round.
3. Click **Send Invitation**. On success the green banner reads *"Invitation sent to `<email>`"*, the form resets, and the invitation appears in the **Invitation History** table below.

What happens server-side

- An `Invitation` row is created with status `PENDING` and a one-time token.
- The `INVITATION` email template is rendered with merge fields (applicant name, child name, round academic year, registration link) and sent via Resend.
- An audit-log entry is written.

Verification

- The new row in **Invitation History** shows status badge **PENDING** (yellow), the *Sent* date, and your name under *Sent By*.
- The **Actions** column offers a row menu — see Resend or revoke invitation for follow-up actions.
- The applicant receives an email containing a link of the form `/register?token=...`.

Troubleshooting

- **"A valid email address is required"** — Zod validation on the client; correct the email field.
- **"An application round is required"** — the round dropdown was left on the placeholder; select a round.
- **Email not delivered** — check Resend deliverability dashboard; the webhook log is visible under the audit trail (Audit log review).

04 — Invite an applicant for an internal / ad-hoc bursary

Create an application on behalf of a parent — used for pastoral referrals, emergency cases, or off-round intake. Generates an application reference and emails the parent a registration link.

Prerequisites

- Signed in as `ASSESSOR` OR `ADMIN`.
- A round exists you can attach the application to (any status; the dialog flags non-OPEN rounds).
- The parent's email, name, child's name, school, and target entry year.

Steps

1. Sidebar → **Applications** to reach `/queue`.
2. At the top-right of the page, click the **Internal Request** button (Plus icon).
3. The dialog **Create Internal Bursary Request** opens with strapline *"Create an application on behalf of a parent. An invitation email will be sent so they can complete the form."* Fill in:
 - **Parent Email** (required).
 - **Parent Name** (required).
 - **Child Name** (required).
 - **School** (radio) — *Whitgift / Trinity*.
 - **Academic Round** — dropdown; non-OPEN rounds are shown with a muted `(draft)` / `(closed)` suffix.
 - **Entry Year** — dropdown of eight years around the current year.
 - **Reason for Request** (optional, max 500 chars) — e.g. *"Referred by headteacher; child has exceptional circumstances..."*.
4. Click **Create Request**.
5. On success the dialog flips to a green success panel with the header **Internal Request Created** and shows the generated **Application reference** in monospace. Click **Done** to dismiss.

What happens server-side

- An `Application` row is created and tied to a new (or existing) `BursaryAccount` for the parent.

- An invitation email is dispatched so the parent can complete the online form — they pick up the application via the standard portal flow.
- The `reason` (if provided) is recorded for the audit trail.

Verification

- The new application appears in `/queue` with status **Pre-Submission** until the parent submits.
- The reference shown in the success panel matches the row in the queue.

Notes

- Use this flow when the standard Y6 → Y7, Y9, Y12 mapping is not the right fit; entry year here is freely editable.
- The parent still receives the standard invitation email and registers themselves; you do not enter their financial data on their behalf.

05 — Read the submitted application

Read-only review of every section the applicant filled in. This is your starting point before opening the assessment workspace.

Prerequisites

- The application is open (see Open an application).
- Status is `SUBMITTED` or beyond — sections only render once submitted.

Steps

1. Ensure the **Applicant Data** tab is active (default landing tab).
2. The top of the tab shows the **Documents** card and the **Upload Document (Assessor)** card — covered in Verify uploaded documents and Upload document on behalf of applicant.
3. Below those, each application section is a `Card` with a coloured complete/incomplete chip:
 - **Child Details**
 - **Family Identity**
 - **Parent Details**
 - **Dependent Children**
 - **Dependent Elderly**
 - **Other Information**
 - **Parents' Income**
 - **Assets & Liabilities**
 - **Additional Information**
 - **Declaration**
4. Each field renders as a `dt / dd` row. Booleans display as coloured **Yes / No**; numbers that look like currency render as £-formatted monospace; unset values appear as *"Not provided"* in muted italics; document references show as *"Document ref"*.
5. Nested objects render as an indented `DataBlock`; arrays render as ordered lists.
6. If the family is on a multi-child bursary, the **Sibling Links** section at the bottom lists linked accounts and offers the linker card — see Link siblings.

Verification

- Every applicable section shows a green **Complete** chip; any **Incomplete** chip is your cue to request missing detail (see Request missing documents) or page back to the family.
- If the application has no submitted data the tab shows the empty state "*No application sections have been submitted yet.*"

Notes

- This tab is **strictly read-only** — there is no "edit" button. To correct a value the applicant must resubmit, or you record the override in the assessment workspace (Tab 2) where evidence-based figures take precedence over declared figures.
- Use the document cards to flip into PDFs while reading the declared figures — do not commit to any number here; the authoritative entry happens in Tab 2.

o6 — Verify uploaded documents

Open each uploaded document inline, confirm it matches the slot it was filed under, then toggle its verification status.

Prerequisites

- The application is open on the **Applicant Data** tab.
- At least one document has been uploaded — the **Documents (n)** card shows the count.

Steps

1. Locate the **Documents (n)** card near the top of the Applicant Data tab.
2. For each row:
 - The leading icon shows verification state (green tick = verified, grey circle = unverified).
 - The bold label is the **slot name** (e.g. `PARENT_1_P60` , `BANK_STATEMENT_3M`); the secondary line is the uploaded **filename**.
 - Click **View** (external-link icon) to fetch a presigned URL and open the file in the inline document viewer dialog. The dialog supports PDF / JPEG / PNG.
3. Read the file. Confirm two things:
 - The content actually belongs to the slot label (Parent 1's P60 is Parent 1's P60, not Parent 2's payslip).
 - The document is legible and complete (no truncation, no missing pages).
4. Once confirmed, tick the **Checkbox** in that row. The verify call hits `POST /api/documents/[id]/verify` ; the icon flips green and an audit entry is written.
5. To revoke a verification, click the checkbox again.

Verification

- Each verified document shows a green check icon and a green-bordered checkbox.
- The audit log records each verification toggle with action `DOCUMENT_VERIFIED` / `DOCUMENT_UNVERIFIED` .

Notes

- Document slot names follow the upload schema — see `src/lib/documents/slots.ts` for the full canonical list.
- The viewer streams the file via a short-lived presigned URL from Supabase Storage; the URL is not stored client-side beyond the open dialog.
- If a slot has the wrong file (e.g. Parent 1's P60 was uploaded under Parent 2), do **not** verify it. Use Request missing documents to ask for a re-upload, or upload the correct file yourself via Upload document on behalf of applicant.

07 — Upload a document on behalf of the applicant

For documents received outside the portal (email, post). The uploaded file is attributed to you, not to the applicant.

Prerequisites

- The application is open on the **Applicant Data** tab.
- You have the file locally — PDF, JPEG, or PNG, max 20 MB.
- You know which slot it belongs to.

Steps

1. Scroll to the **Upload Document (Assessor)** card, immediately below the Documents checklist. Strapline: *"Upload documents on behalf of the applicant. These will appear in the document checklist above."*
2. **Document slot** — select from the dropdown. All canonical slot names from `ALL_DOCUMENT_SLOTS` are listed in humanised form.
3. **File** — click the file picker (*"PDF, JPEG, or PNG — max 20 MB"*). Client-side validation rejects:
 - *"Only PDF, JPEG, and PNG files are accepted."*
 - *"File is too large. Maximum size is 20 MB."*
4. The selected file preview shows filename and size in MB.
5. Click **Upload Document**. The request is `POST /api/admin/documents` with `applicationId`, `slot`, and the file.
6. On success a green banner reads *"<Slot label> uploaded successfully."*; the page refreshes and the new row appears in the Documents checklist.

Verification

- The document appears in the **Documents (n)** card with the slot label and filename.
- The audit log records `DOCUMENT_UPLOADED` attributed to you (not the lead applicant).
- The new row is unverified by default — verify it via Verify uploaded documents.

Notes

- Assessor-uploaded documents satisfy the same slot completeness checks as applicant-uploaded ones — they are not visually distinguished in the checklist UI, but the audit metadata records the uploader role.

- For a re-upload (overwrite), upload the new file to the same slot — the previous file remains in Storage; both rows show in the checklist. Mark the obsolete one unverified.

o8 — Request missing documents

Pause the assessment, list the outstanding slots, and email the applicant a structured "please send these" request.

Prerequisites

- Application status is `NOT_STARTED` (i.e. you've clicked **Begin Review** at least once). The button does not appear for `SUBMITTED` or terminal statuses.
- The application is open and you can see the **Actions** bar.

Steps

1. In the actions bar, click **Request Missing Documents**.
2. The dialog **Request Missing Documents** opens with strapline *"Select the documents that are outstanding. The applicant will be notified by email and the application will be paused until the documents are received."*
3. The **Document slots** list is pre-populated:
 - Slots without a verified document are pre-checked.
 - Each row shows a status pill — green **Verified** or amber **Uploaded** (uploaded but not verified).
 - Use the checkboxes to fine-tune the selection. The counter below the list reads *"N slots selected"*.
4. **Additional message** (optional) — free-text appended to the email body, e.g. *"Please ensure the P60 is for the 2024/25 tax year."*
5. Click **Send Request**.
 - Validation: *"Please select at least one missing document."* if zero slots are ticked.
6. On success, the dialog flips to a green confirmation: *"Request sent successfully. The applicant has been emailed and the application is now paused."* It auto-closes after 1.5s.

What happens server-side

- The application status transitions `NOT_STARTED` → `PAUSED`.
- The `MISSING_DOCS` email template is rendered with the bulleted slot list and optional additional message, then sent via Resend.
- An audit-log entry records the action and the slot list.

Verification

- The actions bar now shows the **Resume Review** button (status = `PAUSED`).
- The status badge at the top of the application reads **Paused — awaiting documents**.
- The applicant receives the email with the bulleted slot list.

Notes

- When the applicant re-uploads, the assessment does **not** resume automatically. You must come back, verify the new docs, and click **Resume Review** to return to `NOT_STARTED` .
- The dialog can be triggered repeatedly while paused — useful if a second round of documents is needed.

09 — Set up the assessment workspace

Open the split-screen workspace by starting the assessment for an application that doesn't have one yet.

Prerequisites

- Application is open on the **Assessment** tab.
- Application status is at least `SUBMITTED` (typically `NOT_STARTED` after you click **Begin Review**).
- You are signed in as `ASSESSOR` or `ADMIN`. Viewers see the read-only prompt and cannot start.

Steps

1. Click the **Assessment** tab in the application detail.
2. If no `Assessment` record exists yet, the centre of the tab shows the dashed empty card with:
 - The clipboard icon.
 - Heading **Assessment not yet started**.
 - Strapline *"Begin the assessment to open the workspace with all documents and income entry forms."*
3. Click **Begin Assessment** (large primary-navy button, clipboard icon). The button shows *"Starting assessment..."* with a spinner.
4. The server action `beginAssessmentAction` creates the `Assessment` row (status `IN_PROGRESS`) seeded with reference-table defaults for the school's annual fees, the Croydon Band D council tax, and family-type costs for category 1.
5. The page refreshes and renders the full **split-screen workspace**:
 - **Left panel** — `DocumentListClient`: every uploaded document with inline preview controls. Use the document dropdown / list to flip between PDFs as you enter figures.
 - **Right panel** — `AssessmentForm` with five collapsible sections (A–E) plus the sticky **CalculationDisplay** sidebar.
6. Below the split-screen sits the **AssessmentChecklist** with six qualitative tabs: *Bursary, Living Conditions, Debt, Other Fees, Staff, Financial Profile*. Use these for narrative notes as you work.

Verification

- The status bar at the top of the form shows the chip **In Progress** with a *Saved hh:mm:ss* indicator after the first save.
- All five form sections (**A. Reference Data**, **B. Income Entry**, **C. Property & Savings**, **D. Payable Fees**, **E. Flags**) collapse / expand on click.
- The calculation sidebar shows placeholder rows until *Annual School Fees* is non-zero.

Notes

- For **re-assessments**, the `BenchmarkDisplay` banner and the `YearComparison` table render above the split-screen *before* the workspace appears — see Compare against year 1 benchmark.
- If `beginAssessmentAction` returns an error (e.g. concurrent edit), the red text under the button shows the server-action message; refresh and try again.

10 — Enter Stage 1 — Income

Record per-parent employment status and the income components that flow into the Stage 1

Total Household Net Income

line.

Prerequisites

- The assessment workspace is open (see Set up assessment workspace).
- The relevant P60s, tax returns, payslips, and benefit award letters are visible in the document panel.

Steps

1. Expand **Section B. Income Entry**. Two tabs appear: **Parent 1** and **Parent 2**.
2. For each parent, set **Employment Status** from the dropdown. The visible fields below adjust to match:
 - **PAYE (Employed)** → *Net Pay (annual)*, plus benefits.
 - **Benefits only** → benefits only.
 - **Self-employed (Director)** → *Net Self-Employed Profit, Net Dividends*, plus benefits.
 - **Self-employed (Sole Trader)** → *Net Self-Employed Profit*, plus benefits.
 - **Old Age Pension** → *Pension Amount (annual)*, plus benefits.
 - **Past Employment Pension** → *Pension Amount (annual)*, plus benefits.
 - **Unemployed** → no income/benefit inputs.
3. Enter the figures **from source documents**, not the applicant's declared totals:
 - *Net Pay (annual)* — total net salary after tax and NI (hint).
 - *Net Self-Employed Profit (annual)* — net profit after allowable expenses.
 - *Net Dividends (annual)* — net dividends received from company.
 - *Pension Amount (annual)*.
4. Enter benefits in two columns:
 - **Benefits Included (annual)** — DLA, ESA, PIP, Carer's. A **Benefits Included — Detail** input appears once non-zero (e.g. "DLA £4,500, PIP £2,100").
 - **Benefits Excluded (annual)** — child disability benefits. Recorded only, not added to income. The detail input appears once non-zero.

5. The per-parent total chip "*Parent 1 Total Income*" updates live in the primary-blue strip at the bottom of the tab.
6. Switching tabs persists in-memory state; saves are scheduled on blur.

Verification

- The right-hand **CalculationDisplay** sidebar's Stage 1 section shows *Parent 1 net income*, *Parent 2 net income*, *Additional property income* (if any), and *Total Household Net Income*. The total matches the sum of the two per-parent chips plus rental income from Section C.
- Saving (auto or manual) records a server-side calculation snapshot — see *Save the assessment*.

Notes

- Changing **Employment Status** zeroes any fields no longer visible (e.g. switching from PAYE to Unemployed clears *Net Pay*). This is intentional — see `resetEarnerFieldsForStatus` in `src/components/admin/earner-form.tsx`.
- Currency inputs accept commas and £; they're parsed on blur and redisplayed as `1,234.00`. Negative values are clamped to 0.

11 — Enter Stage 2 — Assets

Record property, savings, and investments. The yearly asset valuation feeds the Stage 2 line in the calculation sidebar.

Prerequisites

- Workspace open with at least Section B largely complete (see Enter stage 1 income).
- Mortgage statement, bank/savings statements, and ISA/share statements visible in the document panel.

Steps

1. Expand **Section C. Property & Savings** ("Housing situation and financial assets").
2. **Mortgage-free property** toggle — *"If checked, notional rent is added back to income."* Switch on only if the family fully owns their primary residence.
3. **Additional Property Count** — integer (default 0). When > 0, the **Additional Property Income (annual)** field becomes editable.
4. **Additional Property Income (annual)** — total rental income from additional properties.
5. **Cash Savings** — total cash savings across bank accounts.
6. **ISAs / PEPs / Shares** — total value of investment holdings.
7. **School-Age Children Count** — integer, default 1, minimum 1. Used as the divisor for the savings amortisation; the calculator distributes the cash+investments pot across this many children over the remaining school years.

Verification

- The **CalculationDisplay** Stage 2 block updates:
 - *Cash savings*
 - *ISAs / PEPs / Shares*
 - *Derived savings (annual)* — the savings divisor result.
 - *Notional rent uplift* (only if mortgage-free is on).
 - *Net Assets Yearly Valuation* — the bold sub-total.
- When mortgage-free is on, the **Stage 1** total household net income line increases by the notional rent (read off Section A's "Notional Rent" reference chip).

Notes

- Derived savings = $(\text{cashSavings} + \text{isasPepsShares}) / \text{schoolAgeChildrenCount} / \text{schoolingYearsRemaining}$, capped at zero.
- A school-age children count of 0 is disallowed by the input (`min={1}`).
- Negative numbers are not accepted; the input clamps to 0.

12 — Stage 3 — Living costs

Living costs are derived from **Section A. Reference Data** — utilities and food auto-populate from the chosen family type; rent is the notional rent for that category; council tax defaults to Croydon Band D.

Prerequisites

- Workspace open. Family composition known (single parent / couple / number of dependants) so you can pick the right family-type category.

Steps

1. Expand **Section A. Reference Data** (top of the form).
2. **Family Type Category** — dropdown. Each entry reads `N. <description>` (e.g. `3. Couple, two children`). The hint reads *"Auto-populates notional rent, utilities, and food costs."*
3. Selecting a category instantly refreshes the three read-only chips below the grid:
 - **Notional Rent**
 - **Utility Costs**
 - **Food Costs** These figures come from `FamilyTypeConfig` (see `../admins/05-edit-family-type-categories.md`). They're the authoritative reference values at the moment of the assessment.
4. **Annual School Fees** — pre-VAT, defaults from `SchoolFees` for this school. Override only if the school has confirmed a different figure for this child.
5. **Entry Year** — academic year the child entered (e.g. `2019`). On blur this recomputes **Schooling Years Remaining** via `13 - (academicYear - entryYear + 1)`, clamped to `[0, 13]`.
6. **Schooling Years Remaining** — editable override if the auto-calc is wrong (e.g. repeated year).
7. **Council Tax (annual)** — default Band D Croydon; override per household.

Verification

- The **CalculationDisplay** Stage 3 block reads:
 - *Notional rent / Utilities / Food / Council tax / School fees (pre-VAT).*
 - *Necessary Spending* — sum of the above.
 - *HNDI after Necessary Spending* — Stage 1 + Stage 2 minus necessary spending.

Notes

- The Stage 3 figures are **inherited from reference data at the time the assessment is started**; if the reference table changes mid-round the figures already in the workspace stay put. Re-selecting the family type category re-pulls the current values.
- Council tax has no per-property variant — if the family lives outside Croydon, override the number manually.

13 — Stage 4 — Bursary impact

Stage 4 is computed from Stages 1–3 plus the **Payable Fees** inputs. The calculation sidebar shows it in real time; the figures land on the recommendation tab and the export.

Prerequisites

- Stages 1–3 substantially complete.
- *Annual School Fees* in Section A is non-zero — the `CalculationDisplay` shows placeholders otherwise.

Steps

1. Expand **Section D. Payable Fees** ("Scholarship, VAT, and manual adjustments"). Enter:
 - **Scholarship Percentage (%)** — *"School scholarship applied before bursary (0–100)"*. Decimal allowed (step 0.5).
 - **VAT Rate (%)** — default 20.
 - **Manual Adjustment** — covered in Apply manual adjustment.
2. The right-hand **CalculationDisplay** Stage 4 panel now shows:
 - **Required Bursary** — `max(0, gross_fees - HNDI_after_NS - sibling_payable_fees)`.
 - **Gross Fees** — `annualFees × (1 - scholarshipPct/100)`.
 - **Bursary Award** — capped at gross fees.
 - **Net Yearly Fees** — `grossFees - bursaryAward`.
 - **VAT** — applied to net yearly fees at the configured rate.
 - **Yearly Payable Fees** — net + VAT, including any manual adjustment.
 - **Monthly Payable Fees** — yearly / 12.
3. Cross-check the sidebar values against the family's circumstances before saving.

Verification

- The sidebar's bold *Yearly Payable Fees* and *Monthly Payable Fees* lines render once `annualFees > 0`.
- For sibling-linked applications, the sidebar shows a *Sibling payable fees absorbed* line — this is the sum of older siblings' yearly payable fees, deducted before bursary is calculated.

Notes

- The full calculator lives in `src/lib/assessment/calculator.ts` (the pure TS function `calculateAssessment`). Use the unit tests as the canonical worked examples if a figure looks off.
- VAT applies to school fees per HMRC's 2025 rules; the rate is editable per-assessment in case of policy changes mid-round.

14 — Apply a manual adjustment

A pound-value override on the calculated yearly payable fees, used for edge cases (year-1 benchmark honour, panel discretion, etc.). Adjustment direction matters: positive increases the family's fees, negative reduces them.

Prerequisites

- Workspace open. You have a documented justification for the override (e.g. matches first-year benchmark, panel decision dated ...).

Steps

1. In **Section D. Payable Fees**, locate the **Manual Adjustment** field. Hint: *"Positive = increase fees; Negative = reduce fees"*.
2. Enter a £ value. The display strips £ and commas, parses on blur, and re-formats.
3. As soon as the value is non-zero, the **Manual Adjustment Reason** text input appears beside it (placeholder *"Reason for manual adjustment"*).
4. Enter a brief justification — this is mandatory in practice and shows on the audit trail and the recommendation PDF.
5. Blur the field; the assessment auto-saves after a 300 ms debounce.
6. Confirm the sidebar's *Yearly Payable Fees* and *Monthly Payable Fees* lines reflect the adjustment (the calculator stores the **adjusted** values in `yearlyPayableFees` / `monthlyPayableFees`).

Verification

- The calculation sidebar shows an *Adjusted yearly payable fees* line alongside the unadjusted figure.
- On save, the audit log records the field change including the reason string.
- The recommendation tab's *Yearly Payable Fees* card carries the adjusted figure.

Notes

- Setting the adjustment back to 0 clears the reason field from view; the previously-entered reason is preserved in `manualAdjustmentReason` but no longer surfaced unless the value goes non-zero again.
- For **re-assessment benchmark honours**, see Compare against year 1 benchmark — the benchmark banner gives the £ delta you should enter here.

15 — Select property category and record red flags

Property category is a **recommendation-tab** field (1–12); red flags live on the assessment form's Section E and surface as banners on the recommendation.

Prerequisites

- Workspace open. You have read the application's "Property and Savings" data and any uploaded title deeds / mortgage statements.

Steps — record red flags (Section E)

1. Expand **Section E. Flags** in the assessment form (open by default).
2. **Dishonesty flag** — tick when there is evidence of misleading or inaccurate information ("Raise if evidence of misleading or inaccurate information").
3. **Credit risk flag** — tick when there are concerns about financial stability or debt ("Raise if there are concerns about financial stability or debt").
4. Blur the checkbox; the change auto-saves.

Steps — choose property category (Recommendation tab)

1. Once the assessment is `COMPLETED`, switch to the **Recommendation** tab. (Selection is gated — see Save the assessment.)
2. In the **Recommendation Details** card, find the **Property Category (1 – 12)** select.
3. Pick the integer that matches the family's primary residence bracket. The threshold for "high property category" is **>= 9** (`PROPERTY_THRESHOLD = 8` in `recommendation-form.tsx`).
4. When category > 8, the amber banner **High Property Category** appears at the top of the tab: *"The selected property category exceeds the standard threshold. Please ensure this is accurately reflected in the recommendation summary and reason codes."*
5. Click **Save Recommendation** at the bottom of the page.

Verification

- On the assessment tab, the red-flag chips remain ticked after a hard refresh.
- On the recommendation tab, the **Dishonesty Flag Active** / **Credit Risk Flag Active** red banners appear when the corresponding flag is on.
- The property advisory banner appears for category 9–12.

Notes

- The 12 property categories are a foundation-level taxonomy; their £-thresholds (notably the £750K boundary) are documented in the Property Category report — see Property category distribution.
- Flags drive the **Red Flag** column in the export (see Export recommendation list) and are listed in the PDF recommendation produced for the school.

16 — Save the assessment

The assessment form auto-saves on every blur (debounced 300 ms) and also exposes explicit **Save**, **Pause**, and **Complete** buttons in the status bar.

Prerequisites

- The workspace is open and the assessment has been started.

Steps

1. Top of the form: the **status bar** shows
 - The status chip (**In Progress** grey / **Paused** amber / **Completed** green).
 - The *Saved hh:mm:ss* indicator (last successful save).
 - Three action buttons (when not read-only):
 - **Save** — manual flush of the form to the server via `saveAssessmentAction`.
 - **Pause** — saves first, then transitions the assessment to `PAUSED` (mirrors *"Request Missing Documents"* on the actions bar, without sending an email).
 - **Complete** — saves, then transitions to `COMPLETED`; disabled while `annualFees === 0`.
2. To save without changing status, click **Save**. The button shows *"Saving..."*; the *Saved* indicator updates on success.
3. To complete: click **Complete**. The status chip flips to **Completed** (green) and the entire form becomes read-only.
4. On completion the assessment becomes the source for the **Recommendation** tab; the latest snapshot of payable fees lands on the bursary account as `latestPayableFees`.

What is persisted

`saveAssessmentAction` writes:

- Section A: `familyTypeCategory`, `notionalRent`, `utilityCosts`, `foodCosts`, `annualFees`, `councilTax`, `schoolingYearsRemaining`.
- Section B: two `Earners` rows (Parent 1 + Parent 2) with full income components.
- Section C: a single `AssessmentProperty` row.
- Section D: `scholarshipPct`, `vatRate`, `manualAdjustment`, `manualAdjustmentReason`.
- Section E: `dishonestyFlag`, `creditRiskFlag`.

- Plus a snapshot of the calculator outputs (`totalHouseholdNetIncome` , `netAssetsYearlyValuation` , `hndiAfterNs` , `requiredBursary` , `grossFees` , `bursaryAward` , `netYearlyFees` , `yearlyPayableFees` , `monthlyPayableFees`) — **the post-adjustment values** are written into the payable-fee columns.

Verification

- Hard-refresh the page; the form re-hydrates with every entered figure intact.
- For `COMPLETED` assessments, the **Recommendation** tab unlocks (otherwise it shows the gate *"Assessment must be completed first"*).

Troubleshooting

- **"Complete" disabled** — `Annual School Fees` is still 0; enter the school's annual fees in Section A.
- **Save error banner** — the red triangle in the status bar shows the server-side error from `saveAssessmentAction` . Common causes: RLS denial (you are no longer assigned), validation failure on a Decimal field. Refresh and check session.

17 — Build the family synopsis

The family synopsis is a short narrative the school's admissions team sees on the recommendation. Suggested content can be derived from the assessment, but the field is free-text.

Prerequisites

- Assessment status is `COMPLETED` (see Save the assessment).
- Application open on the **Recommendation** tab.

Steps

1. Switch to the **Recommendation** tab. The top of the page renders any red-flag banners (dishonesty / credit risk) and the **Assessment Fee Summary** card with *Bursary Award, Yearly Payable Fees, Monthly Payable Fees* (read-only).
2. In the **Recommendation Details** card, find **Family Synopsis** (textarea, 4 rows, resizable). Placeholder reads *"Brief summary of the family's circumstances..."*.
3. Compose 1–3 sentences capturing:
 - Family structure (single parent / couple, number of children).
 - Employment / income context (e.g. "Parent 1 PAYE teacher, Parent 2 self-employed director of small consultancy").
 - Any salient circumstances feeding the recommendation (recent bereavement, sibling at school, etc.).
4. Tab out / blur. The text persists in form state — you save the whole recommendation in one click at the bottom of the page (Record bursary award and payable fees).

Verification

- After clicking **Save Recommendation**, refreshing the tab restores the text exactly.
- The synopsis appears verbatim in the PDF recommendation (Generate pdf for application) and in the **Family Synopsis** column of the export (Export recommendation list).

Notes

- The README mentions *"auto-populated suggestions from assessment data"*. Today's form does not pre-fill the textarea — type it manually using the assessment as your reference. (Pre-fill is spec'd future work.)

- Keep the synopsis factual and neutral; this is a public-facing field shared with the school.

18 — Set accommodation status, income category, property category

These three fields are the school-facing classifications. Income is a **category** (banded), not a precise figure — preserves family privacy while still informing admissions decisions.

Prerequisites

- Recommendation tab open, assessment `COMPLETED`.
- You have already noted the family's accommodation type and income band from the assessment workspace.

Steps

1. In the **Recommendation Details** card, locate the two-column row:
 - **Accommodation Status** (*free-text input*) — placeholder "*e.g. Rented, Mortgaged, Owned outright*". Type the appropriate value verbatim (or the agreed Foundation taxonomy if your team uses fixed strings).
 - **Income Category** (*free-text input*) — placeholder "*e.g. Low, Medium, High*". Enter the band label your team uses (e.g. `£15K-£25K` or `Low`).
2. Below the row, **Property Category (1 – 12)** is a numeric select. Pick the integer that reflects the family's primary residence bracket. When > 8 the amber **High Property Category** advisory banner appears at the top of the tab.
3. The placeholder reads "*Select...*" until set.
4. Click **Save Recommendation** at the bottom of the page when all three fields are filled.

Verification

- After save, the page re-renders with the values pre-filled.
- The export's **Income Category** and **Property Category** columns carry the chosen strings.
- The recommendation PDF includes both fields under the *Categories* section.

Notes

- Accommodation status and income category are free-text today — there is no enum constraint. Agree a fixed vocabulary with your team (typical: *Rented, Mortgaged, Owned outright; Low, Medium, High*) and stick to it; the export grouping relies on consistent spelling.

- The property category is the only banded field anchored to a Foundation policy — see Property category distribution for the £-thresholds used in the report.

19 — Record bursary award and payable fees

These three figures are **read-only on the recommendation tab** — they are pulled directly from the completed assessment and cannot be edited here. If they need to change, go back to the assessment tab.

Prerequisites

- Assessment `COMPLETED`.
- Recommendation tab open.

Steps

1. At the top of the tab, the **Assessment Fee Summary** card shows:
 - **Bursary Award** — pre-VAT bursary in £.
 - **Yearly Payable Fees** — post-VAT, post-manual-adjustment.
 - **Monthly Payable Fees** — yearly / 12.
2. Below them sits the help text *"These values are carried over from the completed assessment and cannot be edited here."*
3. To change any of these:
 - Switch back to the **Assessment** tab.
 - The form is read-only because status is `COMPLETED`. There is no in-app "unlock" — re-opening the assessment after completion requires an admin to reset it (or the assessor to start a new re-assessment in the next round).
4. Once the figures look right, fill in the recommendation fields (synopsis, categories, summary, reason codes) and click **Save Recommendation**.

Verification

- `Recommendation.bursaryAward`, `yearlyPayableFees`, and `monthlyPayableFees` are persisted from the `Assessment` row via `saveRecommendationAction`. Refreshing the page re-displays the same values.

Notes

- Sibling absorption (see Link siblings) is already baked into the assessment's payable fees by the time the recommendation loads — no further adjustment is needed here.
- Where a panel decision requires a different award amount, **do not** edit fields outside the system. Either request the assessment be reopened (admin task) and

apply a manual adjustment, or note the panel decision in the recommendation summary and surface it via a reason code.

20 — Select year-on-year reason codes

Reason codes explain year-on-year changes (or lack of change) in payable fees. Required on re-assessments; optional on new bursaries.

Prerequisites

- Recommendation tab open.
- The reason codes table is populated (admin-managed — see Manage reason codes).

Steps

1. Scroll to the **Reason Codes** card. The header collapses / expands — click the row to reveal the picker.
2. Codes are bucketed into four groups (visible group headers):
 - **1 – 9: Income**
 - **10 – 19: Property & Assets**
 - **20 – 29: Family Circumstances**
 - **30 – 39: Risk Flags**
 - (plus *Other* for anything outside those bands).
3. Each code reads e.g. 7. Significant drop in earnings (illness, job loss) . Tick all that apply.
4. The trigger row shows a primary-blue *N selected* pill whenever the selection is non-empty.
5. Click **Save Recommendation** below the card.

Verification

- The selection chip persists after save and on hard refresh.
- The export's **Reason Codes** column lists the codes (numeric + label) comma-separated.
- The PDF includes the reason-code list under the Year-on-Year Justification heading.

Notes

- The Reason Code Frequency report (Reason code frequency) ranks the codes you and your colleagues most often use; revisit it per round to spot misuse.

- Deprecated codes (admin-marked) do not appear in the picker, but remain visible on historical recommendations that used them.

21 — Write the recommendation narrative

The recommendation summary is the panel-facing detailed write-up. It supplements the family synopsis (shorter, school-facing) with a fuller narrative.

Prerequisites

- Recommendation tab open, assessment **COMPLETED**.

Steps

1. In the **Recommendation Details** card, scroll to **Recommendation Summary** (textarea, 6 rows, resizeable). Placeholder reads *"Detailed recommendation narrative for the panel..."*.
2. Compose the narrative. Useful structure:
 - **Summary of circumstances** — one paragraph echoing and expanding on the family synopsis.
 - **Justification for the bursary level** — why this award percentage is appropriate given the calculation.
 - **Anything unusual** — manual adjustments and their reasons, red flags ticked in the assessment, sibling considerations, panel directions.
 - **Recommendation** — one sentence stating Qualifies / Does Not Qualify and any conditions.
3. Click **Save Recommendation**.
4. After saving, the green status text *"Recommendation saved."* appears beside the button.

Verification

- The summary persists across reload.
- The PDF generated for the school renders the full text under the Recommendation Summary heading (Generate pdf for application).

Notes

- This field is **panel-facing first, school-facing second**. Keep language professional; assume it may be read by the family if they later request a subject access request under GDPR.

- The summary is not exposed in the spreadsheet export — only the family synopsis and the recommendation flags. If the school needs the full narrative, send the PDF.

22 — Complete the assessment

Set the application's outcome to **Qualifies** or **Does Not Qualify**. Triggers an outcome email to the lead applicant and locks the recommendation.

Prerequisites

- Assessment status `COMPLETED`.
- All recommendation fields saved (synopsis, categories, summary, reason codes).
- The application status is `COMPLETED` (not yet terminal).

Steps

1. Scroll to the **Set Application Outcome** card at the bottom of the recommendation tab. Strapline: *"Once the outcome is set, an email is sent to the lead applicant and this recommendation becomes read-only."*
2. Click either:
 - **Qualifies** (green, check icon), or
 - **Does Not Qualify** (rose, X icon).
3. The **OutcomeDialog** opens with title *"Confirm: Qualifies"* or *"Confirm: Does Not Qualify"* and body *"This will mark the application as QUALIFIES / DOES NOT QUALIFY and send an outcome email to the lead applicant. This action cannot be undone."*
4. Click **Confirm Qualifies** / **Confirm Does Not Qualify** in the dialog footer.
5. The server action `setApplicationOutcomeAction` runs:
 - Application status transitions `COMPLETED` → `QUALIFIES` / `DOES_NOT_QUALIFY`.
 - The corresponding outcome email template (`OUTCOME_QUALIFIES` / `OUTCOME_DOES_NOT_QUALIFY`) is sent via Resend.
 - The recommendation form switches to read-only with the slate banner *"This application has a terminal status of QUALIFIES / DOES NOT QUALIFY. Recommendation is read-only."*

Verification

- The status badge at the top of the application shows **Qualifies** (green) or **Does Not Qualify** (red).
- The **Actions** bar on the application detail page disappears (terminal status).
- The audit log records `APPLICATION_STATUS_CHANGED` to the new outcome and the email send.

- The applicant receives the outcome email.

Notes

- The same outcome buttons exist on the actions bar (top of the application detail) when status is `COMPLETED` . Either route writes identical audit entries.
- For GDPR / corrective scenarios (wrong outcome sent), use the audit log to identify the change, then ask an admin to reverse via direct DB intervention — there is no in-app "undo terminal status".

23 — Link siblings

Link this child to another bursary account so their assessments share a family group. Sibling linking changes how the calculator absorbs payable fees — older sibling fees are deducted from family HNDI before computing the younger sibling's bursary.

Prerequisites

- The current application has a `bursaryAccountId` (created on submission).
- The other child also has a `BursaryAccount` in the system (i.e. has registered against any round).
- Signed in as `ASSESSOR` OR `ADMIN`.

Steps

1. Open the application's **Applicant Data** tab. Scroll to the **Sibling Links** section at the bottom.
2. The **Link a Sibling** card sits below the existing **Linked Siblings** list. Strapline: *"Search for another bursary account to link as a sibling. Siblings are assessed sequentially — the older child's payable fees are deducted from the family HNDI before calculating the younger child's bursary."*
3. Type into the search box — placeholder *"Search by child name, reference, or email..."*. Query is debounced 300 ms and hits `GET /api/siblings/search?q=...`.
4. Results dropdown shows each match: child name, school, reference, lead applicant email. The current child is greyed out with *(current child)* and offers no link button.
5. Click **Link as Sibling** on the row you want to link. The icon spinner shows *"Linking..."*.
6. On success: toast *"<Child name> linked as sibling successfully"*; the **Linked Siblings** card refreshes with the new row.

What happens server-side

- `POST /api/siblings` either creates a new `FamilyGroup` or joins the current child to the existing group of the target account.
- A `SiblingLink` row is written for the current child (and one for the target child if not already present).
- An audit entry records the link.

Verification

- The **Linked Siblings** card shows both children with priority badges (1, 2, ...). The current child has the primary-navy **This child** chip.
- Re-opening the assessment workspace shows the older sibling's yearly payable fees absorbed in the calculation sidebar.

Troubleshooting

- *"Cannot link an account to itself"* — clicked **Link** on the current child row. Pick a different account.
- *"Failed to create sibling link"* — typically duplicate link or RLS; refresh the page and check the existing list.

24 — Re-order sibling priority

Sibling priority controls the order of fee absorption. The eldest / primary holder sits at priority 1; their fees are deducted from family HNDI before the next sibling is calculated.

Prerequisites

- Two or more siblings are linked (see Link siblings).
- Signed in as `ASSESSOR` or `ADMIN`.

Steps

1. Open the **Applicant Data** tab. The **Linked Siblings** card shows each linked child as an ordered list, with priority badges 1 ...N.
2. To move a sibling up or down, use the arrow buttons on the right of each row:
 - **ArrowUp** — promote one place (disabled at position 1).
 - **ArrowDown** — demote one place (disabled at the last position).
3. The local list re-renders optimistically; the request fires to `PATCH /api/siblings/[id]` with the new `orderedIds` array.
4. If the server rejects the reorder, an inline red banner reads e.g. *"Reorder failed"* and the list rolls back to the previous order.

What this changes

- The new `priorityOrder` on each `SiblingLink` row.
- On the next assessment save / recalculation, the calculator absorbs the payable fees of all siblings with a lower `priorityOrder` than the child being assessed.

Verification

- The badge numbers update immediately and persist on refresh.
- Open the calculation sidebar on the re-assessment of any later sibling — the *Sibling payable fees absorbed* line reflects the new order.

Common use case

When the eldest child leaves school (Y13), they no longer carry payable fees. Demote them in priority or unlink (see Break sibling link) so the next sibling becomes primary and their assessment recalculates correctly.

25 — Break a sibling link

Remove a single sibling from the family group. Both children's future calculations are recomputed without absorption.

Prerequisites

- The two children are currently linked.
- Signed in as `ASSESSOR` or `ADMIN`.

Steps

1. Open the **Applicant Data** tab, scroll to **Linked Siblings**.
2. On the sibling row you want to remove, click the **Unlink** ghost button (unlink icon, right-most).
3. The row expands to an inline confirmation panel: *"Remove <Child name> from this sibling group?"* with **Cancel** and **Confirm Unlink** (rose) buttons.
4. Click **Confirm Unlink**. The request is `DELETE /api/siblings/[id]`.
5. On success the row disappears from the list. If the family group now has 0 or 1 members, the group itself remains as a stub but is no longer surfaced.

What changes server-side

- The `SiblingLink` row is hard-deleted.
- An audit entry records the unlink.
- Subsequent assessments for either child will not absorb the other's payable fees.

Verification

- The **Linked Siblings** card no longer shows the removed child.
- The calculation sidebar on either child's next assessment refresh does not show the *Sibling payable fees absorbed* line for the removed sibling.

Troubleshooting

- *"Failed to remove sibling link"* — usually an RLS / permission issue; verify the current user is `ASSESSOR` or `ADMIN` and assigned to the application.
- The other child's previously-saved assessments are **not** retroactively re-calculated. If a historical assessment now looks wrong, open it and re-save to refresh the snapshot (Save the assessment).

26 — Open a re-assessment

Re-assessments are second-or-later-year applications for the same `BursaryAccount`. The detail view surfaces prior-year data and the year-1 benchmark for direct comparison.

Prerequisites

- The applicant was invited via the batch re-assessment flow (see Batch reassessment invitations) or by an internal request that re-uses an existing `bursaryAccount`.
- The applicant has submitted the new application (status `SUBMITTED`).

Steps

1. From `/queue`, identify re-assessment applications by the orange **Re-assessment** chip in the header card (`isReassessment === true`).
2. Open the application (see Open an application). The header shows the **Re-assessment** pill alongside the school and round information.
3. Switch to the **Assessment** tab. **Before** the workspace renders, two extra panels appear at the top:
 - **First year benchmark** banner (`BenchmarkDisplay`) — see Compare against year 1 benchmark. Reads e.g. *"First year benchmark: £4,200/year — This is the payable fees figure established in the first year of the bursary..."*
 - **Year-on-Year Comparison** table (`YearComparison`) — eight rows showing the previous year's figures against the current year, with up/down trend icons and red/green colour coding.
4. Below those panels sits the standard split-screen workspace. Click **Begin Assessment** as usual (or if already started, the form is already open).

Verification

- The header pill **Re-assessment** is present.
- The Year-on-Year table's header reads *"Previous application: <reference> (<prior academic year>)"*.
- If no previous assessment exists despite `isReassessment === true`, the comparison panel falls back to *"No previous year assessment data available for comparison."*

Notes

- The applicant data tab works exactly the same on a re-assessment; it shows the current submission only. Cross-reference prior-year data via the previous application's record under the same bursary account (visible through the sibling link or the bursary account history).
- Re-assessments must still pick reason codes (Select reason codes) to justify the change (or no change) vs. year 1.

27 — Compare against the year-1 benchmark

The first-year payable fees figure is stored on the bursary account as `benchmarkPayableFees`. On re-assessments, the system surfaces it and warns if the current year's calculation falls below it. The benchmark is **advisory** — the assessor decides whether to honour it.

Prerequisites

- A re-assessment is open (see Open a reassessment).
- The bursary account has a `benchmarkPayableFees` value (set when the first assessment completed).

Steps

1. On the **Assessment** tab, read the **First year benchmark** banner. Default (within benchmark) styling is info-blue; below-benchmark styling is amber.
2. The banner shows two lines:
 - *"First year benchmark: £X,XXX/year"* (monospace).
 - *"This is the payable fees figure established in the first year of the bursary. It serves as a reference floor for re-assessments."*
3. As you enter Stage 1–4 figures in the workspace, the live calculation feeds the banner. If the current year's *Yearly Payable Fees* is below the benchmark:
 - The banner flips to amber.
 - An inline advisory appears: *"Below first year level — Current yearly payable fees (£A,AAA) are £B below the first year benchmark. Review before finalising the assessment."*
4. Decide:
 - **Honour the benchmark** — apply a positive Manual Adjustment equal to the £ delta shown in the advisory; see Apply manual adjustment. Record the reason e.g. *"Honouring year-1 benchmark per Foundation policy."*
 - **Allow the lower figure** — leave the adjustment at 0 and document the rationale in the Recommendation Summary (Write recommendation narrative) and reason codes.
5. When the current year is **above or equal** to the benchmark, the banner stays info-blue and shows *"Current year: £A,AAA/year (<delta> above benchmark)"*.

Verification

- The banner colour matches the current state (info-blue $\geq$ benchmark, amber $<$ benchmark).
- The delta shown matches your manual adjustment when honouring the benchmark.

Notes

- The benchmark is **never silently applied** — the calculation engine does not floor the result. It is purely a visual warning; honouring it requires an explicit Manual Adjustment.
- The benchmark itself is set once at the completion of the first year's assessment and rolls forward unchanged through subsequent years
(`BursaryAccount.benchmarkPayableFees`).

28 — Pick reason codes (re-assessment)

On a re-assessment, reason codes are not optional — the recommendation must explain why the payable fees changed (or stayed the same) relative to the prior year.

Prerequisites

- Re-assessment open on the **Recommendation** tab.
- Assessment status `COMPLETED`.

Steps

1. Read the **Year-on-Year Comparison** panel (Assessment tab) before coming to the recommendation; identify which figures moved up or down and why.
2. On the **Recommendation** tab, expand the **Reason Codes** card.
3. Tick all codes that justify the year-on-year movement. Typical pairings:
 - Income up → codes in the **1–9: Income** bucket (e.g. "Significant pay rise", "New employment").
 - Income down → "Significant drop in earnings (illness, job loss)", "Self-employed business decline".
 - Property purchase / re-mortgage → **10–19: Property & Assets** codes.
 - New dependent / bereavement → **20–29: Family Circumstances**.
 - Honesty / credit concern raised → **30–39: Risk Flags**.
4. If nothing changed, still select at least one "no change" confirmation code (typically code 0/9 — confirm the exact code with your team's convention).
5. Save the recommendation.

Verification

- The trigger row pill shows the count of selected codes.
- The export and PDF carry the full list of codes (number + label).
- The Reason Code Frequency report (Reason code frequency) reflects the new selections immediately for the round.

Notes

- Deprecated codes do not appear in the picker but remain visible on recommendations that selected them previously.

- If the code you need does not exist, ask an admin to add it (see Manage reason codes). Do not improvise via the free-text summary alone — the export grouping relies on codes.

29 — Generate a PDF for one application

Download a single-application PDF recommendation. Used for hand-off to the school's admissions team where they prefer a per-case document over a row in the spreadsheet.

Prerequisites

- The recommendation exists (i.e. **Save Recommendation** has been clicked at least once).
- Application is open on the **Recommendation** tab.

Steps

1. At the top-right of the recommendation tab, click the **Download PDF** button (file-download icon, slate outline). The link points to `/api/pdf/recommendation/[applicationId]`.
2. The route streams a PDF generated with `@react-pdf/renderer` server-side. Browsers download it as `recommendation-<reference>.pdf` (default filename comes from the API's `Content-Disposition`).
3. The PDF contains:
 - Application reference, school, round, entry year.
 - The family synopsis.
 - Accommodation status, income category, property category.
 - Bursary award, yearly + monthly payable fees.
 - Red-flag indicators (if any).
 - Reason codes (number + label).
 - Recommendation summary narrative.

Verification

- The downloaded file opens in any PDF reader.
- All figures match the recommendation tab's current display.

Troubleshooting

- **404 from the API** — the recommendation has not been saved yet. Click **Save Recommendation** first.
- **403** — your session no longer has `ASSESSOR` / `ADMIN` / `VIEWER` rights, or the application has been GDPR-deleted.

- **Stale figures** — the PDF reads from the current DB row. If you edit the recommendation, save before downloading.

Notes

- For bulk hand-off across the whole round, use the spreadsheet export instead — see Export recommendation list.
- The PDF is regenerated on every request; there is no caching layer.

30 — Export recommendation list (CSV / XLSX)

Bulk export of every application with a completed recommendation for a given round, optionally filtered by school. One row per application.

Prerequisites

- Signed in as `ASSESSOR`, `ADMIN`, or `VIEWER`.
- At least one round with recommendations.

Steps

1. Sidebar → **Exports**. You land at `/exports` under the heading **Export Recommendations** with strapline *"Download a spreadsheet of recommendation data for a selected assessment round. Only applications with a completed recommendation are included."*
2. In the **Download Options** card, configure:
 - **Assessment Round** — required. Defaults to the most recently opened round. Each option shows `<academicYear> (STATUS)`.
 - **School Filter** — *All Schools* (default), *Trinity*, or *Whitgift*.
 - **File Format** — *Excel (XLSX)* (default) or *CSV*.
3. Click the **Download** button (the **ExportButton** at the bottom). It calls `GET /api/exports/recommendations?roundId=...&school=...&format=...`.
4. The browser saves the file. Default filename: `recommendations-<academicYear>.<format>`.

Columns

The export carries one row per qualifying application:

- Application reference, school, round, entry year.
- Family synopsis, accommodation status, income category, property category.
- Bursary award (£), yearly payable fees (£), monthly payable fees (£).
- Red-flag columns — dishonesty, credit risk (Y / N).
- Reason codes (comma-separated `code. label`).
- Outcome (Qualifies / Does Not Qualify / Pending).

Verification

- Open the XLSX in Excel / Numbers / Google Sheets; column widths are pre-set via ExcelJS.
- Row count matches the number of completed-recommendation applications for the chosen round / school filter.

Notes

- Applications without a saved recommendation are excluded — they contribute no row.
- For GDPR-sensitive distribution, the export does **not** include the applicant's full name or email. It does include the family synopsis, which may contain identifying detail; redact before emailing externally if your team's policy requires it.
- For a single application, generate the PDF instead — see Generate pdf for application.

31 — Round summary

The round-level totals — total applications, by status, by outcome, and by school for the currently-selected round.

Note: today's `/reports` page does not yet include a dedicated *Round summary* section. The information described below is partly derived from the **School Comparison** section and the round selector. A purpose-built **Round summary** section is spec'd and tracked separately; this guide reflects the README intent.

Prerequisites

- Signed in as `ASSESSOR`, `ADMIN`, or `VIEWER`.
- At least one round exists.

Steps

1. Sidebar → **Reports**. You land at `/reports` under the heading **Reports** with strapline *"Aggregate statistics for each assessment round."*
2. Use the **Round selector** (top-right of the page) to pick the round. The active round is selected by default. The URL updates with `?roundId=...`.
3. Read the **School Comparison** card — *"Side-by-side comparison of Trinity and Whitgift applications for this round."* — to get the per-school breakdown:
 - **Total applications** count.
 - **Avg bursary award** (%).
 - **Avg monthly payable fees** (£).
4. For per-status / per-outcome totals, cross-reference with `/queue` filtered by round (see Triage the queue) and the **Status** popover.

Verification

- The School Comparison cards render values for both schools.
- The round selector reflects the round you chose; the URL contains the matching `roundId`.

Notes

- An at-a-glance dashboard with status counts already exists on `/admin` (the admin dashboard) — open it for a live tile view of the queue across all rounds.

- A purpose-built **Round summary** card on `/reports` is on the roadmap and will surface in this section once shipped.

32 — Bursary awards

Distribution of recommended bursary award percentages across applications in the selected round.

Prerequisites

- Signed in as `ASSESSOR`, `ADMIN`, or `VIEWER`.
- A round with at least one saved recommendation.

Steps

1. Sidebar → **Reports** (`/reports`).
2. Pick the round in the top-right round selector. The URL becomes `/reports?roundId=...`.
3. Use the sticky in-page section nav to jump to **Award Distribution**, or scroll directly to the **Award Distribution** card.
4. Read the strapline: *"Distribution of recommended bursary award percentages across all applications with a recommendation."*
5. The horizontal bar chart shows count per band (e.g. `0–25%`, `26–50%`, ..., `91–100%`). Bands `91–100%` and `76–90%` are highlighted (primary navy) to make the higher-award tail immediately legible.
6. Hover any bar to see the count + percentage of total.

Verification

- Total of band counts equals the round's completed-recommendation count.
- When the round has no recommendations, the card shows the empty state *"No data for this round yet"*.

Notes

- "Bursary award" here is the % of gross fees covered, not the £ bursary amount. For £-totals and averages, see the **School Comparison** card on the same page.
- Trend across rounds is not currently in this section; track via the per-round drill-down (change the round selector) and compare values externally.

33 — Income distribution

Histogram of household net income across assessed applications in the selected round.

Prerequisites

- Signed in as `ASSESSOR`, `ADMIN`, or `VIEWER`.
- A round with at least one assessed application.

Steps

1. Open **Reports** (`/reports`).
2. Pick the round in the selector.
3. Jump to or scroll to the **Income Bands** card. Strapline: *"Distribution of household net income across assessed applications."*
4. The horizontal bar chart breaks the population into income bands computed from `Assessment.totalHouseholdNetIncome`. Bands include counts and percentages.

Verification

- Each bar shows a count; the chart's footer (legend / hover) shows the percentage of the round total.
- Empty state *"No data for this round yet"* appears when zero assessments exist.

Notes

- The income figure plotted is the calculated household net income, not the applicant's declared total. For the underlying definition, see `src/lib/assessment/stage1-income.ts`.
- The bands themselves are defined in `src/lib/db/queries/reports.ts` → `getIncomeBandDistribution`; review there if a band feels wrong for your population.

34 — Property category distribution

Count of applications per property category (1–12). The Foundation's £750K threshold sits between categories — typically category 8–9 — and is worth scrutinising when reviewing the chart.

Prerequisites

- Signed in as `ASSESSOR`, `ADMIN`, or `VIEWER`.
- A round with recommendations that have a saved property category.

Steps

1. Open **Reports** (`/reports`).
2. Pick the round in the selector.
3. Jump to or scroll to the **Property Categories** card. Strapline: *"Distribution of applicants by property ownership category."*
4. The horizontal bar chart renders one bar per category that has at least one application. Labels read `Category 1`, `Category 2`, ...
5. Hover any bar for count and percentage.

Verification

- Sum of bar counts equals the count of saved recommendations with a non-null `propertyCategory`.
- Empty state *"No data for this round yet"* when zero rows.

Notes

- The recommendation form raises an amber **High Property Category** banner for category > 8 (see Property category and flags). Categories 9–12 in this report correspond to that threshold; the £750K policy line typically sits inside this range.
- Re-categorisation: if a recommendation's property category looks wrong, open the recommendation, change the value, and save. The report updates on next render.

35 — Reason code frequency

Ranked list of reason codes used across recommendations in the selected round.

Prerequisites

- Signed in as `ASSESSOR`, `ADMIN`, or `VIEWER`.
- A round with saved recommendations that have at least one reason code selected.

Steps

1. Open **Reports** (`/reports`).
2. Pick the round in the selector.
3. Jump to or scroll to the **Reason Code Frequency** card. Strapline: *"Most-used reason codes across all recommendations in this round, ranked by frequency."*
4. The table shows four columns:
 - **Rank** — position in the frequency order.
 - **Code** — the numeric code in monospace.
 - **Reason** — the label, with a thin horizontal bar visualising the count relative to the most-used code.
 - **Uses** — the integer count.
5. Empty state *"No reason codes recorded for this round."* if no codes have been selected.

Verification

- The top entry's bar fills 100%.
- The sum of all *Uses* equals the total reason-code selections (one recommendation can contribute multiple).

Notes

- Use this report at the end of each round to spot codes that are over- or under-used:
 - A code with zero uses across multiple rounds is a candidate for deprecation (admin task — Manage reason codes).
 - A code used heavily may need to be split into sub-codes for finer reporting.
- Compare round-on-round trends by switching the round selector.

36 — Active bursaries approaching final year

List of bursary holders entering their final school years (Y12 / Y13) so the foundation can plan succession (who replaces them in the priority order for siblings, communication, etc.).

Prerequisites

- Signed in as `ASSESSOR` , `ADMIN` , or `VIEWER` .
- Bursary accounts in the system with a recorded entry year-group and active status.

Steps

1. Open **Reports** (`/reports`).
2. Select the **Final-Year Bursaries** tab from the report tab strip. This report spans all rounds, so the round selector does not narrow it — every ACTIVE account in the final-year cohort is shown.
3. The table lists, final year (Y13) first then by reference:
 - Bursary account reference.
 - Child name (subject to the standard name-reveal audit gate).
 - School.
 - Entry year and current year group.
 - Years remaining (0 or 1 for this cohort).
 - Latest yearly payable fees (from the most recent recommendation).
 - Linked sibling count (excluding the account itself).
4. Use it to identify the Y12 / Y13 cohort and plan re-prioritisation of any linked siblings (see Reorder sibling priority).

Notes

- "Final year" is derived from the entry year-group (the source of truth), using the same formula as the assessment form: an account is in the cohort when `FINAL_SCHOOL_YEAR - currentYearGroup` is 0 or 1.
- The report sits alongside the other sections under `/reports` ; pair it with Sibling bursary summary for succession decisions.

37 — Sibling bursary summary

Families with two or more linked bursary accounts, with combined totals (number of children, combined yearly payable fees, combined bursary award).

Prerequisites

- Signed in as `ASSESSOR`, `ADMIN`, or `VIEWER`.
- Sibling links exist (see Link siblings).

Steps

1. Open **Reports** (`/reports`).
2. Select the **Sibling Summary** tab from the report tab strip. This report spans all rounds, so the round selector does not narrow it. Single-child family groups are excluded — only families with two or more linked accounts appear.
3. The table groups rows by `FamilyGroup`, showing per family:
 - Family group reference / ID.
 - Children count (linked siblings).
 - Child names + school + reference (subject to name-reveal audit).
 - Combined yearly payable fees (sum of each account's latest recommendation).
 - Combined bursary award (sum across siblings).
4. Sort by combined bursary award to spot the highest-cost families.

Notes

- Linked families inherit sibling-aware calculations automatically — the report is an after-the-fact summary, not a calculation step.
- Per-child figures come from each account's most recent recommendation. Pair this with Active bursaries final year for succession decisions.

Admin Walkthroughs

Admin Walkthroughs

The Admin owns the **system itself** — rounds, reference data, staff accounts, GDPR, email templates, audit trails. They set up the infrastructure that assessors and applicants then use.

Foundation staff with the Admin role can do everything an Assessor can, plus the system-level workflows listed below. In practice one person may wear both hats day-to-day; the split here is by responsibility area, not by employee.

Workflows

Each item below has its own guide in this folder.

Round lifecycle

- **Create a new assessment round** — set the academic year label, application open date, close date, and the funding-decision target date. Round starts in **DRAFT** status.
- **Open a round** — transition a **DRAFT** round to **OPEN**. Only one round can be **OPEN** at a time; the system blocks opening a second one. Applicants can only register against an **OPEN** round.
- **Close a round** — transition an **OPEN** round to **CLOSED**. No new applications can be submitted against it after closure; existing in-flight applications can still be assessed.
- **View historical rounds** — every prior round remains visible for reporting and re-assessment comparison.

Reference data management

Each of these is a separate guide because each table has its own shape and "effective date" semantics.

- **Edit family type categories** — the six categories (1–6) and their notional rent, utility costs, and food costs. Changes apply to new assessments only; historical assessments retain the values in effect at the time.
- **Edit school fees** — annual fees per school (Trinity, Whitgift), pre-VAT. Same effective-date model as above.

- **Edit the council tax default** — Band D Croydon by default; editable.
- **Manage reason codes** — the ~35 year-on-year reason codes used on re-assessments. Add new codes, edit labels, mark codes deprecated (deprecated codes hide from new assessments but remain visible on historical records), set sort order.
- **Edit email templates** — subject and body for the seven email templates (invitation, submission confirmation, missing documents, outcome qualifies, outcome does not qualify, re-assessment invitation, reminder). Merge fields are documented inline in the editor.

Staff and applicant invitations

- **Invite a staff member** — send a `/register/staff` invitation to a new admin, assessor, or viewer. Triggered from the Users page; the recipient sets their own password via the registration link.
- **Batch re-assessment invitations** — at the start of a new round, email every active bursary holder a re-assessment invitation in one action. The batch creates one invitation row per active bursary account, pre-populated with the child and round.
- (Single applicant invitations as part of round intake are an Assessor workflow — see `../assessors/`.)

Privacy and compliance

- **Delete an applicant under GDPR** — two-step confirmation; purges the applicant's profile, application data, uploaded documents, assessment record, and recommendation. An audit-log entry is created with no personal data in the entry itself. Subject to the 7-year retention guard for active or recently-closed bursaries.
- **Audit log review (system-wide)** — open the audit page, filter by user / action / entity / date range, and confirm sensitive events (name reveals, document grants, deletions, status changes) are logged with timestamp + user.

Operations

- **Reset another staff member's MFA** — when an assessor loses their authenticator device. Requires admin access to the Supabase dashboard or MCP (delete the row in `auth.mfa_factors`). **NOTE:** staff MFA (B8) shipped to production and is enforced; an admin can reset another staff member's factor from the Users page,

with the Supabase-dashboard/MCP route as the manual fallback. The decision record is archived at `docs/archive/backlog/b8-mfa-for-admin-and-assessor.md`.

- **Re-send or revoke an invitation** — when an invitation email is lost, expired, or sent in error. Re-send pushes a fresh link; revoke marks the invitation expired so the link cannot be used.
- **Force redeploy or run a one-off migration** — covered by the technical/operational runbook (`docs/ops guide`, separate from this folder).

Cross-link

Admins are also Assessors. For day-to-day applicant case work — the queue, assessments, recommendations, exports, sibling linking, internal/ad-hoc requests — see `../assessors/`.

01 — Create a new assessment round

Creates a new round in **DRAFT** status. Applicants cannot register against a **DRAFT** round — it must be opened separately (see Open a round).

Prerequisites

- You are signed in as a user with the **ADMIN** role.
- You know the academic year label (format **YYYY/YY**, e.g. **2026/27**), the open and close dates, and ideally the funding-decision target date.

Steps

1. From the admin sidebar, click **Rounds**.
 - You land on **/rounds** under the heading **Assessment Rounds**.
2. Click the **Create Round** button (top-right of the page).
3. The dialog **Create Assessment Round** opens. Fill in:
 - **Academic Year** — e.g. **2026/27**.
 - **Open Date** — the date applicants can begin registering.
 - **Close Date** — must be after Open Date.
 - **Decision Date** (*optional*) — must be after Close Date.
4. Click **Create**.
5. The dialog closes and you return to **/rounds**. The new round appears in the table with status badge **DRAFT** (grey).

Verification

- The round is listed in the **Assessment Rounds** table with the correct Academic Year, Open Date, and Close Date.
- The status column reads **DRAFT**.
- Click the year to open **/rounds/[id]**; the summary cards all show **0** because no applications exist yet.

Next step

Open the round when you are ready for applicants to register — see Open a round.

02 — Open a round

Transitions a **DRAFT** round to **OPEN**. Only one round can be **OPEN** at a time — the system blocks opening a second one.

Prerequisites

- The round exists in **DRAFT** status (see Create new assessment round).
- No other round is currently **OPEN**. If there is, close it first (see Close a round).
- You are signed in as **ADMIN**.

Steps

1. From the sidebar, click **Rounds**.
2. Locate the **DRAFT** row for the round you want to open.
3. In the **Actions** column, click **Open Round**.
4. A confirmation dialog appears: "**Open Round {year}?**" with the warning that only one round can be open at a time.
5. Click **Open Round** to confirm.

Verification

- The status badge for that row changes from **DRAFT** (grey) to **OPEN** (green).
- The applicant `/register` flow now accepts registrations against this round.
- An audit entry (`ROUND_OPENED` or equivalent) appears in `/audit` — see Audit log review.

Troubleshooting

- **"Another round is already open"** — close the other round first (see Close a round) and retry.
- **No Open Round button visible** — the round is not in **DRAFT**. It may already be **OPEN** or **CLOSED**.

03 — Close a round

Transitions an `OPEN` round to `CLOSED`. After closure, no new applications can be submitted, but existing in-flight applications can still be assessed.

Prerequisites

- The target round is in `OPEN` status.
- You are signed in as `ADMIN`.

Steps

1. Sidebar → **Rounds**.
2. Find the `OPEN` row.
3. In the **Actions** column, click **Close Round**.
4. Confirm in the dialog.

Verification

- The status badge changes from **OPEN** (green) to **CLOSED** (grey).
- New attempts to register against this round are rejected.
- Applications already in flight (`SUBMITTED`, `NOT_STARTED`, `PAUSED`, `COMPLETED`, `QUALIFIES`, `DOES_NOT_QUALIFY`) remain editable by assessors.

After closing

- To start a new cycle, create the next round (see Create new assessment round) then open it (see Open a round).
- Closed rounds remain visible in the table for reporting — see View historical rounds.

04 — View historical rounds

Every prior round (any status) remains visible for reporting and re-assessment comparison.

Steps

1. Sidebar → **Rounds**. The `/rounds` list shows every round ever created, ordered by academic year.
2. Each row displays:
 - **Academic Year**
 - **Status** — DRAFT / OPEN / CLOSED badge
 - **Open Date, Close Date**
 - **Pre-Sub / Submitted / In Progress / Complete** counts
3. Click the academic year to open `/rounds/[id]`.

What the round detail page shows

- Round heading, status badge, and the three key dates (Opens, Closes, Decision).
- **Summary cards**: Total Applications, Submitted, Assessment In Progress, Completed, Qualifies, Does Not Qualify.
- **School breakdown** table: count of applications per school (Trinity, Whitgift).
- Action buttons relevant to the round status — for a `CLOSED` round these are read-only / disabled.

Drill-down

- Click into individual applications from a closed round to review recommendations, exports, or PDF outputs.
- For cross-round trends, use the **Reports** page (sidebar → Reports) which charts data across all rounds.
- For year-on-year comparison of a single bursary holder, open the current application — the previous round's data is referenced via the assessment's reason codes.

05 — Edit family type categories

The six family-type categories (1–6) each carry a notional **rent**, **utility costs**, and **food costs** figure. These feed the income assessment calculation. Edits are versioned: changes apply to new assessments only, while historical assessments retain the values in effect at the time they were finalised.

Prerequisites

- Signed in as `ADMIN`.
- You have the new figures ready (annual £ amounts).

Steps

1. Sidebar → **Settings**. You arrive at `/settings`.
2. Click the **Family Types** tab (first tab).
3. The table lists the six categories with columns: **Family Type | Notional Rent | Utility Costs | Food Costs | Actions**.
4. Find the category you want to update. Click **Edit** in its Actions cell.
5. Update one or more of the three numeric fields.
6. Click **Save**.

Verification

- The row in the table now shows the updated values.
- An informational notice on the page reads *"Changes are versioned. The most recent entry per category is used in new assessments."*
- Open any **in-progress** application's assessment page — the calculation pulls the new figures.
- Open any **already-completed** assessment — the legacy figures are preserved.

Notes

- There is no "delete" — the previous record is kept for historical fidelity. The new record supersedes it for any assessment created from now on.
- See also: Edit school fees, Edit council tax default.

06 — Edit school fees

Each school (Trinity, Whitgift) has an annual fee, **pre-VAT**. The system applies 20% VAT on top when computing the bursary contribution. Like family types, fee edits are versioned.

Prerequisites

- Signed in as `ADMIN`.
- You have the new annual fee (pre-VAT, in £) for the school.

Steps

1. Sidebar → **Settings** (`/settings`).
2. Click the **School Fees** tab (second tab).
3. The table shows: **School | Annual Fees | Effective From | Actions**.
4. For the school you need to update, click **Edit**.
5. Enter the new annual fee (pre-VAT).
6. Click **Save**. A new row is created with today's effective date; the previous row remains as history.

Verification

- The latest row for that school shows the new fee and today's **Effective From** date.
- New assessments use `fee × 1.20` (VAT applied automatically).
- Historical assessments retain the fee that was in effect when they were calculated.

Notes

- Do **not** apply VAT manually — the calculation does it.
- See also: Edit family type categories, Edit council tax default.

07 — Edit the council tax default

The system uses a default council tax figure (Band D, Croydon) in the income calculation when an applicant's actual figure is not captured. The value is versioned like other reference data.

Prerequisites

- Signed in as `ADMIN`.
- You have the new annual council tax figure for Band D Croydon (£).

Steps

1. Sidebar → **Settings** (`/settings`).
2. Click the **Council Tax** tab (third tab).
3. The page shows the **Council Tax Default** card — currently Band D, Croydon — with the current annual figure.
4. Click **Edit** (or enter the value directly into the input).
5. Type the new annual figure.
6. Click **Save**.

Verification

- The card now displays the new figure with today's effective date.
- New assessments use the new figure; historical assessments retain the value at the time they were calculated.

Notes

- The label "Band D, Croydon" is fixed — only the figure changes.
- See also: Edit family type categories, Edit school fees.

o8 — Manage reason codes

Reason codes are the standardised explanations assessors attach to year-on-year re-assessment decisions. Around 35 ship with the system. You can add, edit, or deprecate codes. Deprecated codes are hidden from new assessments but remain visible on historical records.

Prerequisites

- Signed in as `ADMIN`.

Steps — add a code

1. Sidebar → **Settings** (`/settings`).
2. Click the **Reason Codes** tab (fourth tab).
3. Click **Add Reason Code**.
4. Enter the **code** (short key) and **label** (user-facing text).
5. Set the **sort order** (lower numbers appear first in dropdowns).
6. Click **Save**.

Steps — edit a code

1. Same tab, find the code row.
2. Click **Edit** in its Actions cell.
3. Update label and/or sort order. The code key itself should not change once it has been used on assessments.
4. Click **Save**.

Steps — deprecate a code

1. Same tab, find the code row.
2. Click **Deprecate** in its Actions cell.
3. Confirm.

The note on the page reads

"Deprecated codes are hidden from assessors but retained for historical records."

Verification

- New codes appear in the assessor's reason-code dropdown on the recommendation page.

- Deprecated codes no longer appear in dropdowns but are still displayed on assessments and PDFs that already reference them.

09 — Edit email templates

The system sends seven transactional emails: invitation, submission confirmation, missing documents, outcome qualifies, outcome does not qualify, re-assessment invitation, and reminder. The subject line and body are editable per template; merge fields are documented inline in the editor.

Prerequisites

- Signed in as `ADMIN`.

Steps

1. Sidebar → **Settings** (`/settings`).
2. Click the **Email Templates** tab (fifth tab).
3. Choose a template from the list (e.g. *Invitation*, *Outcome Qualifies*).
4. Edit the **Subject** field.
5. Edit the **Body** field. Use merge fields shown inline — for example `{{applicant_name}}`, `{{child_name}}`, `{{school}}`, `{{round_year}}`, `{{deadline}}`, `{{registration_link}}`. Only the merge fields listed for that specific template will resolve.
6. Click **Save**.

Verification

- Trigger the relevant flow in a non-production environment (e.g. send a test invitation from Invite a staff member or Batch reassessment invitations).
- Confirm the received email shows the updated subject and body with merge fields populated.

Notes

- Email templates are seeded by the `*_seed_email_templates` migration — edits made in the UI persist in the database and override the seed.
- Keep the `{{registration_link}}` merge field in invitation templates — removing it will break the registration flow.

10 — Invite a staff member

Sends a registration link to a new admin, assessor, or viewer. The recipient sets their own password via the link.

Prerequisites

- Signed in as `ADMIN`.
- You know the staff member's work email and which role to assign:
 - `ASSESSOR` — full case-work access.
 - `VIEWER` — read-only access.
 - (To create another `ADMIN`, the user must be promoted after initial invitation — see Notes below.)

Steps

1. Sidebar → **Users**. You arrive at `/users` under the heading **User Management**.
2. Locate the **Invite Staff Member** section.
3. Fill the form:
 - **Email** (*required*) — e.g. `staff@example.com`.
 - **First Name** (*optional*).
 - **Last Name** (*optional*).
 - **Role** (*required*) — choose **ASSESSOR** or **VIEWER**.
4. Click **Send Invitation**.

Verification

- The recipient receives the invitation email (template configurable via Edit email templates).
- A new row appears in the **Staff Users** table with status reflecting the pending state.
- The recipient clicks the link, lands on `/register/staff`, sets a password, and signs in.

Changing role or deactivating later

- In the **Staff Users** table, use the row's **Actions** to switch `ASSESSOR` ☐ `VIEWER`, or to **Deactivate** the user (marks them `DELETED` and removes them from active assignments).

- You cannot change your own role.

Notes

- To promote a staff member to `ADMIN`, change their role from the table actions after they have accepted the invitation.
- If the invitation email is lost or expired, see Resend or revoke invitation (the same resend/revoke pattern applies for applicant invitations and is the canonical reference).

11 — Batch re-assessment invitations

At the start of a new round, email every active bursary holder a re-assessment invitation in one action. The batch creates one invitation row per active bursary account, pre-populated with the child and round.

Prerequisites

- Signed in as `ADMIN`.
- A round is in `OPEN` status (see Open a round).
- The active-bursary holders from prior rounds are the population that will receive the batch.

Steps

1. Sidebar → **Rounds**. The list at `/rounds` shows every round.
2. Click the academic year of the `OPEN` round you want to batch-invite for. You land on `/rounds/[id]` (the round-detail page).
3. In the round's actions group, click **Send Invitations**. A dialog opens listing the active bursary holders that will be invited for this round.
4. Review the list. Each row shows applicant email, child name, and school. Bursary accounts that already have a `PENDING` or `ACCEPTED` invitation for this round are excluded automatically (the batch is idempotent).
5. Confirm by clicking the send button in the dialog.

Verification

- The dialog confirms the count of invitations sent.
- The **Invitation History** table on `/invitations` now contains one `PENDING` row per recipient, each tagged with this round.
- Recipients receive the *Re-assessment Invitation* email (template editable via Edit email templates).
- Each link routes the applicant to the registration / re-assessment flow with their child and round pre-selected.

Re-running

- The batch is safe to re-trigger — recipients who already have a `PENDING` or `ACCEPTED` invitation for that round are skipped (no duplicates). For lost emails on

individual invitations, use the per-row **Resend** action — see Resend or revoke invitation.

Notes

- Single applicant invitations for first-time applicants are an Assessor workflow, not Admin. See `../assessors/`.
- The batch only fires for the current `OPEN` round. To invite for a different round, that round must be opened first.

12 — Delete an applicant under GDPR

Two-step destructive operation. Purges the applicant's profile, application data, uploaded documents, assessment record, and recommendation; anonymises the audit trail. Subject to the 7-year retention guard for active or recently-closed bursaries.

Prerequisites

- Signed in as `ADMIN`.
- A valid GDPR request from the data subject (keep your written evidence of the request — the system records the deletion but not the request itself).
- Confirm the application is **eligible** — applications more recent than 7 years and tied to an active bursary cannot be deleted; the system blocks them.

Steps

1. Find the application — sidebar → **Applications** → open the application's detail page (`/applications/[id]`).
2. At the top of the page, open the **Actions** dropdown.
3. Click **Delete Applicant Data (GDPR)**.
4. The confirmation dialog **Permanently Delete Applicant Data?** opens with the warning:

"This will anonymise the applicant's personal data across the system. This action cannot be undone. Records must be retained for 7 years from submission."

5. Read the warning. To proceed click the red **I understand, delete** button. To abort, close the dialog.

What happens

- Application sections and documents are deleted (Storage objects removed).
- Assessment and recommendation rows are deleted.
- The applicant's profile is anonymised (name and email cleared, role set to `DELETED`); the auth user is deleted from Supabase.
- An audit-log entry `GDPR_DELETION` is written **without** personal data in the entry itself.

Verification

- The application no longer appears in the queue.
- `/audit` (see Audit log review) shows the `GDPR_DELETION` entry, timestamped, attributed to you, with no personally identifying data in the metadata.
- Attempting to navigate to the old application URL returns 404.

Troubleshooting

- **Button disabled / blocked with retention message** — the application is inside the 7-year retention window and tied to an active/recent bursary. Document the refusal in your GDPR response to the applicant.
- **Document still visible in Storage** — refresh the page. If the Storage object truly persists, raise it as a bug; the deletion flow should remove all files.

13 — Audit log review (system-wide)

Open the audit page, filter, and confirm that sensitive events (name reveals, document grants, deletions, status changes) are logged with timestamp and acting user.

Prerequisites

- Signed in as `ADMIN`.

Open the page

1. Sidebar → **Audit**. You arrive at `/audit` under the heading **Audit Log** with the note *"System-wide activity log. All entries are immutable and append-only."*

Filter the entries

The filter bar at the top of the page provides:

- **Entity type** (dropdown) — All entity types | Application | Document | Assessment | Invitation.
- **Action** (text input) — case-insensitive substring match, e.g. `SUBMITTED`, `GDPR`, `REVEAL`.
- **From** (date) and **To** (date) — `YYYY-MM-DD`.
- **Filter** button — applies your filters.
- **Clear** link — appears when at least one filter is active.

Read an entry

Each timeline row shows:

- Coloured status dot (yellow=PAUSED, green=OUTCOME/QUALIFIES/SUBMITTED, blue=RESUMED, purple=DOCUMENT, red=STATUS/DELETED, orange=REVEAL/VERIFY).
- **Action** name in monospace (e.g. `APPLICATION_STATUS_CHANGED`, `GDPR_DELETION`).
- Relative timestamp (e.g. `15m ago`, `3d ago`).
- Plain-text context line summarising what happened.
- Metadata row: acting **user** | **entity type + ID** (truncated) | full timestamp.
- **Show metadata** link — expands the JSON payload.

Pagination

- Footer shows `Page x of y` with **Previous** / **Next** buttons.

Typical reviews

- **GDPR audit** — filter Action = `GDPR`, scan for `GDPR_DELETION` entries with timestamps and acting admin.
- **Document handling** — Entity type = Document; review uploads, verifications, deletes.
- **Name reveals** — Action = `REVEAL` to confirm only authorised assessors revealed applicant names.
- **Status changes** — Action = `STATUS` to trace lifecycle.

Notes

- Entries are append-only. There is no edit or delete action.
- Sensitive payloads (e.g. for GDPR deletions) intentionally exclude personal data — see Delete applicant gdpr.

14 — Reset another staff member's MFA

When an assessor loses their authenticator device, an admin can clear their MFA factor so they can re-enrol on next sign-in.

NOTE: MFA itself is currently in the backlog as **B8**. Until B8 ships, no application-level MFA reset UI exists; the procedure below is a manual database operation against Supabase. Update this guide alongside the B8 implementation.

Prerequisites

- Signed in as `ADMIN`.
- Access to the Supabase dashboard for the relevant environment, or the Supabase MCP wired into your local tooling.
- You know which staff member needs the reset (email or `user.id`).

Manual reset via Supabase dashboard

1. Open the Supabase project (`supabase-prod` for production, `supabase-nonprod` for staging) → **Authentication** → **Users**.
2. Find the user by email. Note their `user.id`.
3. Open the **SQL Editor** and run:

```
DELETE FROM auth.mfa_factors
WHERE user_id = '<the user.id>';
```

4. Confirm the row count returned is `>= 1`.

Manual reset via Supabase MCP

1. Use the appropriate MCP server (`supabase-nonprod` or `supabase-prod`).
2. Call `execute_sql` with:

```
DELETE FROM auth.mfa_factors
WHERE user_id = '<the user.id>';
```

Verification

- Ask the staff member to sign in. They should be prompted to enrol a new MFA factor.
- The audit log entry for the deletion is **not** in the application audit log (this is a direct DB op); record the action manually in your operations log.

Cross-references

- See `docs/archive/backlog/b8-mfa-for-admin-and-assessor.md` for the upcoming application-level reset flow.
- See Audit log review for normal application audit trail.

15 — Re-send or revoke an invitation

When an invitation email is lost, expired, or sent in error. **Re-send** pushes a fresh link with a new 30-day expiry; **Revoke** marks the invitation **EXPIRED** so the link cannot be used.

Prerequisites

- Signed in as **ADMIN**.
- The invitation exists in the **Invitation History** table at `/invitations`.
- The invitation status is **PENDING** — accepted invitations cannot be resent or revoked (the recipient already has an account).

Open the table

1. Sidebar → **Invitations** → you arrive at `/invitations`.
2. Scroll to the **Invitation History** table. Columns: **Email | Applicant | Child | School | Round | Status | Sent | Sent By | Actions**.
3. Status badges: **PENDING** (yellow), **ACCEPTED** (green), **EXPIRED** (grey).

Re-send

1. Find the **PENDING** row.
2. In **Actions**, click **Resend**.
3. The system regenerates the invitation token, resets the 30-day expiry, and re-sends the email.

Verification

- The **Sent** timestamp updates to now.
- The recipient receives a fresh email; the previous link is invalidated by the new token.

Revoke

1. Find the **PENDING** row.
2. In **Actions**, click **Revoke**.
3. Confirm.

Verification

- The status badge changes from **PENDING** to **EXPIRED**.
- The original link returns an "invitation expired" error if used.
- If the recipient never accepted, their stub auth user is removed.

Notes

- To re-invite after revocation, send a fresh invitation from the **Send New Invitation** form on the same page.
- Same actions cover staff invitations sent via Invite a staff member — they appear in the same Invitation History table.
- All resend/revoke events are recorded in the audit log — see Audit log review.
